#SRCDInequality2020

Economic inequalities have profound implications for the social, behavioral, and academic lives of infants, children, and adolescents. This interdisciplinary workshop will bring together scholars from psychology, education, sociology, economics, and public policy to move the field of developmental science forward on understanding the causes of inequality and courses of action to reduce their impact. Through invited panels, hands-on workshops, data blitz talks, poster presentations, and structured conversations, this workshop will highlight innovative research on children's thinking about economics and inequality and the programs and policies that address inequality in children's lives.

All fees to attend this workshop will be refunded in full, thanks to the generosity of the [William T. Grant Foundation](#). Participants must sign-up to reserve their spot and attend both days of the workshop. Refunds will be processed within three weeks pending confirmation of attendance at the event. Deadline to register is 9:00am, Sunday, November 8, 2020.

About the Platform, Gather

This event is being hosted by SRCD in a space created by [Virtual Chair](#) on the Gather platform. With Gather, you will be transported into a 2D workshop venue as a virtual avatar, where you can walk around, interact with workshop attendees that are right next to you, listen to talks, view posters, and more. You will be able to customize your avatar and navigate around the venue using the arrow keys on your keyboard.
