REVIEWING ACTIVITY (2006): JEP: General, Behavioral Neuroscience, Developmental Science, Developmental Psychobiology, Cognition, Learning and Motivation, Journal of Comparative Psychology, Psychological Science, Child Development, Journal of Experimental Child Psychology (3), European Journal of Developmental Psychology, Learning and Behavior, International Journal of Behavioral Development, Psychonomic Bulletin & Review; NSF; Blackwell Publishing; Oxford Univ. Press; McGraw Hill; U-Pittsburgh-Johnstown; Wright State University, University of Iowa; University of Denver, University of New South Wales (Au) .

My research is pictured and discussed in most texts on general psychology, developmental psychology, child psychology, developmental psychobiology, learning and behavior, and cognition (both animal and human), and several of my articles have been reprinted in books of readings. It has also appeared in popular magazines, including Life, Parents, Health News, Child, American Health, American Baby, BabyTalk, Parenting, Scientific American, Working Mother, Omni, Geo, Science News, La Recherche (Paris & Madrid editions), Famillie (France), USA Today (including international editions), USA Weekend Magazine, The Boston Globe, and various state/local newspapers. It also has been featured on television (NKT-Japan, CBC-Canada, BBC Ch 4-UK, PBS, ABC, CBS, CNN, The Discovery Channel), and in radio interviews in the USA, Great Britain (BBC), Canada, and Australia. Finally, journalists often ask me to comment on recent research reports pertaining to early learning and memory.
