

EVENT

Second Option: Towards a Global Science of Child Development: Challenges and Opportunities

[Live Q&A with the speakers] April 19, 2022, 10:00am - 11:00am EDT, USA. [Registration has closed for this event]

EVENT DETAILS

When?

TUESDAY, APRIL 19, 2022 10:00AM TO TUESDAY,
APRIL 19, 2022 11:00AM

Where?

Virtual

Registration is closed for this event.

#GlobalScience

This is a live Q & A session only with webinar speakers. Registrants will be asked to view the pre-recorded event (from [April 14](#)) prior to joining the session.

[Watch the pre-recorded event](#)

Developing a robust and generalizable model of child development requires that we study broad samples of children from around the world, yet studies of child development remain concentrated in regions of North America and Western Europe. In this webinar, developmental scientists from Africa, Asia, Europe, North and South America will discuss challenges and opportunities in conducting developmental research in diverse world regions. Speakers will focus on:

- the experiences of researchers from traditionally **under-represented regions**;
- the process of **building research capacity** in developing nations; and
- international efforts to **broaden participation** in developmental science.

Registration has closed for this event.
