Child Development in a Diverse Majority Society Lecture Series

The Child Development in a Diverse Majority Society Lecture Series highlights research on children informing the impact of the U.S. transition to a racial-ethnic majority-minority society by the year 2044.

It is expected that by 2044, the United States will become a majority-minority society, with Non-Hispanic Whites comprising less than half of the U.S. population. In 2020, children will be a majority-minority population in the United States. As the nation prepares for this transition, the Society for Research in Child Development (SRCD) has launched an annual Lecture Series entitled Child Development in a Diverse Majority Society.

The idea for the SRCD Lecture Series grew out of discussions of the SRCD Ethnic and Racial Issues Committee on ways that SRCD could seize on this unique and historical opportunity to lead the conversation by sharing research on child development that will help children, and their families and caretakers, navigate this transition. The goal is to foster positive, inclusive approaches through research to engender self-respect and respect for others, increasing opportunities for healthy development and success in all children and youth.

Each year, SRCD invites a distinguished scholar who is researching this critical topic to deliver this annual lecture.

Annual Lectures
2019

Preparing Racial-Ethnic Minority Children for STEM Opportunities: Promoting Identity and Efficacy in Community Afterschool Programs

Co-hosted with the College of Family and Consumer Sciences at the University of Georgia.
This lecture was held on April 2, 2019 at the University of Georgia in Athens, Georgia, USA.

Featured Speaker:

- Emilie Smith, Ph.D., Professor, Human Development and Family Science

Introduction by:

- Laura L. Namy, Ph.D., Executive Director, Society for Research in Child Development
- Linda Kirk Fox, Ph.D., Dean of the College of Family & Consumer Sciences, The University of Georgia
