

# U.S. Federal Funding Opportunities For Research, Evaluation, and Dissemination

February 2021

## Highlights –

This month's FFO highlights three funding opportunity announcements (FOA). The first is a [U.S. Department of Education funding opportunity](#) to provide financial aid grants to students (including students exclusively enrolled in distance education), which may be used for any component of the student's cost of attendance or for emergency costs that arise due to coronavirus. Applications are due by April 15, 2021. The second is a [Eunice Kennedy Shriver National Institute of Child Health and Human Development \(NICHD\) funding opportunity](#) to support studies that will lead to a broad understanding of the natural history of disorders that already do or could potentially benefit from early identification by newborn screening. Applications are due by June 5, 2021. The third is a [National Institutes of Health \(NIH\) funding opportunity](#) to support research that seeks to explain the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in human health, illness, recovery, and overall wellbeing. Applications are due by March 17, 2021.

## CAREER DEVELOPMENT AND RECOGNITION

### **AHRQ: Mentored Research Scientist Career Development Award (K01) PA-20-067**

#### **Application Submission Deadline: June 12, 2021**

The primary purpose of the AHRQ Mentored Research Scientist Career Development Awards (K01) program is to help ensure that a diverse pool of highly trained scientists is available in appropriate scientific disciplines to address the Nation's health services research needs. This AHRQ program provides support and "protected time" to individuals with a research doctoral degree for an intensive, supervised research career development experience in health services research. The K01 award can be used both by individuals who propose to newly embark in health services research training and those who had a hiatus in their research careers because of illness or family circumstances. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information.](#)

### **CDC: Grants to Support New Investigators in Conducting Research Related to Preventing Interpersonal Violence Impacting Children and Youth**

#### **RFA-CE-21-003**

#### **Application Submission Deadline: March 10, 2021**

The purpose of the Centers for Disease Control and Prevention National Center for Injury Prevention and Control (NCIPC) Mentored Research Scientist Development Award (K01) is to provide support for an intensive, supervised (mentored) career development experience in violence prevention research leading to research independence. NCIPC supports K01 grants to help ensure the availability of an adequate number of trained scientists to address critical public health research questions to prevent violence and injury. Applicants must propose a research project that addresses at least one of the research priorities in the interpersonal violence prevention section of the NCIPC Research Priorities (<https://www.cdc.gov/injury/researchpriorities/index.html>) as they relate to violence impacting children or youth (from birth through age 17). These research priorities include: Cross-cutting violence prevention; Child abuse and neglect; Youth violence; Intimate partner violence (teen dating violence); Sexual violence. Applications are due by 5:00 PM ET on March 10, 2021. [Read more information.](#)

### **NIDA: Mentored Clinical Scientist Development Program Award in Substance Use and Substance Use Disorder Research (K12 Clinical Trial Optional)**

#### **PAR-20-249**

#### **Application Submission Deadline: March 1, 2021**

This funding opportunity announcement (FOA) encourages applications for institutional research career development (K12) programs that propose to support intensive supervised research and career development experiences for clinician scientists (Scholars) leading to research independence in the area of substance use and substance use disorder research. For this FOA, clinician scientists may include (but are not limited to) physicians, clinical psychologists, epidemiologists, doctoral level social workers, pharmacists, and behavioral scientists. Scholars are expected to be supported for 3-5 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed program. Applications are due by March 1, 2021. [Read more information.](#)

### **NIDA: AIDS-Science Track Award for Research Transition (R03 Clinical Trial Optional)**

#### **PA-18-916**

#### **Application Submission Deadline: May 7, 2021**

This funding opportunity announcement (FOA) seeks to facilitate the entry of both newly independent and early career investigators to the area of drug use and use disorder research and HIV/AIDS. This FOA, AIDS-Science Track Award for Research Transition (A-START), encourages Small Research Grant (R03) applications to support research projects on drug misuse and/or use disorder and HIV/AIDS that can be carried out in a short period of time with limited resources. This FOA welcomes applications integrating drug misuse and/or use disorder and HIV/AIDS across all areas of research supported by NIDA. Applications are due by 5pm local time of applicant organization on May 7, 2021. [Read more information.](#)

### **NIDA: Behavioral Science Track Award for Rapid Transition (B/Start)(R03 Clinical Trial Optional)**

#### **PAR-19-310**

#### **Application Submission Deadline: June 16, 2021**

This Funding Opportunity from the National Institute on Drug Abuse (NIDA) will use a NIH Small Research Grant (R03) award mechanism to support studies that apply affective, cognitive and behavioral science approaches to research questions relevant to substance use disorders (SUD). With this R03 mechanism, NIDA aims to seed innovative affective,

cognitive and behavioral hypotheses, models, and methods in preclinical and clinical SUD research. The B/START R03 is intended for recently-independent investigators with expertise in behavioral science as well as established investigators who are using behavioral science approaches to SUD for the first time. Studies supported by B/START are expected to produce a coherent set of preliminary findings that would inform the design of a more complete study and serve as preliminary data supporting feasibility or scientific rationale in an R01, R21 or similar application. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#).

**NIDA: Imaging - Science Track Award for Research Transition (I/START) (R03 Clinical Trial Optional)  
PAR-18-918**

**Application Submission Deadline: June 16, 2021**

This funding opportunity announcement (FOA) encourages Small Research Grant (R03) applications to facilitate the entry of investigators to the area of neuroimaging, including both new investigators and established investigators seeking to adopt neuroimaging methodologies in their research programs, to enable the conduct of small "proof of concept" studies. The R03 is intended to support research projects that can be carried out in a short period of time with limited resources. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#).

**NIDA: Substance Use/Substance Use Disorder Dissertation Research Award (R36 - Clinical Trials Optional)  
PA-20-208**

**Application Submission Deadline: June 16, 2021**

The goal of this FOA is to support doctoral candidates from a variety of academic disciplines for up to two years for the completion of the doctoral dissertation research project. Research projects should align with NIDA funding priorities or within the NIDA Strategic Plan. This award will facilitate the entry of promising new investigators into the field of substance use/substance use disorder (SU(D) research, enhancing the pool of highly talented SU(D) researchers. Applications are particularly encouraged from those who can contribute to diversifying the research workforce as described in the Notice of NIH's Interest in Diversity. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#).

**NIDCR: Mentored Career Development Award to Promote Diversity in the Dental, Oral and Craniofacial Workforce (K01 Independent Basic Experimental Studies with Humans Required)**

**PAR-19-161**

**Application Submission Deadline: June 12, 2021**

The purpose of this NIDCR Mentored Career Development Award is to enhance the diversity of the independently funded dental, oral and craniofacial research workforce by providing a mentored research experience for eligible postdoctoral fellows and early career faculty from diverse backgrounds, including those who are from groups underrepresented in the biomedical and behavioral sciences. This award provides salary and research support for a sustained period of protected time for intensive research career development under the guidance of an experienced mentor. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIDCR: Mentored Career Development Award to Promote Diversity in the Dental, Oral and Craniofacial Workforce (K01 Independent Clinical Trial Not Allowed)**

**PAR-19-160**

**Application Submission Deadline: June 12, 2021**

The purpose of this NIDCR Mentored Career Development Award is to enhance the diversity of the independently funded dental, oral and craniofacial research workforce by providing a mentored research experience for eligible postdoctoral fellows and early career faculty from diverse backgrounds, including those who are from groups underrepresented in the biomedical and behavioral sciences. This award provides salary and research support for a sustained period of protected time for intensive research career development under the guidance of an experienced mentor. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIGMS: Postdoctoral Research Associate Training (PRAT) Program (Fi2)**

**PAR-19-286**

**Application Submission Deadline October 4, 2021**

The NIGMS Postdoctoral Research Associate Training (PRAT) Program's overarching goal is to provide high quality postdoctoral research training in the basic biomedical sciences to a diverse group of postdoctoral fellows in NIH Intramural research laboratories, and to prepare them for leadership positions in biomedical careers. Research projects proposed should focus on areas within the NIGMS mission, which include but are not limited to biological chemistry, biophysics, bioinformatics, cellular and molecular biology, computational biosciences, developmental biology, genetics, immunology, neuroscience, pharmacology, physiology, and technology development. In addition to the laboratory experience, the PRAT program provides a structured training environment with extensive career and professional development, mentoring, and networking opportunities planned and supported by the program. Applications are due by 5pm local time of applicant organization on October 4, 2021. [Read more information](#).

**NIH: International Research Scientist Development Award (IRSDA) (K01 Independent Clinical Trial Not Allowed; K01 Independent Clinical Trial Required)****PAR-21-104; PAR-21-105****Application Submission Deadline: March 9, 2021**

The purpose of the International Research Scientist Development Award (IRSDA) is to provide support and protected time (three to five years) to advanced postdoctoral U.S. research scientists and recently-appointed U.S. junior faculty (applicants must be at least two years beyond conferral of doctoral degree) for an intensive, mentored research career development experience in a low- or middle-income country (LMIC), as defined by the World Bank, including "low-income," "lower-middle-income," and "upper-middle-income" countries) leading to an independently-funded research career focused on global health. This Funding Opportunity Announcement (FOA) invites applications from postdoctoral research scientists and junior faculty from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of the LMIC under the mentorship of LMIC and U.S. mentors. Applications are due by 5:00 PM local time of applicant organization on March 9, 2021. Read more information: [PAR-21-104](#); [PAR-21-105](#)

**NIH: Advanced Laboratories for Accelerating the Reach and Impact of Treatments for Youth and Adults with Mental Illness (ALACRITY) Research Centers (P50 Clinical Trial Optional)****PAR-20-293****Application Submission Deadline: March 17, 2021**

This Funding Opportunity Announcement (FOA) invites applications for centers to support transdisciplinary teams of clinical and mental health services researchers, behavioral scientists, social scientists, health information and communications technologists, health systems engineers, decision scientists, and mental health stakeholders (e.g., service users, family members, clinicians, payers) to engage in high-impact studies that will significantly advance clinical practice and generate knowledge that will fuel transformation of mental health care in the United States. Advanced Laboratories for Accelerating the Reach and Impact of Treatments for Youth and Adults with Mental Illness (ALACRITY) Research Centers will support the rapid development, testing, and refinement of novel and integrative approaches for (1) optimizing the effectiveness of therapeutic or preventive interventions for mental disorders within well-defined target populations; (2) organizing and delivering optimized mental health services within real world treatment settings; and (3) continuously improving the quality, impact, and durability of optimized interventions and service delivery within diverse care systems. The ALACRITY Centers program is intended to support research that maximizes synergies across various components of the mental health research ecosystem, including new discoveries in clinical research, transformative health care technologies, advances in information science, and new federal and state mechanisms for organizing mental health care. The Centers are intended for transdisciplinary projects that could not be achieved using standard research project grant mechanisms. The ALACRITY Centers program is also expected to facilitate widespread sharing of relevant data, methods, and resources that will accelerate clinical research and practice and to provide opportunities for graduate students, postdoctoral researchers, and early-career investigators to participate in transdisciplinary, T2 translational mental health research. Applications are due by March 17, 2021. [Read more information](#).

**NIH: Providing Research Education Experiences to Enhance Diversity in the Next Generation of Substance Use and Addiction Scientists (R25 Clinical Trials Not Allowed)****PAR-20-236****Application Submission Deadline: March 15, 2021**

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Research Experiences and Courses for Skills Development. Applications are due by 5:00 PM local time of applicant organization on March 15, 2021. [Read more information](#).

**NIH: Mid-Career Enhancement Awards to Integrate Basic Behavioral, Biomedical, and/or Social Scientific Processes (K18 No Independent Clinical Trials) (K18 Basic Experimental Studies with Humans Required) PAR-20-211; PAR-20-226**

**Application Submission Deadline: March 17, 2021**

This Funding Opportunity Announcement (FOA) invites applications from investigators who strive to expand their research trajectories through the acquisition of new knowledge and skills in the areas of basic psychological processes, sociological processes, and/or biomedical pathways—expertise that is beyond and enhances their current areas of expertise. The program will support career development experiences and a small-scale research project that will provide experienced investigators with the scientific competencies required to conduct independent research projects that more thoroughly investigate interrelationships among behavioral, biological, endocrine, epigenetic, immune, inflammatory, neurological, psychological, and/or social processes. Completed applications are due by 5pm local time of applicant organization on March 17, 2021. Read more information: [PAR-20-211](#); [PAR-20-226](#).

**NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (Parent F32) PA-21-048**

**Application Submission Deadline: April 8, 2021**

The purpose of the Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (Parent F32) is to support research training of highly promising postdoctoral candidates who have the potential to become productive, independent investigators in scientific health-related research fields relevant to the missions of the participating NIH Institutes and Centers. Applications are expected to incorporate exceptional mentorship. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor. Applications are due by 5:00 PM local time of applicant organization on April 8, 2021. [Read more information.](#)

**NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship (Parent F31) PA-21-051**

**Application Submission Deadline: April 8, 2021**

The purpose of the Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship (Parent F31) award is to enable promising predoctoral students to obtain individualized, mentored research training from outstanding faculty sponsors while conducting dissertation research in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The proposed mentored research training must reflect the candidate's dissertation research project and is expected to clearly enhance the individual's potential to develop into a productive, independent research scientist. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor. Applications are due by April 8, 2021. [Read more information.](#)

**NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (Parent F32) PA-21-248**

**Application Submission Deadline: April 8, 2021**

The purpose of the Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (Parent F32) is to support research training of highly promising postdoctoral candidates who have the potential to become productive, independent investigators in scientific health-related research fields relevant to the missions of the participating NIH Institutes and Centers. Applications are expected to incorporate exceptional mentorship. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor. Completed applications are due by April 8, 2021. [Read more information.](#)

**NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Senior Fellowship (Parent F33) PA-21-247**

**Application Submission Deadline: April 8, 2021**

The National Institutes of Health (NIH) awards senior individual research training fellowships to experienced scientists who wish to make major changes in the direction of their research careers or who wish to broaden their scientific background by acquiring new research capabilities as independent investigators in research fields relevant to the missions of participating NIH Institutes and Centers. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial

feasibility study, or an ancillary clinical trial, but does allow candidates to propose research experience in a clinical trial led by a sponsor or co-sponsor. Applications are due by April 8, 2021. [Read more information](#).

**NIH: Blueprint Diversity Specialized Predoctoral to Postdoctoral Advancement in Neuroscience (D-SPAN) Award (F99/K00 Independent Clinical Trial Not Allowed)**

**RFA-NS-19-011**

**Application Submission Deadline: April 15, 2021**

The purpose of the NIH Blueprint Diversity Specialized Predoctoral to Postdoctoral Advancement in Neuroscience (D-SPAN) Award is to support a defined pathway across career stages for outstanding graduate students from diverse backgrounds, including those from groups underrepresented in biomedical and behavioral sciences. This two-phase award will facilitate completion of the doctoral dissertation and transition of talented graduate students to strong neuroscience research postdoctoral positions, and will provide career development opportunities relevant to their long-term career goal of becoming independent neuroscience researchers. Applications are due by 5pm local time of applicant organization on April 15, 2021. [Read more information](#).

**NIH: Jointly Sponsored Ruth L. Kirschstein National Research Service Award Institutional Predoctoral Training Program in the Neurosciences (T32 Clinical Trial Not Allowed)**

**PAR-20-076**

**Application Submission Deadline: May 25, 2021**

The Jointly Sponsored NIH Predoctoral Training Program in the Neurosciences (JSPTPN) is an institutional program that supports broad and fundamental research training in the neurosciences. In addition to a broad education in the neurosciences, a key component will be a curriculum that provides a strong foundation in experimental design, statistical methodology and quantitative reasoning. JSPTPN programs are intended to be 2 years in duration and students may only be appointed to this training grant during the first 2 years of their graduate research training. The primary objective is to prepare students to be outstanding scientists equipped to pursue careers in neuroscience. Letters of intent are due 30 days prior to the application due date. Applications are due by 5pm local time of applicant organization on May 21, 2021. [Read more information](#).

**NIH: Stephen I. Katz Early Stage Investigator Research Project Grant (R01 Clinical Trial Not Allowed)**

**PAR-21-038**

**Application Submission Deadline: May 26, 2021**

The purpose of this Funding Opportunity Announcement is to provide a new pathway for Early Stage Investigators (ESIs) who wish to propose research projects in a new direction for which preliminary data do not exist. The Stephen I. Katz Early Stage Investigator Research Project Grant, named in honor of the late National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) Director, Stephen I. Katz, M.D., Ph.D., is open to a broad range of scientific research relevant to the mission of the participating NIH Institutes and Centers (ICs). Proposed projects must represent a change in research direction for the ESI and should be innovative and unique. A distinct feature for this FOA is that applications must not include preliminary data. Applications are due by 5:00 PM local time of applicant organization on May 26, 2021. [Read more information](#).

**NIH: Stephen I. Katz Early Stage Investigator Research Project Grant (R01 Basic Experimental Studies with Humans Required)**

**PAR-21-039**

**Application Submission Deadline: May 26, 2021**

The Stephen I. Katz Early Stage Investigator Research Project Grant supports an innovative project that represents a change in research direction for an early stage investigator (ESI) and for which no preliminary data exist. Applications submitted to this Funding Opportunity Announcement (FOA) must not include preliminary data. Applications must include a separate attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Applications are due by 5:00 PM local time of applicant organization on May 26, 2021. [Read more information](#).

**NIH: BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00 Independent Clinical Trial Not Allowed) (K99/R00 Independent Clinical Trial Required)**

**RFA-NS-19-043; RFA-NS-19-044**

**Application Submission Deadline: June 9, 2021**

The purpose of the NIH BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to enhance workforce diversity in the neuroscience workforce and maintain a strong cohort of new and

talented, NIH-supported, independent investigators from diverse backgrounds in [BRAIN Initiative research areas](#). This program is designed to facilitate a timely transition of outstanding postdoctoral researchers with a research and/or clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIH research support during this transition in order to help awardees to launch competitive, independent research careers. Applications are due by June 9, 2021. [RFA-NS-19-043](#); [RFA-NS-19-044](#).

**NIH: NINDS Ruth L. Kirschstein National Research Service Award (NRSA) for Training of Postdoctoral Fellows (F32 Clinical Trial Not Allowed)**

**PAR-21-032**

**Application Submission Deadline: June 9, 2021**

The purpose of this award is to support outstanding scientific training of highly promising postdoctoral candidates with outstanding mentors. Candidates are eligible to apply for support from this program from ~12 months prior to the start of the proposed postdoctoral position to within 12 months after starting in the proposed postdoctoral position. This National Institute of Neurological Disorders and Stroke (NINDS) F32 seeks to foster early, goal-directed planning and to encourage applications for bold and/or innovative projects by the candidate that have the potential for significant impact. Inclusion of preliminary data is strongly discouraged; rather, this F32 seeks innovative research ideas and thoughtful plans for training and mentorship that will facilitate the development of the postdoctoral fellow into an outstanding scientist. Applications are expected to incorporate strong training in quantitative reasoning and the quantitative principles of experimental design and analysis. Support by this program is limited to the first 4 years of a candidate's activity in a specific laboratory or research environment, so as to further encourage early, thoughtful planning and timely completion of "mentored training" within a particular lab or environment. Applications are due by 5:00 PM local time of applicant organization on June 9, 2021. [Read more information.](#)

**NIH: Independent Scientist Award (Parent K02 - Independent Clinical Trial Required) (Parent K02 Independent Basic Experimental Studies with Humans Required)**

**PA-20-171; PA-20-173**

**Application Submission Deadline: June 12, 2021**

The purpose of the NIH Independent Scientist Award (K02) is to foster the development of outstanding scientists and enable them to expand their potential to make significant contributions to their field of research. The K02 award provides three to five years of salary support and "protected time" for newly independent scientists who can demonstrate the need for a period of intensive research focus as a means of enhancing their research careers. Each independent scientist career award program must be tailored to meet the individual needs of the candidate. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (i.e., NIA, NIAAA, NIDCR, NIDA, NIEHS, NINDS) based on their scientific missions. Applications are due by June 12, 2021. [PA-20-171](#); [PA-20-173](#).

**NIH: Mentored Clinical Scientist Research Career Development Award (Parent K08 Independent Basic Experimental Studies with Humans Required)**

**PA-20-201**

**Application Submission Deadline: June 12, 2021**

The primary purpose of the NIH Mentored Clinical Scientist Research Career Development Awards (K08) program is to prepare qualified individuals for careers that have a significant impact on the health-related research needs of the Nation. This program represents the continuation of a long-standing NIH program that provides support and "protected time" to individuals with a clinical doctoral degree for an intensive, supervised research career development experience in the fields of biomedical and behavioral research, including translational research. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in [NOT-OD-18-212](#) as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information.](#)

**NIH: Mentored Research Scientist Development Award (Parent K01 - Independent Clinical Trial Required)**

**PA-20-176; PA-20-190**

**Application Submission Deadline: June 12, 2021**

The purpose of the NIH Mentored Research Scientist Development Award (K01) is to provide support and "protected time" (three to five years) for an intensive, supervised career development experience in the biomedical, behavioral, or

clinical sciences leading to research independence. Although all of the participating NIH Institutes and Centers (ICs) use this support mechanism to support career development experiences that lead to research independence, some ICs use the K01 award for individuals who propose to train in a new field or for individuals who have had a hiatus in their research career because of illness or pressing family circumstances. PA-20-176 is designed specifically for candidates proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. PA-20-190 is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial. Applicants to PA-20-190 are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applications are due by 5pm local time of applicant organization on June 12, 2021. Read more information: [PA-20-176](#); [PA-20-190](#)

**NIH: Mentored Research Scientist Development Award (Parent K01 Independent Basic Experimental Studies with Humans Required)**

**PA-20-191**

**Application Submission Deadline: June 12, 2021**

The purpose of the NIH Mentored Research Scientist Development Award (K01) is to provide support and “protected time” (three to five years) for an intensive, supervised career development experience in the biomedical, behavioral, or clinical sciences leading to research independence. Although all of the participating NIH Institutes and Centers (ICs) use this support mechanism to support career development experiences that lead to research independence, some ICs use the K01 award for individuals who propose to train in a new field or for individuals who have had a hiatus in their research career because of illness or pressing family circumstances. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in [NOT-OD-18-212](#) as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIH: Pathway to Independence Award (Parent K99/R00 Independent Clinical Trial Required)**

**PA-20-187; PA-20-188**

**Application Submission Deadline: June 12, 2021**

The purpose of the NIH Pathway to Independence Award (K99/R00) program is to facilitate a timely transition of outstanding postdoctoral researchers with a research and/or clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIH research support during this transition in order to help awardees to launch competitive, independent research careers. PA-20-187 is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. PA-20-188 is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to PA-20-188 are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIH: Pathway to Independence Award (Parent K99/R00 Independent Basic Experimental Studies with Humans Required)**

**PA-20-189**

**Application Submission Deadline: June 12, 2021**

The purpose of the NIH Pathway to Independence Award (K99/R00) program is to facilitate a timely transition of outstanding postdoctoral researchers with a research and/or clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIH research support during this transition in order to help awardees to launch competitive, independent research careers. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in [NOT-OD-18-212](#) as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIH: Research Enhancement Award Program (REAP) for Health Professional Schools and Graduate Schools (R15 Clinical Trial Not Allowed) (R15 Clinical Trial Required)**

**PAR-19-134; PAR-19-135****Application Submission Deadline: June 25, 2021**

The purpose of the Research Enhancement Award Program (REAP) for Health Professional Schools and Graduate Schools is to stimulate basic and clinical research in educational institutions that provide baccalaureate or advanced degrees for a significant number of the Nation's research scientists, but that have not been major recipients of NIH support. REAP grants create opportunities for scientists and institutions otherwise unlikely to participate extensively in NIH research programs to contribute to the Nation's biomedical and behavioral research effort. REAP grants are intended to support small-scale research projects proposed by faculty members of eligible, domestic institutions, to expose undergraduate and/or graduate students at health professional schools or graduate schools to meritorious research projects, and to strengthen the research environment of the applicant institution. Applications are due by 5pm local time of applicant organization on June 25, 2021. Read more information: [PAR-19-134](#); [PAR-19-135](#).

**NIH: Science Education Partnership Award (SEPA) (R25 - Clinical Trial Not Allowed)****PAR-20-153****Application Submission Deadline: July 13, 2021**

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation's biomedical, behavioral and clinical research needs. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Courses for Skills Development; Research Experiences; Mentoring Activities; Curriculum or Methods Development; and Outreach. Applications are due by July 13, 2021. [Read more information](#).

**NIH: BRAIN Initiative Fellows: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (F32)****RFA-MH-20-620****Application Submission Deadline: August 10, 2021**

The purpose of the Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative Fellows (F32) program is to enhance the research training of promising postdoctorates, early in their postdoctoral training period, who have the potential to become productive investigators in research areas that will advance the goals of the BRAIN Initiative. Applications are encouraged in any research area that is aligned with the BRAIN Initiative, including neuroethics. Applicants are expected to propose research training in an area that clearly complements their predoctoral research. Formal training in analytical tools appropriate for the proposed research is expected to be an integral component of the research training plan. In order to maximize the training potential of the F32 award, this program encourages applications from individuals who have not yet completed their terminal doctoral degree and who expect to do so within 12 months of the application due date. On the application due date, candidates may not have completed more than 12 months of postdoctoral training. Applications are due by 5:00 PM local time of applicant organization on August 10, 2021. [Read more information](#).

**NIH: Research Supplements to Promote Diversity in Health-Related Research (Admin Supp - Clinical Trial Not Allowed)****PA-18-906****Application Submission Deadline: NIH Institutes and Centers (ICs) dependent**

The National Institutes of Health (NIH) and the Center for Disease Control and Prevention hereby notify Program Director(s)/Principal Investigator(s) (PD(s)/PI(s)) holding specific types of research grants that funds are available for administrative supplements to improve the diversity of the research workforce by recruiting and supporting students, postdoctorates, and eligible investigators from diverse backgrounds, including those from groups that have been shown to be underrepresented in health-related research. This supplement opportunity is also available to PD(s)/PI(s) of research grants who are or become disabled and need additional support to accommodate their disability in order to continue to work on the research project. Administrative supplements must support work within the scope of the original project. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. The application deadline varies by IC. [See the specific deadlines](#) and [read more information](#).

**NIMH: Mental Health Research Dissertation Grant to Enhance Workforce Diversity (R36 Independent Clinical Trial Not Allowed)****PAR-18-894****Application Submission Deadline: April 6, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to enhance the diversity of the mental health research workforce by providing dissertation awards in all research areas within the strategic priorities of the NIMH to individuals

from groups underrepresented in biomedical, behavioral, clinical and social sciences research. This award supports the completion of the doctoral research project. Applications are due on April 6, 2021. [Read more information](#).

**NIMH: Biobehavioral Research Awards for Innovative New Scientists (NIMH BRAINS) (R01 Clinical Trial Optional) RFA-MH-20-525**

**Application Submission Deadline: June 20, 2021**

The NIMH Biobehavioral Research Awards for Innovative New Scientists (BRAINS) award is intended to support the research and research career advancement of outstanding, exceptionally productive scientists who are in the early, formative stages of their careers and who plan to make a long-term career commitment to research in specific mission areas of the NIMH. This award seeks to assist these individuals in launching an innovative clinical, translational, basic, or services research program that holds the potential to profoundly transform the understanding, diagnosis, treatment, or prevention of mental disorders. The NIMH BRAINS program will focus on the research priorities and gap areas identified in the NIMH Strategic Plan. Applications are due by 5pm on June 20, 2021. [Read more information](#).

**NSF: Faculty Early Career Development Program (CAREER) NSF 20-525**

**Application Submission Deadline: July 26, 2021**

The Faculty Early Career Development (CAREER) Program is a Foundation-wide activity that offers the National Science Foundation's most prestigious awards in support of early-career faculty who have the potential to serve as academic role models in research and education and to lead advances in the mission of their department or organization. Activities pursued by early-career faculty should build a firm foundation for a lifetime of leadership in integrating education and research. NSF encourages submission of CAREER proposals from early-career faculty at all CAREER-eligible organizations and especially encourages women, members of underrepresented minority groups, and persons with disabilities to apply. Applications are due by 5pm local time of submitter on July 26, 2021. [Read more information](#).

**NSF: Alliances for Graduate Education and the Professoriate NSF 16-552**

**Application Submission Deadline: Second Friday in December, Annually**

The Alliances for Graduate Education and the Professoriate (AGEP) program seeks to advance knowledge about models to improve pathways to the professoriate and success for historically underrepresented minority doctoral students, postdoctoral fellows and faculty, particularly African Americans, Hispanic Americans, American Indians, Alaska Natives, Native Hawaiians, and Native Pacific Islanders, in specific STEM disciplines and/or STEM education research fields. New and innovative models are encouraged, as are models that reproduce and/or replicate existing evidence-based alliances in significantly different disciplines, institutions, and participant cohorts. The AGEP program goal is to increase the number of historically underrepresented minority faculty, in specific STEM disciplines and STEM education research fields, by advancing knowledge about pathways to career success. The program objectives include: To support the development, implementation and study of innovative models of doctoral education, postdoctoral training, and faculty advancement for historically underrepresented minorities in specific STEM disciplines and/or STEM education research fields; and to advance knowledge about the underlying issues, policies and practices that have an impact on the participation, transitions and advancement of historically underrepresented minorities in the STEM academy. Applications are due by the second Friday in December, annually. [Read more information](#).

**NSF: EHR Core Research (ECR): Building Capacity in STEM Education Research (ECR: BCSER) NSF 20-521**

**Application Submission Deadline: Fourth Friday in February, Annually**

ECR's Building Capacity for STEM Education Research (ECR: BCSER) solicitation supports projects that build individuals' capacity to carry out high quality STEM education research that will enhance the nation's STEM education enterprise and broaden the pool of researchers that can conduct fundamental research in STEM learning and learning environments, broadening participation in STEM fields, and STEM workforce development. Specifically, ECR: BCSER supports activities that enable early and mid-career researchers to acquire the requisite expertise and skills to conduct rigorous fundamental research in STEM education. ECR: BCSER seeks to fund research career development activities on topics that are relevant to qualitative and quantitative research methods and design, including the collection and analysis of new qualitative or quantitative data, secondary analyses using extant datasets, or meta-analyses. Applications are due by 5pm local time of submitter on the fourth Friday in February, annually. [Read more information](#).

**NSF: SBE Postdoctoral Research Fellowships NSF 16-590**

**Application Submission Deadline: November 1, Annually.**

The National Science Foundation (NSF), Directorate for Social, Behavioral and Economic Sciences (SBE) offers Postdoctoral Research Fellowships to encourage independence early in the Fellow's career through supporting his or her

research and training goals. The research and training plan of each fellowship must address important scientific questions within the scope of the SBE Directorate and the specific guidelines in this fellowship solicitation. Applications are due by November 1, annually. [Read more information.](#)

## **SCIENTIFIC WORKFORCE DIVERSITY**

### **NIH: Providing Research Education Experiences to Enhance Diversity in the Next Generation of Substance Use and Addiction Scientists (R25 Clinical Trials Not Allowed)**

**PAR-20-236**

**Application Submission Deadline: March 15, 2021**

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Research Experiences and Courses for Skills Development. Applications are due by 5:00 PM local time of applicant organization on March 15, 2021. [Read more information.](#)

### **NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship to Promote Diversity in Health-Related Research (Parent F31-Diversity)**

**PA-21-252**

**Application Submission Deadline: April 8, 2021**

The purpose of this Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship to Promote Diversity in Health-Related Research award is to enhance the diversity of the health-related research workforce by supporting the research training of predoctoral students from diverse backgrounds including those from groups that are underrepresented in the biomedical, behavioral, or clinical research workforce. Through this award program, promising predoctoral students will obtain individualized, mentored research training from outstanding faculty sponsors while conducting well-defined research projects in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The proposed mentored research training is expected to clearly enhance the individual's potential to develop into a productive, independent research scientist. Applications are due by April 8, 2021. [Read more information.](#)

### **NIH: Ruth L. Kirschstein National Research Service Award (NRSA) Institutional Research Training Grant (Parent T32)**

**PA-20-142**

**Application Submission Deadline: May 25, 2021**

The National Institutes of Health (NIH) will award Ruth L. Kirschstein National Research Service Award (NRSA) Institutional Research Training Grants (T32) to eligible, domestic institutions to enhance predoctoral and postdoctoral research training, including short-term research training, and help ensure that a diverse and highly trained workforce is available to meet the needs of the Nation's biomedical, behavioral, and clinical research agenda. Research training programs are expected to incorporate didactic, research, and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the Nation. Programs proposing only short-term predoctoral research training should not apply to this announcement, but rather to the Kirschstein-NRSA Short-Term Institutional Research Training Grant Program (T35) exclusively reserved for predoctoral, short-term research training. Applications are due by May 25, 2021. [Read more information.](#)

### **NIH: BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00 Independent Clinical Trial Not Allowed) (K99/R00 Independent Clinical Trial Required)**

**RFA-NS-19-043; RFA-NS-19-044**

**Application Submission Deadline: June 9, 2021**

The purpose of the NIH BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to enhance workforce diversity in the neuroscience workforce and maintain a strong cohort of new and talented, NIH-supported, independent investigators from diverse backgrounds in [BRAIN Initiative research areas](#). This program is designed to facilitate a timely transition of outstanding postdoctoral researchers with a research and/or clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIH research support during this transition in order to help awardees to launch competitive, independent research careers. Applications are due by June 9, 2021. [RFA-NS-19-043](#); [RFA-NS-19-044](#).

### **NIH: NIDCR Mentored Career Development Award to Promote Diversity in the Dental, Oral and Craniofacial Workforce (K01 Independent Basic Experimental Studies with Humans Required)**

**PAR-19-161****Application Submission Deadline: June 12, 2021**

The purpose of this NIDCR Mentored Career Development Award is to enhance the diversity of the independently funded dental, oral and craniofacial research workforce by providing a mentored research experience for eligible postdoctoral fellows and early career faculty from diverse backgrounds, including those who are from groups underrepresented in the biomedical and behavioral sciences. This award provides salary and research support for a sustained period of protected time for intensive research career development under the guidance of an experienced mentor. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIH: NIDCR Mentored Career Development Award to Promote Diversity in the Dental, Oral and Craniofacial Workforce (K01 Independent Clinical Trial Not Allowed)****PAR-19-160****Application Submission Deadline: June 12, 2021**

The purpose of this NIDCR Mentored Career Development Award is to enhance the diversity of the independently funded dental, oral and craniofacial research workforce by providing a mentored research experience for eligible postdoctoral fellows and early career faculty from diverse backgrounds, including those who are from groups underrepresented in the biomedical and behavioral sciences. This award provides salary and research support for a sustained period of protected time for intensive research career development under the guidance of an experienced mentor. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIH: Small Grants for New Investigators to Promote Diversity in Health-Related Research (R21 Clinical Trial Optional)****PAR-19-222****Application Submission Deadline: June 16, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to provide support for New Investigators: (1) from diverse backgrounds, including from groups nationally underrepresented in biomedical and behavioral research to conduct small research projects in the scientific mission areas of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) and the National Human Genome Research Institute (NHGRI) and (2) who at the time of award under this FOA will have/have had less than \$125,000 direct cost of combined research funding (excluding NIH training and NIH career awards). This R21 will support small research projects that can be carried out in a short period of time with limited resources and seeks to facilitate the transition to research independence of diverse New Investigators. The R21 grant mechanism supports different types of projects including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#).

**NIH: Enhancing Science, Technology, Engineering, and Math Educational Diversity (ESTEEMED) Research Education Experiences (R25)****PAR-20-223****Application Submission Deadline: June 24, 2021**

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on Courses for Skills Development and Research Experiences for undergraduate freshmen and sophomores from diverse backgrounds, including those from groups underrepresented in bioengineering or STEM fields relevant to bioengineering, such as engineering or the physical/computational sciences, which play key roles in biomedical technologies and innovation. Completed applications are due by June 24, 2021. [Read more information](#).

**NIH: Neuroscience Development for Advancing the Careers of a Diverse Research Workforce (R25 Clinical Trial Not Allowed)****PAR-20-240**

**Application Submission Deadline: September 27, 2021**

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Research Experiences, Mentoring Activities, and Curriculum or Methods Development. Completed applications are due by September 27, 2021. [Read more information](#).

**NIH: NIGMS Postdoctoral Research Associate Training (PRAT) Program (Fi2)  
PAR-19-286**

**Application Submission Deadline October 4, 2021**

The NIGMS Postdoctoral Research Associate Training (PRAT) Program's overarching goal is to provide high quality postdoctoral research training in the basic biomedical sciences to a diverse group of postdoctoral fellows in NIH Intramural research laboratories, and to prepare them for leadership positions in biomedical careers. Research projects proposed should focus on areas within the NIGMS mission, which include but are not limited to biological chemistry, biophysics, bioinformatics, cellular and molecular biology, computational biosciences, developmental biology, genetics, immunology, neuroscience, pharmacology, physiology, and technology development. In addition to the laboratory experience, the PRAT program provides a structured training environment with extensive career and professional development, mentoring, and networking opportunities planned and supported by the program. Applications are due by 5pm local time of applicant organization on October 4, 2021. [Read more information](#).

**NIH: Research Supplements to Promote Diversity in Health-Related Research (Admin Supp - Clinical Trial Not Allowed)  
PA-18-906**

**Application Submission Deadline: NIH Institutes and Centers (ICs) dependent**

The National Institutes of Health (NIH) and the Center for Disease Control and Prevention hereby notify Program Director(s)/Principal Investigator(s) (PD(s)/PI(s)) holding specific types of research grants that funds are available for administrative supplements to improve the diversity of the research workforce by recruiting and supporting students, postdoctorates, and eligible investigators from diverse backgrounds, including those from groups that have been shown to be underrepresented in health-related research. This supplement opportunity is also available to PD(s)/PI(s) of research grants who are or become disabled and need additional support to accommodate their disability in order to continue to work on the research project. Administrative supplements must support work within the scope of the original project. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. The application deadline varies by IC. [See specific deadlines](#) and [read more information](#).

**NIH: Research Supplements to Promote Diversity in Health-Related Research (Admin Supp - Clinical Trial Not Allowed)  
PA-20-222**

**Application Submission Deadline: Varies by Awarding Institute or Center**

The National Institutes of Health (NIH) and the Centers for Disease Control and Prevention hereby notify Program Director(s)/Principal Investigator(s) (PD(s)/PI(s)) holding specific types of research grants (listed in the full FOA) that funds are available for administrative supplements to enhance the diversity of the research workforce by recruiting and supporting students, post-doctorates, and eligible investigators from diverse backgrounds, including those from groups that have been shown to be underrepresented in health-related research. This supplement opportunity is also available to PD(s)/PI(s) of research grants who are or become disabled and need additional support to accommodate their disability in order to continue to work on the research project. Administrative supplements must support work within the scope of the original project. The application deadline varies by the awarding Institute or Center. [Read more information](#).

**NIMH: Mental Health Research Dissertation Grant to Enhance Workforce Diversity (R36 Independent Clinical Trial Not Allowed)  
PAR-18-894**

**Application Submission Deadline: April 6, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to enhance the diversity of the mental health research workforce by providing dissertation awards in all research areas within the strategic priorities of the NIMH to individuals from groups underrepresented in biomedical, behavioral, clinical and social sciences research. This award supports the completion of the doctoral research project. Applications are due on April 6, 2021. [Read more information](#).

**NSF: Build and Broaden 2.0 (B2 2.0) - Enhancing Social, Behavioral and Economic Science Research and Capacity at Minority-Serving Institutions**  
**NSF 21-542**

**Application Submission Deadline: March 5, 2021**

Build and Broaden 2.0 (B2 2.0) encourages research collaborations between scholars at minority-serving institutions (MSIs) and scholars in other institutions or organizations. Growing the science, technology, engineering, and mathematics (STEM) workforce is a national priority. National forecasts of the impending shortage of science and engineering skills and essential research workforce underscore a need to expand opportunities to participate in STEM research. Proposals are invited from single Principal Investigators based at MSIs and from multiple co-investigators from a group of MSIs. Principal Investigators who are not affiliated with MSIs may submit proposals, but must collaborate with PIs, co-PIs, or Senior Personnel from MSIs and describe how their project will foster research partnerships or capacity-building with at least one MSI as a primary goal of the proposed work. Proposals may address any of the scientific areas supported by SBE. These areas include anthropology, archaeology, cognitive neuroscience, decision science, ecological research, economics, geography, linguistics, law and science, organizational behavior, political science, public policy, security and preparedness, psychology, and sociology. All applications are due by 5:00 PM local time of applicant organization on March 5, 2021. [Read more information.](#)

**NSF: Alliances for Graduate Education and the Professoriate**  
**16-552**

**Application Submission Deadline: Second Friday in December, Annually**

The Alliances for Graduate Education and the Professoriate (AGEP) program seeks to advance knowledge about models to improve pathways to the professoriate and success for historically underrepresented minority doctoral students, postdoctoral fellows and faculty, particularly African Americans, Hispanic Americans, American Indians, Alaska Natives, Native Hawaiians, and Native Pacific Islanders, in specific STEM disciplines and/or STEM education research fields. New and innovative models are encouraged, as are models that reproduce and/or replicate existing evidence-based alliances in significantly different disciplines, institutions, and participant cohorts. The AGEP program goal is to increase the number of historically underrepresented minority faculty, in specific STEM disciplines and STEM education research fields, by advancing knowledge about pathways to career success. The program objectives include: To support the development, implementation and study of innovative models of doctoral education, postdoctoral training, and faculty advancement for historically underrepresented minorities in specific STEM disciplines and/or STEM education research fields; and to advance knowledge about the underlying issues, policies and practices that have an impact on the participation, transitions and advancement of historically underrepresented minorities in the STEM academy. Applications are due by the second Friday in December, annually. [Read more information.](#)

## **GENERAL FUNDING MECHANISMS**

**NICHD: Research Project Grant (R01 - Clinical Trial Required)**  
**PA-18-480**

**Application Submission Deadline: May 8, 2021**

The NICHD supports research in areas relevant to normal and abnormal human development, including: contraception, fertilization, pregnancy, childbirth, prenatal and postnatal development; childhood development through adolescence; intellectual and developmental disabilities; and rehabilitation medicine. This FOA is specifically for receipt of applications within the NICHD mission that propose one or more clinical trials. Applications are due by 5pm local time of applicant organization on May 8, 2021. [Read more information.](#)

**NIDA: Program Project Grant Applications (P01 Clinical Trial Optional)**  
**PAR-19-345**

**Application Submission Deadline: May 25, 2021**

This Funding Opportunity Announcement (FOA) announces the availability of support for collaborative research by multi-disciplinary teams which is of high priority to NIDA and leads to synergistic outcomes based on the synthesis of multiple research approaches. The NIDA Program Projects funding opportunity will support research in which the funding of three or more highly meritorious projects as a group enriches both the component projects and the overall program to offer significant scientific advantages over supporting the same projects as individual research grants (i.e., synergy). For the duration of the award, each Program must consist of a minimum of three research projects focused on issues critical to advance the mission and goals of NIDA. Letters of intent are due 30 days prior to the application due date. Applications are due by May 25, 2021. [Read more information.](#)

**NIH: Stephen I. Katz Early Stage Investigator Research Project Grant (R01 Clinical Trial Not Allowed)**  
**PAR-21-038**

**Application Submission Deadline: May 26, 2021**

The purpose of this Funding Opportunity Announcement is to provide a new pathway for Early Stage Investigators (ESIs) who wish to propose research projects in a new direction for which preliminary data do not exist. The Stephen I. Katz Early Stage Investigator Research Project Grant, named in honor of the late National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) Director, Stephen I. Katz, M.D., Ph.D., is open to a broad range of scientific research relevant to the mission of the participating NIH Institutes and Centers (ICs). Proposed projects must represent a change in research direction for the ESI and should be innovative and unique. A distinct feature for this FOA is that applications must not include preliminary data. Applications are due by 5:00 PM local time of applicant organization on May 26, 2021. [Read more information.](#)

**NIH: Stephen I. Katz Early Stage Investigator Research Project Grant (R01 Basic Experimental Studies with Humans Required)**

**PAR-21-039**

**Application Submission Deadline: May 26, 2021**

The Stephen I. Katz Early Stage Investigator Research Project Grant supports an innovative project that represents a change in research direction for an early stage investigator (ESI) and for which no preliminary data exist. Applications submitted to this Funding Opportunity Announcement (FOA) must not include preliminary data. Applications must include a separate attachment describing the change in research direction. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Applications are due by 5:00 PM local time of applicant organization on May 26, 2021. [Read more information.](#)

**NIH: Exploratory/Developmental Research Grant Program (Parent R21 Clinical Trial Not Allowed)**

**PA-20-195**

**Application Submission Deadline: June 16, 2021**

The NIH Exploratory/Developmental Grant supports exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of biomedical, behavioral, or clinical research. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information.](#)

**NIH: Exploratory/Developmental Research Grant Program (Parent R21 Basic Experimental Studies with Humans Required)**

**PA-20-196**

**Application Submission Deadline: June 16, 2021**

The NIH Exploratory/Developmental Grant supports exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of biomedical, behavioral, or clinical research. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in [NOT-OD-18-212](#) as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information.](#)

**NIH: Small Research Grant Program (Parent R03 Clinical Trial Not Allowed)**

**PA-20-200**

**Application Submission Deadline: June 16, 2021**

The NIH Small Research Grant Program supports small research projects that can be carried out in a short period of time with limited resources. This program supports different types of projects including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. This Funding Opportunity Announcement does not accept applications proposing clinical trial(s). Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information.](#)

**NIH: Limited Competition: Competitive Revision Awards for the Clinical and Translational Science Award (CTSA) Program (U54 Clinical Trial Optional)**

**PAR-19-337**

**Application Submission Deadline: September 27, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to solicit competitive revision (formerly known as competitive supplement) applications from awardees with active Clinical and Translational Science Award (CTSA) Program hub awards (UL1) to support the demonstration, and/or dissemination, and/or implementation of highly innovative and impactful translational science projects that address the goals of the CTSA Program and are beyond the original scope of the approved parent project. Under this competitive revision, only applications for revisions to the UL1 award are allowed. Revisions to the linked KL2 and/or the TL1 awards are not allowed. Letters of intent are due 30 days prior to the application due date. Applications are due by September 27, 2021. [Read more information](#).

**BY TOPIC****ADOLESCENTS AND YOUTH****CDC: Grants to Support New Investigators in Conducting Research Related to Preventing Interpersonal Violence Impacting Children and Youth****RFA-CE-21-003****Application Submission Deadline: March 10, 2021**

The purpose of the Centers for Disease Control and Prevention National Center for Injury Prevention and Control (NCIPC) Mentored Research Scientist Development Award (K01) is to provide support for an intensive, supervised (mentored) career development experience in violence prevention research leading to research independence. NCIPC supports K01 grants to help ensure the availability of an adequate number of trained scientists to address critical public health research questions to prevent violence and injury. Applicants must propose a research project that addresses at least one of the research priorities in the interpersonal violence prevention section of the NCIPC Research Priorities (<https://www.cdc.gov/injury/researchpriorities/index.html>) as they relate to violence impacting children or youth (from birth through age 17). These research priorities include: Cross-cutting violence prevention; Child abuse and neglect; Youth violence; Intimate partner violence (teen dating violence); Sexual violence. Applications are due by 5:00 PM ET on March 10, 2021. [Read more information](#).

**CDC: Research Grants for Preventing Violence and Violence Related Injury (R01)****RFA-CE-21-004****Application Submission Deadline: March 22, 2021**

The Centers for Disease Control and Prevention's National Center for Injury Prevention and Control (NCIPC) is soliciting investigator-initiated research that will help expand and advance our understanding about what works to prevent violence that impacts children and youth, collectively referred to as Adverse Childhood Experiences (ACEs), including child abuse and neglect, teen dating violence, sexual violence, youth violence, and exposure to adult intimate partner violence. This initiative is intended to support the evaluation of primary prevention programs, practices or policies that focus on universal or selected populations at higher risk (i.e., populations that have one or more risk factors that place them at heightened risk for violence). Funds are available to conduct such studies focused on preventing child abuse and neglect and at least one other form of violence affecting children and youth, including teen dating violence, sexual violence, youth violence, and exposure to adult intimate partner violence. Applications are due by 5:00 PM ET on March 22, 2021. [Read more information](#).

**CDC: Rigorous Evaluation of Policies for their Impacts on the Primary Prevention of Multiple Forms of Violence****RFA-CE-21-001****Application Submission Deadline: April 5, 2021**

The Centers for Disease Control and Prevention's (CDC) National Center for Injury Prevention and Control (NCIPC) is soliciting research proposals to expand the evidence base for policy approaches for the primary prevention of multiple forms of violence experienced by children, youth, and adults. Policies that promote the social and economic well-being of populations and address community characteristics associated with violence have the potential to reduce rates of multiple forms of violence, including the four forms that are the focus of this announcement: child abuse and neglect, youth violence, intimate partner violence, and sexual violence. To advance NCIPC's commitment to increasing health equity, the intent is to support applications that investigate policies that address social and structural conditions to reduce the disproportionate burden of violence experienced by some groups and communities. Applications are due by 5:00 PM local time of applicant organization on April 5, 2021. [Read more information](#).

**CDC: The CDC National Centers of Excellence in Youth Violence Prevention (YVPCs): Rigorous Evaluation of Prevention Strategies to Prevent and Reduce Community Rates of Youth Violence****RFA-CE-21-005**

**Application Submission Deadline: April 21, 2021**

The Centers for Disease Control and Prevention's (CDC) National Center for Injury Prevention and Control (NCIPC or Injury Center) is soliciting research proposals to expand the evidence base for the primary prevention of youth violence. The purpose of this announcement is to fund the National Centers of Excellence in Youth Violence Prevention (Youth Violence Prevention Centers or YVPCs) to continue to build the evidence-base for violence prevention strategies and approaches that reduce community rates of youth violence within one or more geographically defined communities with high rates of youth violence. Applications for YVPCs supported under this announcement must describe 5 core elements: (1) an administrative infrastructure to support implementation, evaluation, and dissemination activities; to foster necessary local collaborations to achieve the YVPC's goals; and to work with other funded YVPCs as part of the YVPC Network; (2) the selected community or set of communities with high rates of youth violence as the focus of all proposed YVPC activities; (3) a rigorous evaluation of at least two distinct prevention strategies related to at least two of the four research areas outlined in this Notice of Funding Opportunity (NOFO) that are designed to reduce community rates of youth violence in the selected community or set of communities; (4) a youth advisory council to provide input on the selection, implementation, and evaluation of youth violence prevention strategies; and (5) integrated training activities for early career and junior researchers in youth violence prevention to complement the implementation, rigorous evaluation, and scholarship activities of the YVPC. Applications are due by 5:00pm ET on April 21, 2021. [Read more information.](#)

**NIDCR: Improving Oral Health and Reducing Disparities in Adolescents (R01 Clinical Trial Not Allowed) (R21 Clinical Trial Not Allowed)****PAR-20-058; PAR-20-059****Application Submission Deadline: June 5, 2021 (R01); June 16, 2021 (R21)**

The purpose of this Funding Opportunity Announcement (FOA) is to stimulate research to improve the oral health of adolescents in the United States, and to reduce observed oral health disparities and inequities in this population. This FOA defines "adolescents" as those individuals between the ages of 10 and 19. Applications are due by 5pm local time of applicant organization on June 5, 2021 (R01) and June 16, 2021 (R21). Read more information: [R01](#), [R21](#)

**NEW NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)****PAR-21-144****Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to explain the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in human health, illness, recovery, and overall wellbeing. This includes research on the consequences of perceived isolation (e.g., loneliness) and/or objective/observed isolation on behavioral and clinical outcomes in adolescence and adulthood. Types of projects submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical and/or behavioral outcomes in humans to understand fundamental aspects of phenomena related to social connectedness and isolation. NIH considers such studies as "prospective basic science studies involving human participants" that meet the NIH definition of basic research and fall within the NIH definition of clinical trials (see, e.g., NOT-OD-19-024). Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications proposing studies - include, but are not limited to, model animal research or observational studies involving humans should submit under the companion FOA PAR-21-145 "Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Clinical Trials Not Allowed)". [Read more information.](#)

**NEW NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Clinical Trials Not Allowed)****PAR-21-145****Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to model the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in health, illness, recovery, and overall wellbeing. This includes research on the consequences of perceived isolation (e.g., loneliness) and/or objective/observed isolation on behavioral and clinical outcomes in adolescence and adulthood. Both animal and human subjects research projects are welcome. Researchers proposing basic science experimental studies involving human participants should consider the companion FOA PAR-21-144 "Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)". [Read more information.](#)

**NIH: Social Drivers of Mental Illnesses in Low- and Middle-Income Countries: Mechanisms and Pathways of Interventions for Youth (R01 Clinical Trial Optional)**

**RFA-MH-21-160**

**Application Submission Deadline: March 18, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to solicit research that will help to identify and explain the mechanisms and pathways by which interventions targeting social drivers of mental illnesses affect the mental health and functioning of children and/or adolescents (ages 5-24 years) living in World Bank designated low- and middle-income countries (LMICs) and previously designated LMICs re-categorized as high income on or after January 1, 2021. Studies should use innovative approaches to capture as much real-world complexity as possible in identifying and elucidating mechanisms and pathways that reduce risk for mental illnesses or improve mental health in children and/or adolescents. NIMH welcomes applicants from LMICs and strongly encourages applicants from the United States or upper middle-income countries to partner with sites in LMICs. All applications are due by 5:00 PM local time of applicant organization on March 18, 2021. [Read more information](#).

**NIH: HEAL Initiative: HEALthy Brain and Child Development Study (U01 - Clinical Trial Not Allowed)**

**RFA-DA-21-021**

**Application Submission Deadline: March 31, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to seek applications for unlinked Research Project Sites for the HEALthy Brain and Child Development (HBCD) Study using the cooperative agreement award mechanism. This FOA runs in parallel with companion FOAs that seek applications for linked Research Project Sites (RFA-DA-21-020), a single Consortium Administrative Core (RFA-DA-21-022) and a single Data Coordinating Center (RFA-DA-21-023). It is expected that investigators, upon funding, will work jointly with NIH scientific staff to assist, guide, coordinate, or participate in project activities. This FOA seeks applications to create a consortium of research sites in service of the nationwide, multi-site, multi-modal, longitudinal cohort HBCD Study to prospectively examine brain and behavioral development from birth through childhood, including an emphasis on understanding the impact of in utero substance exposure on outcomes. Research sites will enroll pregnant women and collect data from them and their children using methodologies that include neuroimaging, neurophysiology, behavioral and cognitive assessments and collection of biospecimens. Applications are due by 5:00 PM local time of applicant organization on March 31, 2021. [Read more information](#).

**NIH: HEAL Initiative: HEALthy Brain and Child Development Study (Collaborative U01- Clinical Trial Not Allowed)**

**RFA-DA-21-020**

**Application Submission Deadline: March 31, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to seek applications for linked Research Project Sites for the HEALthy Brain and Child Development (HBCD) Study using the cooperative agreement award mechanism. This FOA runs in parallel with companion FOAs that seek applications for single, unlinked Research Project Sites (RFA-DA-21-021), a single Consortium Administrative Core (RFA-DA-21-022) and a single Data Coordinating Center (RFA-DA-21-023). It is expected that investigators, upon funding, will work jointly with NIH scientific staff to assist, guide, coordinate, or participate in project activities. This FOA seeks applications to create a consortium of research sites in service of the nationwide, multi-site, multi-modal, longitudinal cohort HBCD Study to prospectively examine brain and behavioral development from birth through childhood, including an emphasis on understanding the impact of in utero substance exposure on outcomes. Research sites will enroll pregnant women and collect data from them and their children using methodologies that include neuroimaging, neurophysiology, behavioral and cognitive assessments and collection of biospecimens. Applications are due by 5:00 PM local time of applicant organization on March 31, 2021. [Read more information](#).

**NIH: Accelerating the Pace of Child Health Research Using Existing Data from the Adolescent Brain Cognitive Development (ABCD) Study (R01-Clinical Trial Not Allowed) (R21-Clinical Trial Not Allowed)**

**PAR-19-162; PAR-19-163**

**Application Submission Deadline: June 5, 2021 (R01), June 16, 2021 (R21)**

The Adolescent Brain Cognitive Development (ABCD) Study is collecting data on health and mental health, cognitive function, substance use, cultural and environmental factors, and brain structure and function from youth starting when they are 9-10 years-old and following them longitudinally to early adulthood. These data will be made available to the scientific community through the NIMH Data Archive. The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications proposing the analysis of this public use dataset to increase knowledge of adolescent health and development. More information about the ABCD Study may be found on the [ABCD Study web page](#). Applications are due by 5pm local time of applicant organization on June 5, 2021 for R01 and June 16, 2021 for R21. Read more information: [R01](#), [R21](#).

**NIH: End-of-Life and Palliative Needs of Adolescents and Young Adults (AYA) with Serious Illnesses (R01 Clinical Trial Optional) (R21 Clinical Trial Optional)**

**PAR-19-136; PAR-19-153**

**Application Submission Deadline: June 5, 2021 (R01), June 16, 2021 (R21)**

The purpose of this funding opportunity announcement (FOA) is to foster research on the unique perspectives, needs, wishes, and decision-making processes of adolescents and young adults (AYA; defined by the World Health Organization and the Centers for Disease Control and Prevention as youth between 12–24 years of age) with serious, advanced illnesses; and research focused on specific end-of-life/palliative care (EOLPC) models that support the physical, psychological, spiritual, and social needs of AYA with serious illness, their families and caregivers. Applications for PAR-19-136 are due by 5pm local time of applicant organization on June 5, 2021 (R01) and June 16, 2021 (R21).

**New NIH: Expert-Driven Small Projects to Strengthen Gabriella Miller Kids First Discovery (R03 Clinical Trial Not Allowed)**

**RFA-RM-21-011**

**Application Submission Deadline: June 18, 2021**

The NIH Common Fund has established the Gabriella Miller Kids First Pediatric Research Program (Kids First) with the vision of alleviating suffering from childhood cancer and structural birth defects by fostering collaborative research to uncover the etiology of these diseases and supporting data sharing within the pediatric research community. Kids First has established and continues to develop a Data Resource including a large collection of curated genomic and phenotypic data from childhood cancer and structural birth defects cohorts and a central portal where these data and analysis tools are accessible to the research community. This FOA is intended to engage experts in a variety of activities that will enhance the utility of childhood cancer and/or structural birth defects genomic datasets generated by the Kids First program and/or associated phenotypic datasets and resources. These activities should strengthen future analyses of Kids First datasets by the broader researcher community with the ultimate goal of improving diagnostic capabilities and therapies for children and their families affected by these conditions. [Read more information.](#)

**NIH: Research to Reduce Morbidity and Improve Care for Pediatric, and Adolescent and Young Adult (AYA) Cancer Survivors (R21 Clinical Trial Optional)**

**RFA-CA-20-028**

**Application Submission Deadline: July 30, 2021**

Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) invites applications describing research focused on improving care and health-related quality of life for childhood, and adolescent and young adult (AYA) cancer survivors. Specifically, this FOA solicits mechanistic, observational, and intervention applications that focus on six key domains: (1) disparities in survivor outcomes; (2) barriers to follow-up care (e.g. access, adherence); (3) impact of familial, socioeconomic, and other environmental factors on survivor outcomes; (4) indicators for long-term follow-up needs related to risk for late effects, recurrence, and subsequent cancers; (5) risk factors and predictors of late/long-term effects of cancer treatment; and (6) development of targeted interventions to reduce the burden of cancer for pediatric/AYA survivors. Applications are due by July 30, 2021. [Read more information.](#)

## **ADVERSE EXPERIENCES**

**CDC: Grants to Support New Investigators in Conducting Research Related to Preventing Interpersonal Violence Impacting Children and Youth**

**RFA-CE-21-003**

**Application Submission Deadline: March 10, 2021**

The purpose of the Centers for Disease Control and Prevention National Center for Injury Prevention and Control (NCIPC) Mentored Research Scientist Development Award (K01) is to provide support for an intensive, supervised (mentored) career development experience in violence prevention research leading to research independence. NCIPC supports K01 grants to help ensure the availability of an adequate number of trained scientists to address critical public health research questions to prevent violence and injury. Applicants must propose a research project that addresses at least one of the research priorities in the interpersonal violence prevention section of the NCIPC Research Priorities (<https://www.cdc.gov/injury/researchpriorities/index.html>) as they relate to violence impacting children or youth (from birth through age 17). These research priorities include: Cross-cutting violence prevention; Child abuse and neglect; Youth violence; Intimate partner violence (teen dating violence); Sexual violence. Applications are due by 5:00 PM ET on March 10, 2021. [Read more information.](#)

**CDC: Research Grants for Preventing Violence and Violence Related Injury (R01)**

**RFA-CE-21-004**

**Application Submission Deadline: March 22, 2021**

The Centers for Disease Control and Prevention's National Center for Injury Prevention and Control (NCIPC) is soliciting investigator-initiated research that will help expand and advance our understanding about what works to prevent violence that impacts children and youth, collectively referred to as Adverse Childhood Experiences (ACEs), including child abuse and neglect, teen dating violence, sexual violence, youth violence, and exposure to adult intimate partner violence. This initiative is intended to support the evaluation of primary prevention programs, practices or policies that focus on universal or selected populations at higher risk (i.e., populations that have one or more risk factors that place them at heightened risk for violence). Funds are available to conduct such studies focused on preventing child abuse and neglect and at least one other form of violence affecting children and youth, including teen dating violence, sexual violence, youth violence, and exposure to adult intimate partner violence. **NIH: End-of-Life and Palliative Needs of Adolescents and Young Adults (AYA) with Serious Illnesses (R01 Clinical Trial Optional) (R21 Clinical Trial Optional)**

**PAR-19-136; PAR-19-153**

**Application Submission Deadline: June 5, 2021 (R01), June 16, 2021 (R21)**

The purpose of this funding opportunity announcement (FOA) is to foster research on the unique perspectives, needs, wishes, and decision-making processes of adolescents and young adults (AYA; defined by the World Health Organization and the Centers for Disease Control and Prevention as youth between 12–24 years of age) with serious, advanced illnesses; and research focused on specific end-of-life/palliative care (EOLPC) models that support the physical, psychological, spiritual, and social needs of AYA with serious illness, their families and caregivers. Applications for PAR-19-136 are due by 5pm local time of applicant organization on June 5, 2021 ([R01](#)) and June 16, 2021 ([R21](#)).

## **ARTS**

**NEW NEA: NEA Research Labs, FY2022  
2021NEA01ORALABS**

**Application Submission Deadline: March 19, 2021**

National Endowment for the Arts (NEA) Research Labs funds transdisciplinary research teams grounded in the social and behavioral sciences, yielding empirical insights about the arts for the benefit of arts and non-arts sectors alike. Topic areas of interest include the intersections of the arts and 1) entrepreneurship and innovation; 2) creativity, cognition, and learning; and 3) health and social/emotional well-being. Matching/cost share cooperative agreements of up to \$150,000 will be awarded. Applications are due by March 19, 2021. [Read more information.](#)

**NIH: Promoting Research on Music and Health: Phased Innovation Award for Music Interventions (R61/R33 Clinical Trial Optional)**

**PAR-20-266**

**Application Submission Deadline: June 2, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to promote innovative research on music and health with an emphasis on developing music interventions aimed at understanding their mechanisms of action and clinical applications for the treatment of many diseases, disorders, and conditions. Given the emphasis on innovation, little or no preliminary data are needed to apply under this FOA. Because of the need for a multidisciplinary approach, collaborations among basic researchers, translational science researchers, music intervention experts, other clinical researchers, music health professionals, and technology development researchers are encouraged. The FOA utilizes a phased R61/R33 funding mechanism to support mechanistic research and to evaluate the clinical relevance of music interventions. Applications are due by June 2, 2021. [Read more information.](#)

## BEHAVIOR

### **NEW** NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)

**PAR-21-144**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to explain the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in human health, illness, recovery, and overall wellbeing. This includes research on the consequences of perceived isolation (e.g., loneliness) and/or objective/observed isolation on behavioral and clinical outcomes in adolescence and adulthood. Types of projects submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical and/or behavioral outcomes in humans to understand fundamental aspects of phenomena related to social connectedness and isolation. NIH considers such studies as "prospective basic science studies involving human participants" that meet the NIH definition of basic research and fall within the NIH definition of clinical trials (see, e.g., NOT-OD-19-024). Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications proposing studies - include, but are not limited to, model animal research or observational studies involving humans should submit under the companion FOA PAR-21-145 "Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Clinical Trials Not Allowed)". [Read more information.](#)

### **NEW** NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Clinical Trials Not Allowed)

**PAR-21-145**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to model the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in health, illness, recovery, and overall wellbeing. This includes research on the consequences of perceived isolation (e.g., loneliness) and/or objective/observed isolation on behavioral and clinical outcomes in adolescence and adulthood. Both animal and human subjects research projects are welcome. Researchers proposing basic science experimental studies involving human participants should consider the companion FOA PAR-21-144 "Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)". [Read more information.](#)

### **NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Well-being, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)**

**PAR-19-384**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to explain the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in human health, illness, recovery, and overall well-being. Types of projects submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical and/or behavioral outcomes in humans to understand fundamental aspects of phenomena related to social connectedness and isolatedness. NIH considers such studies as "prospective basic science studies involving human participants" that meet the NIH definition of basic research and fall within the NIH definition of a clinical trials (see, e.g., NOT-OD-19-024). Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on March 17, 2021. [Read more information.](#)

### **NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Well-being, Illness, and Recovery (R01 Clinical Trials Not Allowed)**

**PAR-19-373**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) solicits research projects that seek to model the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in health, illness, recovery, and overall well-being. Both animal and human subjects research projects are welcome. Researchers proposing basic science

experimental studies involving human participants should consider this FOA's companion for basic experimental studies with humans. Applications are due by 5pm local time of applicant organization on March 17, 2021. [Read more information](#).

**NIH: Identification and Management of Behavioral Symptoms and Mental Health Conditions in Individuals with Intellectual Disabilities (R01 - Clinical Trial Optional)**

**PAR-18-766**

**Application Submission Deadline: June 5, 2021**

This Funding Opportunity Announcement (FOA) encourages research grant applications focusing on identification and management of behavioral symptoms and mental health conditions in individuals with intellectual disabilities (ID). Specific areas of interest for this funding opportunity are (1) applications to develop and validate assessment tools that reliably identify behavioral symptoms or diagnose mental health conditions in individuals with ID, and (2) applications studying the pharmacokinetics, safety and efficacy of specific psychotropic medications for treatment of behavioral symptoms or mental health conditions in individuals with ID. Letters of intent are due 30 days prior to the application deadline. Applications are due by 5:00pm local time of applicant organization on June 5, 2021. [Read more information](#).

**NIH: Research Project Grant (Parent R01 Basic Experimental Studies with Humans Required)**

**PA-20-184**

**Application Submission Deadline: June 5, 2021**

The NIH Research Project Grant supports a discrete, specified, circumscribed project in areas representing the specific interests and competencies of the investigator(s). This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in [NOT-OD-18-212](#) as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Applications are due by 5pm local time of applicant organization on June 5, 2021. [Read more information](#).

**NIH: Mentored Research Scientist Development Award (Parent K01 Independent Basic Experimental Studies with Humans Required)**

**PA-20-191**

**Application Submission Deadline: June 12, 2021**

The purpose of the NIH Mentored Research Scientist Development Award (K01) is to provide support and "protected time" (three to five years) for an intensive, supervised career development experience in the bio medical, behavioral, or clinical sciences leading to research independence. Although all of the participating NIH Institutes and Centers (ICs) use this support mechanism to support career development experiences that lead to research independence, some ICs use the K01 award for individuals who propose to train in a new field or for individuals who have had a hiatus in their research career because of illness or pressing family circumstances. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in [NOT-OD-18-212](#) as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIH: Pathway to Independence Award (Parent K99/R00 Independent Basic Experimental Studies with Humans Required)**

**PA-20-189**

**Application Submission Deadline: June 12, 2021**

The purpose of the NIH Pathway to Independence Award (K99/R00) program is to facilitate a timely transition of outstanding postdoctoral researchers with a research and/or clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIH research support during this transition in order to help awardees to launch competitive, independent research careers. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in [NOT-OD-18-212](#) as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate

independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 12, 2021. [Read more information](#).

**NIH: Exploratory/Developmental Research Grant Program (Parent R21 Basic Experimental Studies with Humans Required)  
PA-20-196**

**Application Submission Deadline: June 16, 2021**

The NIH Exploratory/Developmental Grant supports exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of biomedical, behavioral, or clinical research. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in [NOT-OD-18-212](#) as "prospective basic science studies involving human participants." These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#).

**NIH: Developmental AIDS Research Centers on Mental Health and HIV/AIDS (P30 Clinical Trial Optional)  
PAR-20-307; PAR-20-308**

**Application Submission Deadline: August 25, 2021**

The National Institute of Mental Health (NIMH) Division of AIDS Research (DAR) encourages applications for Center Core grants (P30) to support Developmental HIV/AIDS Research Centers (D-ARC). The D-ARC is intended to provide infrastructure support that facilitates the development of high impact science in HIV/AIDS and mental health that is relevant to the NIMH mission. This Funding Opportunity Announcement (FOA) intends to support innovative, interdisciplinary research in several areas, including basic, NeuroHIV, behavioral and social, integrated biobehavioral, applied, clinical, translational, and implementation science. All applications are due by 5:00 PM local time of applicant organization on August 25, 2021. Read more information: [PAR-20-307](#), [PAR-20-308](#)

**NSF: Human Networks and Data Science (HNDS)  
NSF 21-514**

**Application Submission Deadline: First Thursday in February, Annually**

The Human Networks and Data Science program (HNDS) supports research that enhances understanding of human behavior and how humans interact with and are influenced by their environments by leveraging data science and network science research across a broad range of topics. HNDS research will identify ways in which dynamic, distributed, and heterogeneous data can provide novel answers to fundamental questions about individual and group behavior. HNDS is especially interested in proposals that provide data-rich insights about human networks to support improved health, prosperity, and security. The HNDS program offers two tracks: one for infrastructure projects and one for core research activities. Infrastructure projects (HNDS-I) will develop user-friendly large-scale next-generation data resources and relevant analytic techniques to advance fundamental research in SBE areas of study. Core research projects (HNDS-R) will address theoretically motivated questions about the nature, causes, and/or consequences of human behavior (broadly defined) that occurs within the multidimensional contexts defined by the networks that determine the human experience, from the biological networks in the human body to the sociocultural, economic and geospatial networks that comprise human societies. All applications are due by 5:00 PM local time of applicant organization on the first Thursday in February, annually. [Read more information](#).

***BRAIN FUNCTION AND DEVELOPMENT; NEUROBIOLOGY***

**NIDA: Imaging - Science Track Award for Research Transition (I/START) (R03 Clinical Trial Optional)  
PAR-18-918**

**Application Submission Deadline: June 16, 2021**

This funding opportunity announcement (FOA) encourages Small Research Grant (R03) applications to facilitate the entry of investigators to the area of neuroimaging, including both new investigators and established investigators seeking to adopt neuroimaging methodologies in their research programs, to enable the conduct of small "proof of concept" studies. The R03 is intended to support research projects that can be carried out in a short period of time with limited resources. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#).

**NIH: BRAIN Initiative: Integration and Analysis of BRAIN Initiative Data (R01 Clinical Trial Not Allowed)  
RFA-MH-19-147**

**Application Submission Deadline: March 4, 2021**

This Funding Opportunity Announcement (FOA) solicits applications to develop informatics tools for analyzing, visualizing, and integrating data related to the [BRAIN Initiative](#) or to enhance our understanding of the brain. Letters of intent are due 30 days prior to the application deadline. Applications are due by 5pm local time of applicant organization on March 4, 2021. [Read more information](#).

**NIH: BRAIN Initiative Cell Census Network (BICCN) Scalable Technologies and Tools for Brain Cell Census (R01 Clinical Trial Not Allowed)**

**RFA-MH-21-140**

**Application Submission Deadline: March 10, 2021**

This Funding Opportunity Announcement (FOA) intends to accelerate the use of scalable technologies and tools to enhance brain cell census research, including the development of technology platforms and/or resources and the generation of spatiotemporal cell census data and/or resources. Applications are expected to address limitations and gaps of existing technologies/tools as a benchmark against which the improvements or competitive advantages of the proposed ones will be measured. The improvements include throughput, sensitivity, selectivity, scalability, spatiotemporal resolution and reproducibility in cell atlas analyses. The projects funded under this FOA will align with the overarching goals of the BRAIN Initiative Cell Census Network (BICCN) and are expected to enable the generation of a large amount of cell census data using the proposed technologies or via collaboration with the BICCN. Applications are due by 5:00 PM local time of applicant organization on March 10, 2021. [Read more information](#).

**NIH: HEAL Initiative: HEALthy Brain and Child Development Study (U01 - Clinical Trial Not Allowed)**

**RFA-DA-21-021**

**Application Submission Deadline: March 31, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to seek applications for unlinked Research Project Sites for the HEALthy Brain and Child Development (HBCD) Study using the cooperative agreement award mechanism. This FOA runs in parallel with companion FOAs that seek applications for linked Research Project Sites (RFA-DA-21-020), a single Consortium Administrative Core (RFA-DA-21-022) and a single Data Coordinating Center (RFA-DA-21-023). It is expected that investigators, upon funding, will work jointly with NIH scientific staff to assist, guide, coordinate, or participate in project activities. This FOA seeks applications to create a consortium of research sites in service of the nationwide, multi-site, multi-modal, longitudinal cohort HBCD Study to prospectively examine brain and behavioral development from birth through childhood, including an emphasis on understanding the impact of in utero substance exposure on outcomes. Research sites will enroll pregnant women and collect data from them and their children using methodologies that include neuroimaging, neurophysiology, behavioral and cognitive assessments and collection of biospecimens. Applications are due by 5:00 PM local time of applicant organization on March 31, 2021. [Read more information](#).

**NIH: HEAL Initiative: HEALthy Brain and Child Development Study (Collaborative U01- Clinical Trial Not Allowed)  
RFA-DA-21-020**

**Application Submission Deadline: March 31, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to seek applications for linked Research Project Sites for the HEALthy Brain and Child Development (HBCD) Study using the cooperative agreement award mechanism. This FOA runs in parallel with companion FOAs that seek applications for single, unlinked Research Project Sites (RFA-DA-21-021), a single Consortium Administrative Core (RFA-DA-21-022) and a single Data Coordinating Center (RFA-DA-21-023). It is expected that investigators, upon funding, will work jointly with NIH scientific staff to assist, guide, coordinate, or participate in project activities. This FOA seeks applications to create a consortium of research sites in service of the nationwide, multi-site, multi-modal, longitudinal cohort HBCD Study to prospectively examine brain and behavioral development from birth through childhood, including an emphasis on understanding the impact of in utero substance exposure on outcomes. Research sites will enroll pregnant women and collect data from them and their children using methodologies that include neuroimaging, neurophysiology, behavioral and cognitive assessments and collection of biospecimens. Applications are due by 5:00 PM local time of applicant organization on March 31, 2021. [Read more information](#).

**NEW NIH: BRAIN Initiative: New Concepts and Early-Stage Research for Recording and Modulation in the Nervous System (R21) (Clinical Trial Not Allowed)**

**RFA-EY-21-001**

**Application Submission Deadline: May 3, 2021**

This FOA seeks applications for unique and innovative recording and/or modulation technologies that are in the earliest stage of development, including new and untested ideas that are in the initial stages of conceptualization. Some projects

may aim to increase recording or modulation capabilities by many orders of magnitude, while others may aim to improve the precision and selectivity of recording or modulation (also referred to as stimulation, perturbation, or manipulation). A wide range of modalities are appropriate including acoustic, chemical, electrical, magnetic, optical and chemical, as well as the use of genetic tools. Invasive or non-invasive approaches are sought that will enable large-scale recording and/or precise manipulation of neural activity, and that would ultimately be compatible with experiments in humans or behaving animals. Applications are encouraged from any qualified individuals, including physicists, engineers, theoreticians, and scientists, especially those not typically involved with neuroscience research. Applications are due by 5pm local time of applicant organization on May 3, 2021. [Read more information.](#)

**NIH: Jointly Sponsored Ruth L. Kirschstein National Research Service Award Institutional Predoctoral Training Program in the Neurosciences (T32 Clinical Trial Not Allowed)**

**PAR-20-076**

**Application Submission Deadline: May 25, 2021**

The Jointly Sponsored NIH Predoctoral Training Program in the Neurosciences (JSPTPN) is an institutional program that supports broad and fundamental research training in the neurosciences. In addition to a broad education in the neurosciences, a key component will be a curriculum that provides a strong foundation in experimental design, statistical methodology and quantitative reasoning. JSPTPN programs are intended to be 2 years in duration and students may only be appointed to this training grant during the first 2 years of their graduate research training. The primary objective is to prepare students to be outstanding scientists equipped to pursue careers in neuroscience. Letters of intent are due 30 days prior to the application due date. Applications are due by 5pm local time of applicant organization on May 25, 2021. [Read more information.](#)

**NIH: Integrative Neuroscience Initiative on Alcoholism (INIA) Consortia (U01 Clinical Trial Optional) (U24 Clinical Trial Optional)**

**RFA-AA-20-013; RFA-AA-20-012**

**Application Submission Deadline: May 26, 2021**

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) seeks to continue the Integrative Neuroscience Initiative on Alcoholism (INIA), a translational, multidisciplinary, collaborative research effort studying brain mechanisms of excessive alcohol drinking associated with alcohol use disorder (AUD). The research focus includes mechanisms behind changes in the brain that result from excessive alcohol use and are associated with the development of AUD, brain changes that result in excessive use that is then correlated with AUD, and also the relationship between excessive drinking, stress, and anxiety. The primary goal of INIA is to identify brain adaptations at multiple levels of analysis that result in excessive alcohol consumption. Each consortium supported under this initiative will integrate analysis at the molecular, cellular, extracellular, synaptic, physiological and behavioral level. INIA has also helped to define factors that contribute to an individual's risk for the development of AUD and has identified novel targets for therapeutic intervention including medications. The linked set of FOAs will support two consortia each comprised of an administrative core, multiple component projects (this FOA) and relevant scientific resource cores as needed. Applications are due by 5:00 PM local time of applicant organization on May 26, 2021. Read more information: [U01](#), [U24](#)

**NIH: BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00 Independent Clinical Trial Not Allowed) (K99/R00 Independent Clinical Trial Required)**

**RFA-NS-19-043; RFA-NS-19-044**

**Application Submission Deadline: June 9, 2021**

The purpose of the NIH BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to enhance workforce diversity in the neuroscience workforce and maintain a strong cohort of new and talented, NIH-supported, independent investigators from diverse backgrounds in [BRAIN Initiative research areas](#). This program is designed to facilitate a timely transition of outstanding postdoctoral researchers with a research and/or clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIH research support during this transition in order to help award ees to launch competitive, independent research careers. Applications are due by June 10, 2021. [RFA-NS-19-043](#); [RFA-NS-19-044](#).

**NIH: NINDS Ruth L. Kirschstein National Research Service Award (NRSA) for Training of Postdoctoral Fellows (F32 Clinical Trial Not Allowed)**

**PAR-21-032**

**Application Submission Deadline: June 9, 2021**

The purpose of this award is to support outstanding scientific training of highly promising postdoctoral candidates with outstanding mentors. Candidates are eligible to apply for support from this program from ~12 months prior to the start of the proposed postdoctoral position to within 12 months after starting in the proposed postdoctoral position. This National Institute of Neurological Disorders and Stroke (NINDS) F32 seeks to foster early, goal-directed planning and to encourage

applications for bold and/or innovative projects by the candidate that have the potential for significant impact. Inclusion of preliminary data is strongly discouraged; rather, this F32 seeks innovative research ideas and thoughtful plans for training and mentorship that will facilitate the development of the postdoctoral fellow into an outstanding scientist. Applications are expected to incorporate strong training in quantitative reasoning and the quantitative principles of experimental design and analysis. Support by this program is limited to the first 4 years of a candidate's activity in a specific laboratory or research environment, so as to further encourage early, thoughtful planning and timely completion of "mentored training" within a particular lab or environment. Applications are due by 5:00 PM local time of applicant organization on June 9, 2021. [Read more information.](#)

**NIH: Discovery of Cell-based Chemical Probes for Novel Brain Targets (R21 Clinical Trial Not Allowed)  
PAR-21-028**

**Application Submission Deadline: June 16, 2021**

This Funding Opportunity Announcement (FOA) intends to support investigators who have interest and capability to join efforts for the discovery of cell-based chemical probes for novel brain targets. It is expected that applicants will have in hand the starting compounds (validated hits) for chemical optimization and bioassays for testing new analog compounds. Through this FOA, NIH wishes to stimulate research in: 1) discovery and development of novel, small molecules for their potential use in understanding biological processes relevant to the missions of NIMH, NIA, NICHD, and/or NIDCD; and 2) discovery and/or validation of novel, biological targets that will inform studies of brain disease mechanisms. Emphasis will be placed on projects that provide new insight into important disease-related biological targets and biological processes. The main emphasis of projects submitted under this FOA should be in the discovery of cell-based chemical probes. All applications are due by 5:00 PM local time of applicant organization on June 16, 2021. [Read more information.](#)

**NIH: BRAIN Initiative: Research Resource Grants for Technology Integration and Dissemination (U24 Clinical Trial Not Allowed)**

**RFA-NS-19-006**

**Application Submission Deadline: June 27, 2021**

This funding opportunity announcement (FOA) supports efforts to disseminate resources and to integrate them into neuroscience research practice. Projects should be highly relevant to specific goals of the BRAIN Initiative, goals that are described in the planning document "[BRAIN 2025: A Scientific Vision](#)." They should engage in one or more of the following activities: distribution of tools and reagents; user training on the usage of new technologies or techniques; providing access to existing technology platforms and specialized facilities; minor improvements to increase the scale/efficiency of resource production and delivery; minor adaptations to meet the needs of a user community. Applications strictly focused on technology or software development, rather than dissemination of an existing resource, are not responsive to this FOA. Refinements to microscopes or tools necessary to customize them to the experimental needs of the end users is allowed. Projects should address compelling needs of neuroscience researchers working toward the goals of the BRAIN 2025 report that are otherwise unavailable or impractical in their current form. Letters of intent are due 30 days prior to the application due date. Complete applications are due by June 27, 2021. [Read more information.](#)

**NIH: BRAIN Initiative Fellows: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (F32)**

**RFA-MH-20-620**

**Application Submission Deadline: August 10, 2021**

The purpose of the The Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative Fellows (F32) program is to enhance the research training of promising postdoctorates, early in their postdoctoral training period, who have the potential to become productive investigators in research areas that will advance the goals of the BRAIN Initiative. Applications are encouraged in any research area that is aligned with the BRAIN Initiative, including neuroethics. Applicants are expected to propose research training in an area that clearly complements their predoctoral research. Formal training in analytical tools appropriate for the proposed research is expected to be an integral component of the research training plan. In order to maximize the training potential of the F32 award, this program encourages applications from individuals who have not yet completed their terminal doctoral degree and who expect to do so within 12 months of the application due date. On the application due date, candidates may not have completed more than 12 months of postdoctoral training. Applications are due by 5:00 PM local time of applicant organization on August 10, 2021. [Read more information.](#)

**NIH: BRAIN Initiative: Development of Next Generation Human Brain Imaging Tools and Technologies (U01 Clinical Trial Not Allowed)**

**RFA-EB-19-002**

**Application Submission Deadline: September 3, 2021**

This funding opportunity announcement (FOA), in support of the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative, aims to support full development of entirely new or next generation noninvasive human brain imaging tools and methods that will lead to transformative advances in our understanding of the human brain. The FOA seeks innovative applications that are ready for full-scale development of breakthrough technologies with the intention of delivering working tools. This FOA represents the second stage of the tool/technology development effort that started with [RFA-MH-14-217](#) and [RFA-MH-15-200](#). Letters of intent are due 30 days prior to the application due date. Applications are due by 5pm local time of applicant organization on [September 3, 2021](#). [Read more information](#).

**NIH: BRAIN Initiative: Proof of Concept Development of Early Stage Next Generation Human Brain Imaging (R01 Clinical Trial Not Allowed)**

**RFA-EB-20-001**

**Application Submission Deadline: September 3, 2021**

This funding opportunity announcement (FOA), in support of the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative, aims to support early stage development of entirely new noninvasive imaging methods or unusually bold approaches for existing noninvasive imaging methods that will lead to transformative advances in our understanding of the function and connectivity of the human brain. The FOA solicits small-scale projects to prove exceptionally innovative, original and/or unconventional concepts. Applications are due by [September 3, 2021](#). [Read more information](#).

**NEW NIH: NIH Blueprint for Neuroscience Research: Tools and Technologies to Explore Nervous System Biomolecular Condensates (R21 Clinical Trial Not Allowed)**

**RFA-DA-22-008**

**Application Submission Deadline: September 15, 2021**

The NIH Blueprint for Neuroscience Research is a collaborative framework through which 14 NIH Institutes, Centers and Offices jointly support neuroscience related research, with the aim of accelerating discoveries and reducing the burden of nervous system disorders (for further information, see <http://neuroscienceblueprint.nih.gov/>). The purpose of this FOA is to support the development of innovative tools and/or technologies to monitor or manipulate biomolecular condensates (BMCs) in vivo and enable investigators to adopt these tools to answer outstanding questions in basic neuroscience. This research will transform our understanding of the mechanistic role of BMCs in human nervous system health and disease and may serve as the foundation for the development of novel BMC-based therapeutics. Applications are due by 5pm local time of applicant organization on [September 15, 2021](#). [Read more information](#).

**NIH: NIGMS Postdoctoral Research Associate Training (PRAT) Program (Fi2)**

**PAR-19-286**

**Application Submission Deadline October 4, 2021**

The NIGMS Postdoctoral Research Associate Training (PRAT) Program's overarching goal is to provide high quality postdoctoral research training in the basic biomedical sciences to a diverse group of postdoctoral fellows in NIH Intramural research laboratories, and to prepare them for leadership positions in biomedical careers. Research projects proposed should focus on areas within the NIGMS mission, which include but are not limited to biological chemistry, biophysics, bioinformatics, cellular and molecular biology, computational biosciences, developmental biology, genetics, immunology, neuroscience, pharmacology, physiology, and technology development. In addition to the laboratory experience, the PRAT program provides a structured training environment with extensive career and professional development, mentoring, and networking opportunities planned and supported by the program. Applications are due by 5pm local time of applicant organization on [October 4, 2021](#). [Read more information](#).

**NIH: BRAIN Initiative: Pilot resources for brain cell type-specific access and manipulation across vertebrate species (U01 Clinical Trial Not Allowed)**

**RFA-MH-20-556**

**Application Submission Deadline: October 19, 2021**

This Funding Opportunity Announcement (FOA) from the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative is intended to support the development of technologies, production efforts, and dissemination resources for a cell type-specific armamentarium to study brain function across species. The goal is to promote evaluation of molecular or genetic technologies and creation of pilot production and distribution resources for cell type-specific access and manipulation reagents for several vertebrate species, including in human ex vivo tissues or cells. Demonstration projects are sought that would develop reagents that: (1) enable access to molecularly defined neural cell types in a complex brain region or significant brain network of a vertebrate; (2) are easily produced, disseminated, utilized, and stored; and (3) are catalogued for users in a brain atlas. In addition to the above required features, reagents are also sought that exhibit the following qualities: (4) are applicable to both genetically tractable and less tractable vertebrate organisms; (5) exhibit high specificity and efficiency of targeting; (6) show low toxic or perturbative effects; (7) provide flexibility to deliver various reporter, sensor, and effector payloads and are compatible

with other methods of access to brain cell types; and (8) are potentially usable in human ex vivo brain tissue or cells. The pilot projects should be scalable in the future. The long-term goal of a potentially scaled-up effort is to achieve near comprehensive, molecular access for monitoring and manipulation reagents in each defined cell type of vertebrate brains relevant to neuroscience research. All applications are due by 5:00 PM local time of applicant organization on October 19, 2021. [Read more information.](#)

**NIH: BRAIN Initiative: Research Opportunities Using Invasive Neural Recording and Stimulating Technologies in the Human Brain (U01 Clinical Trial Required)**

**RFA-NS-19-001**

**Application Submission Deadline: October 29, 2021**

Invasive surgical procedures provide the unique ability to record and stimulate neurons within precisely localized brain structures in humans. Human studies using invasive technology are often constrained by a limited number of patients and resources available to implement complex experimental protocols and are rarely aggregated in a manner that addresses research questions with appropriate statistical power. Therefore, this RFA seeks applications to assemble diverse, integrated, multi-disciplinary teams that cross boundaries of interdisciplinary collaboration to overcome these fundamental barriers and to investigate high-impact questions in human neuroscience. Projects should maximize opportunities to conduct innovative in vivo neuroscience research made available by direct access to brain recording and stimulating from invasive surgical procedures. Projects should employ approaches guided by specified theoretical constructs and quantitative, mechanistic models where appropriate. Letter of Intent due 30 days before application deadline. Applications are due by 5pm local time of applicant organization on October 29, 2021. [Read more information.](#)

**NIH: BRAIN Initiative: Team-Research BRAIN Circuit Programs – TeamBCP (U19 Clinical Trial Required) (U19 Clinical Trial Not Allowed)**

**RFA-NS-19-002; RFA-NS-19-003**

**Application Submission Deadline: October 29, 2021**

This RFA will support integrated, interdisciplinary research teams from prior BRAIN technology and/or integrated approaches teams, and/or new projects from the research community that focus on examining circuit functions related to behavior, using advanced and innovative technologies. The goal will be to support programs with a team science approach that can realize meaningful outcomes within 5-plus years. Awards will be made for 5 years, with a possibility of one renewal. Projects will incorporate overarching principles of circuit function in the context of specific neural systems underlying sensation, perception, emotion, motivation, cognition, decision-making, motor control, communication, or homeostasis. Programs should employ multi-component teams of research expertise – including neurobiologists, statisticians, physicists, mathematicians, engineers, computer scientists, and data scientists, as appropriate - that seek to cross boundaries of interdisciplinary collaboration. Applications are due by 5pm local time of applicant organization on October 29, 2021. Read more information: [RFA-NS-19-002](#); [RFA-NS-19-003](#).

**NIMH: Neuromodulation/Neurostimulation Device Development for Mental Health Applications (R21 Clinical Trial Optional) (R01 Clinical Trial Optional)**

**PAR-18-941; PAR-18-942**

**Application Submission Deadline: June 5, 2021 (R01), June 16, 2021 (R21)**

The purpose of this funding opportunity announcement (FOA) is to encourage applications seeking to develop the next generation of brain stimulation devices for treating mental health disorders. Applications are sought that will either 1) develop novel brain stimulation devices or 2) significantly enhance, by means of hardware/software improvements, the effectiveness of brain stimulation devices that are currently U.S. Food and Drug Administration (FDA)-approved or cleared. Novel devices should move beyond existing electrical/magnetic stimulation and develop new stimulation techniques capable of increased spatiotemporal precision as well as multi-focal, closed-loop approaches. Applications seeking to develop new capabilities should focus on significant enhancement of the spatial resolution, depth of delivery, and/or precision of the device. Incremental changes to existing devices (e.g., software updates) are not within the scope of this announcement. Applications should be submitted by multi-disciplinary teams with diverse expertise including systems neuroscience, engineering, clinical, and regulatory affairs. Applications to this FOA may propose hypothesis-driven research, but should propose design-directed, developmental, or discovery-driven technology research using integrative approaches. Complete applications are due by 5pm local time of applicant organization on June 5, 2021 for [R01](#) and by June 16, 2021 for [R21](#).

**COGNITIVE DEVELOPMENT AND LEARNING SCIENCES**

**NIH: Accelerating the Pace of Child Health Research Using Existing Data from the Adolescent Brain Cognitive Development (ABCD) Study (R01-Clinical Trial Not Allowed) (R21-Clinical Trial Not Allowed)**

**PAR-19-162; PAR-19-163**

**Application Submission Deadline: June 5, 2021 (R01), June 16, 2021 (R21)**

The Adolescent Brain Cognitive Development (ABCD) Study is collecting data on health and mental health, cognitive function, substance use, cultural and environmental factors, and brain structure and function from youth starting when they are 9-10 years-old and following them longitudinally to early adulthood. These data will be made available to the scientific community through the NIMH Data Archive. The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications proposing the analysis of this public use dataset to increase knowledge of adolescent health and development. More information about the ABCD Study may be found on the [ABCD Study web page](#). Applications are due by 5pm local time of applicant organization on June 5, 2021 for R01 and June 16, 2021 for R21. Read more information: [R01](#), [R21](#).

**NSF: Build and Broaden 2.0 (B2 2.0) - Enhancing Social, Behavioral and Economic Science Research and Capacity at Minority-Serving Institutions  
NSF 21-542****Application Submission Deadline: March 5, 2021**

Build and Broaden 2.0 (B2 2.0) encourages research collaborations between scholars at minority-serving institutions (MSIs) and scholars in other institutions or organizations. Growing the science, technology, engineering, and mathematics (STEM) workforce is a national priority. National forecasts of the impending shortage of science and engineering skills and essential research workforce underscore a need to expand opportunities to participate in STEM research. Proposals are invited from single Principal Investigators based at MSIs and from multiple co-investigators from a group of MSIs. Principal Investigators who are not affiliated with MSIs may submit proposals, but must collaborate with PIs, co-PIs, or Senior Personnel from MSIs and describe how their project will foster research partnerships or capacity-building with at least one MSI as a primary goal of the proposed work. Proposals may address any of the scientific areas supported by SBE. These areas include anthropology, archaeology, cognitive neuroscience, decision science, ecological research, economics, geography, linguistics, law and science, organizational behavior, political science, public policy, security and preparedness, psychology, and sociology. All applications are due by 5:00 PM local time of applicant organization on March 5, 2021. [Read more information](#).

**NSF: Developmental and Learning Sciences****Application Submission Deadline: January 15 and July 15 annually**

The National Science Foundation's Developmental and Learning Sciences program (DLS) supports fundamental research that increases our understanding of cognitive, linguistic, social, cultural, and biological processes related to children's and adolescents' development and learning. Research supported by this program will add to our basic knowledge of how people learn and the underlying developmental processes that support learning, with the objective of leading to better educated children and adolescents who grow up to take productive roles as workers and as citizens. Among the many research topics supported by DLS are: developmental cognitive neuroscience; development of higher-order cognitive processes; transfer of knowledge from one domain or situation to another; use of molecular genetics to study continuities and discontinuities in development; development of peer relations and family interactions; multiple influences on development, including the impact of family, school, community, social institutions, and the media; adolescents' preparation for entry into the workforce; cross-cultural research on development and learning; and the role of cultural influences and demographic characteristics on development. Additional priorities include research that: incorporates multidisciplinary, multi-method, microgenetic, and longitudinal approaches; develops new methods, models, and theories for studying learning and development; and integrates different processes (e.g., learning, memory, emotion), levels of analysis (e.g., behavioral, social, neural), and time scales (e.g. infancy, middle childhood, adolescence). This program supports Integrative Research Activities for Developmental Science (IRADS). The program currently is at its capacity for supporting such large-scale awards, and is therefore not considering new IRADS proposals at this point in time. The program is accepting proposals for individual investigator projects (average total budget of approximately \$100,000 per year) and workshops/ small conferences (average total one-time budget of approximately \$15,000). [Read more information](#).

**COVID-19****New ED: Office of Postsecondary Education (OPE): Higher Education Emergency Relief Fund (HEERF)  
Proprietary Institution Grant Funds for Students Assistance Listing Number 84.425Q  
ED-GRANTS-011521-005****Application Submission Deadline: April 15, 2021**

With this notice, the Secretary is announcing that proprietary institutions of higher education as defined in section 102(b) of the Higher Education Act of 1965, as amended, 20 USC 1002(b), may apply for HEERF grant funds under the new CRRSAA section 314(a)(4) program, Proprietary Institution Grant Funds for Students (CFDA 84.425Q). The estimated available funds for this program is approximately \$680 million. Allocations for eligible proprietary institutions of higher

education will be calculated on the basis of the formula in section 314(a)(1)(A) through (F). Under section 314(d)(7), awards from the Proprietary Institution Grant Funds for Students program may only be used to provide financial aid grants to students (including students exclusively enrolled in distance education), which may be used for any component of the student's cost of attendance or for emergency costs that arise due to coronavirus, such as tuition, food, housing, health care (including mental health care), or child care. In making such financial aid grants to students, grantees must prioritize grants to students with exceptional need, such as students who receive Pell Grants. Applications are due by [April 15, 2021](#). [Read more information.](#)

**RFA-AA-21-002; RFA-AA-21-003; RFA-AA-21-004**  
**Application Submission Deadline: April 14, 2021**

This Funding Opportunity Announcement (FOA) will support research grants to address urgent, time-sensitive research questions on the relationships between alcohol consumption and COVID-19 related outcomes and consequences. The principal area of focus is research that can improve public health in the near term by informing responses to the current COVID-19 pandemic, in view of 1) the impact of alcohol misuse on incidence and severity of COVID-19 disease or 2) the effect of the COVID-19 disease and pandemic-induced restrictions on alcohol use and alcohol use disorder (AUD). Time-sensitive applications for which standard NIH review and funding timelines would compromise either the ability to conduct the research or the value of the knowledge and with the potential to inform responses to the current pandemic will be considered. Applications to RFA-AA-21-002 should be accomplished within a three year project duration. The RFA-AA-21-003 FOA uses the R03 mechanism, which is intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application. The RFA-AA-21-004 FOA uses the R21 grant mechanism, which is intended to support investigation of novel scientific ideas or new model systems, tools, or technologies that have the potential for significant impact on biomedical or biobehavioral research. Read more information: [RFA-AA-21-002](#); [RFA-AA-21-003](#); [RFA-AA-21-004](#).

**NIDA: Notice of Special Interest regarding the Availability of Administrative Supplements and Urgent Competitive Revisions for Research on the 2019 Novel Coronavirus**  
**NOT-DA-20-047**

**Application Submission Deadline: Applications Accepted on Rolling Basis until March 31, 2021**

The National Institute on Drug Abuse (NIDA) is issuing this Notice of Special Interest (NOSI) to highlight the urgent need for research on the 2019 Novel Coronavirus (2019-nCoV, also known as COVID-19). NIDA is especially interested in research collecting and examining data on the risks and outcomes for COVID-19 infection in individuals suffering from substance use disorders. As people across the U.S. and the rest of the world prepare for what could be a pandemic of the 2019 novel coronavirus, or COVID-19, the research community should be alert to the possibility that it could affect some populations with substance use disorders or HIV particularly hard. Among the research priority areas, NIDA is encouraging research using ongoing studies to understand the broad impacts of COVID-19 (e.g., school closures, food insecurity, anxiety, social isolation, family loss) on neurodevelopment, substance use, substance use disorders, and access to addiction treatment. Applications will be accepted on a rolling basis until [March 31, 2021](#). [Read more information.](#)

**NIH: Digital Healthcare Interventions to Address the Secondary Health Effects Related to Social, Behavioral, and Economic Impact of COVID-19 (R01 - Clinical Trial Optional)**  
**PAR-20-243**

**Application Submission Deadline: March 2, 2021**

This Funding Opportunity Announcement (FOA) aims to support research to strengthen the healthcare response to Coronavirus Disease 2019 (COVID-19) caused by the Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) and future public health emergencies, including pandemics. While research related to the direct clinical effects of COVID-19 are supported by other funding opportunities, the purpose of this funding opportunity is to focus on the role and impact of digital health interventions [e.g., mobile health (mhealth), telemedicine and telehealth, health information technology (IT), and wearable devices] to address access, reach, delivery, effectiveness, scalability and sustainability of health assessments and interventions for secondary effects (e.g., behavioral health or self-management of chronic conditions) that are utilized during and following the pandemic, particularly in populations who experience health disparities and vulnerable populations. Applications are due by [March 2, 2021](#). [Read more information.](#)

**NIH: Notice of Special Interest regarding the Availability of Administrative Supplements and Urgent Competitive Revisions for Research on the 2019 Novel Coronavirus and the Behavioral and Social Sciences**  
**NOT-OD-20-097**

**Application Submission Deadline: March 31, 2021**

This Notice of Special Interest (NOSI) highlights the urgent need for social, behavioral, economic, health communication, and epidemiologic research relevant to the 2019 Novel Coronavirus (SARS-CoV-2) and COVID-19. This NOSI encourages urgent competitive supplements and administrative supplements to existing longitudinal studies that address key social and behavioral questions related to the COVID-19 pandemic, including adherence to and transmission mitigation from various containment and mitigation efforts; social, behavioral, and economic impacts from these containment and mitigation efforts; and downstream health impacts resulting from these social, behavioral, and economic impacts, including differences in risk and resiliency based on gender, race and ethnicity, socioeconomic status, and other social determinants of health. NICHD has particular interest in COVID-19-related research on vulnerable populations falling within the NICHD scientific mission area, including pregnant and post-partum women, infants, children, and adolescents; individuals with physical and/or intellectual disabilities; and children who are homeless or in foster care. Applications will be accepted on a rolling basis through 5:00 PM local time of the applicant organization on March 31, 2021. [Read more information](#).

**NIMH: Notice of Special Interest regarding the Availability of Administrative Supplements and Urgent Competitive Revisions for Mental Health Research on the 2019 Novel Coronavirus**  
**NOT-MH-20-047**

**Application Submission Deadline: Applications Accepted on Rolling Basis until April 15, 2021**

NIMH is issuing this Notice of Special Interest (NOSI) to highlight interest in research to strengthen the mental health response to Coronavirus Disease 2019 (COVID-19) caused by the Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) and to future public health emergencies, including pandemics. NIMH is especially interested in research to provide an evidence base for how a disrupted workforce may adequately respond/adapt to and maintain services or provide additional care for new or increasing mental health needs, as well as to learn about the effects of the virus and public health measures to prevent spread of COVID-19 that may have an impact on mental health. Research addressing the intersection of COVID-19, mental health, and HIV treatment and prevention are also of interest to NIMH. Applications will be accepted on a rolling basis through April 15, 2021. [Read more information](#).

**NIMHD: Notice of Special Interest (NOSI): Competitive and Administrative Supplements for the Impact of COVID-19 Outbreak on Minority Health and Health Disparities**  
**NOT-MD-20-019**

**Application Submission Deadline: Applications Accepted on Rolling Basis until May 1, 2021**

The National Institute on Minority Health and Health Disparities (NIMHD) is issuing this Notice of Special Interest (NOSI) to highlight the urgent need for research on the impact of the novel Coronavirus (SARS-CoV-2) pandemic causing COVID-19 disease outbreaks and the resulting disruptions on individual and social wellbeing, health services use, and health outcomes for NIH-designated health disparity populations. This NOSI is soliciting research in health disparity populations that seeks to understand: 1) how state and local policies and initiatives mitigate or exacerbate disparities in health services use and health outcomes; 2) the role that community-level protective and resilience factors and interventions have in mitigating the effects of the sector disruptions that the COVID-19 outbreak causes; and 3) how behavioral and/or biological mechanisms may contribute to COVID-19 manifestations. Outcomes of interest include, but are not limited to, the COVID-19 incidence, prevalence, and mortality rates in defined populations; substance abuse and mental health effects; impact on chronic conditions; effects on severe maternal morbidity and mortality; and influence on access, utilization, and quality of health care (including needed medical care, medical treatments, and access to prescription drugs). Applications will be accepted on a rolling basis through May 1, 2021. [Read more information](#).

**DATA SHARING AND TRANSLATION**

**NIAAA: Resource-Related Research Projects (R24 Clinical Trial Not Allowed)**  
**PAR-21-072**

**Application Submission Deadline: May 25, 2021**

The purpose of the Resource-Related Research Projects (R24) grant provided by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) is to support investigator-initiated resources designed to provide materials and services to support and advance biomedical research on a national basis. An R24 resource grant mechanism is a non-hypothesis-driven activity to provide data, materials, tools, or services that are essential to making timely, high quality, and cost-efficient progress in a field. Hypothesis-driven research applications should not be submitted in response to this program announcement but to another mechanism that encourages this type of research. The resource should be available to any qualified investigator, and should be highly quality controlled, and not duplicate resources available commercially or through other sources. Resources should be designed to provide services to the broad alcohol research community and should not be limited by any specific regional focus. Applications are due by 5:00 PM local time of applicant organization on May 25, 2021. [Read more information](#).

**NICHD: Archiving and Documenting Child Health and Human Development Data Sets (R03 Clinical Trial Not Allowed)**

**PAR-20-064**

**Application Submission Deadline: June 16, 2021**

The purpose of this funding opportunity announcement (FOA) is to support the archiving and documentation of existing data sets within the scientific mission of the *Eunice Kennedy Shriver* National Institute of Child Health and Human Development (NICHD) in order to enable secondary analysis of these data by the scientific community. The highest priority is to archive original data collected with NICHD funding. Letters of intent are due 30 days prior to the application due date. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#).

**New NIH: Expert-Driven Small Projects to Strengthen Gabriella Miller Kids First Discovery (R03 Clinical Trial Not Allowed)**

**RFA-RM-21-011**

**Application Submission Deadline: June 18, 2021**

The NIH Common Fund has established the Gabriella Miller Kids First Pediatric Research Program (Kids First) with the vision of alleviating suffering from childhood cancer and structural birth defects by fostering collaborative research to uncover the etiology of these diseases and supporting data sharing within the pediatric research community. Kids First has established and continues to develop a Data Resource including a large collection of curated genomic and phenotypic data from childhood cancer and structural birth defects cohorts and a central portal where these data and analysis tools are accessible to the research community. This FOA is intended to engage experts in a variety of activities that will enhance the utility of childhood cancer and/or structural birth defects genomic datasets generated by the Kids First program and/or associated phenotypic datasets and resources. These activities should strengthen future analyses of Kids First datasets by the broader researcher community with the ultimate goal of improving diagnostic capabilities and therapies for children and their families affected by these conditions. [Read more information](#).

**NIH: Ethical Issues in Translational Science Research (R01 Clinical Trial Optional)**

**RFA-TR-20-001**

**Application Submission Deadline: October 6, 2021**

The purpose of this Funding Opportunity Announcement is to support research to address ethical issues in translational science research. Collaboration between bioethicists, legal scholars, social scientists, and translational research scientists is encouraged. The focus is to develop knowledge to inform the ethical development, modification, or application of novel findings, technologies, and approaches to improve human health, including their impact on individuals, families, communities, and society. Applications are due by October 6, 2021. [Read more information](#).

**NIJ: National Juvenile Court Data Archive, Fiscal Year 2021**

**O-NIJ-2021-40001**

**Application Submission Deadline: March 17, 2021**

With this solicitation, the National Institute of Justice, NIJ, in collaboration with the Office of Juvenile Justice and Delinquency Prevention (OJJDP), seeks proposals to support the National Juvenile Court Data Archive (the Archive). The Archive collects, maintains, and makes accessible the nation's primary source of detailed information on juvenile court case processing of delinquency and status offense cases. Applications are due by March 17, 2021. [Read more information](#).

**NSF: Human Networks and Data Science (HNDS)**

**NSF 21-514**

**Application Submission Deadline: First Thursday in February, Annually**

The Human Networks and Data Science program (HNDS) supports research that enhances understanding of human behavior and how humans interact with and are influenced by their environments by leveraging data science and network science research across a broad range of topics. HNDS research will identify ways in which dynamic, distributed, and heterogeneous data can provide novel answers to fundamental questions about individual and group behavior. HNDS is especially interested in proposals that provide data-rich insights about human networks to support improved health, prosperity, and security. The HNDS program offers two tracks: one for infrastructure projects and one for core research activities. Infrastructure projects (HNDS-I) will develop user-friendly large-scale next-generation data resources and relevant analytic techniques to advance fundamental research in SBE areas of study. Core research projects (HNDS-R) will address theoretically motivated questions about the nature, causes, and/or consequences of human behavior (broadly defined) that occurs within the multidimensional contexts defined by the networks that determine the human experience, from the biological networks in the human body to the sociocultural, economic and geospatial networks that comprise human societies. All applications are due by 5:00 PM local time of applicant organization on the first Thursday in February, annually. [Read more information](#).

## **DEVELOPMENTAL DISABILITIES**

### **NEW ACL: Disability and Rehabilitation Research Projects (DRRP) Program: Americans with Disabilities Act National Network Knowledge Translation Center HHS-2021-ACL-NIDILRR-DPAD-0051**

**Application Submission Deadline: March 15, 2021**

The purpose of National Institute on Disability, Independent Living, and Rehabilitation Research's (NIDILRR) DRPs, which are funded through the Disability and Rehabilitation Research Projects and Centers Program, is to improve the effectiveness of services authorized under the Rehabilitation Act by developing methods, procedures, and rehabilitation technologies that advance a wide range of independent living and employment outcomes for individuals with disabilities, especially individuals with the most significant disabilities. Under this particular opportunity, a DRRP must conduct knowledge translation and related activities in collaboration with the Americans with Disabilities Act (ADA) National Network's grantees. Specifically, among other requirements to be described in the funding opportunity announcement, the ADA Knowledge Translation (KT) Center must coordinate and support KT activities of the ADA National Network, conduct research aimed at improving knowledge translation on the ADA, manage and maintain the Outcome Measurement System (OMS) database, and organize and support an ADA research conference. Applications are due by March 15, 2021. [Read more information.](#)

### **NEW ACL: Rehabilitation Research and Training Center (RRTC) on Employer Practices Leading to Successful Employment Outcomes Among People With Disabilities HHS-2021-ACL-NIDILRR-RTEM-0027**

**Application Submission Deadline: March 22, 2021**

The purpose of the RRTCs, which are funded through the Disability and Rehabilitation Research Projects and Centers Program, is to achieve the goals of, and improve the effectiveness of, services authorized under the Rehabilitation Act through well-designed research, training, technical assistance, and dissemination activities in important topical areas as specified by NIDILRR. These activities are designed to benefit people with disabilities, family members, rehabilitation service providers, policymakers and other research stakeholders. This particular opportunity is for RRTCs interested in generating new knowledge about effective employer practices that support successful employment outcomes among people with disabilities. Applications are due by March 22, 2021. [Read more information.](#)

### **NEW ACL: Disability and Rehabilitation Research Projects (DRRP) Program: Employment of Individuals with Disabilities (Research) HHS-2021-ACL-NIDILRR-DPEM-0052**

**Application Submission Deadline: March 29, 2021**

The purpose of NIDILRR's Disability and Rehabilitation Research Projects (DRRP) which are funded through the Disability and Rehabilitation Research Projects and Centers Program, is to plan and conduct research, demonstration projects, training, and related activities, including international activities, to develop methods, procedures, and rehabilitation technology that maximize the full inclusion and integration into society, employment, independent living, family support, and economic and social self-sufficiency of individuals with disabilities, especially individuals with the most severe disabilities, and to improve the effectiveness of services authorized under the Rehabilitation Act of 1973, as amended (Rehabilitation Act). Under this particular DRRP priority, applicants must propose a research project that is aimed at improving the employment outcomes of individuals with disabilities. In carrying out a research project under this program, a grantee must identify one or more hypotheses or research questions and, based on the hypotheses or research questions identified, perform an intensive, systematic study directed toward producing (1) new or full scientific knowledge, or (2) understanding of the subject or problem studied. Please note that this is the Funding Opportunity for field-initiated DRRP research projects in the employment domain. Applications are due by March 29, 2021. [Read more information.](#)

### **NIH: Identification and Management of Behavioral Symptoms and Mental Health Conditions in Individuals with Intellectual Disabilities (R01 - Clinical Trial Optional) PAR-18-766**

**Application Submission Deadline: June 5, 2021**

This Funding Opportunity Announcement (FOA) encourages research grant applications focusing on identification and management of behavioral symptoms and mental health conditions in individuals with intellectual disabilities (ID). Specific areas of interest for this funding opportunity are (1) applications to develop and validate assessment tools that reliably identify behavioral symptoms or diagnose mental health conditions in individuals with ID, and (2) applications studying the pharmacokinetics, safety and efficacy of specific psychotropic medications for treatment of behavioral symptoms or mental health conditions in individuals with ID. Letters of intent are due 30 days prior to the application deadline. Applications are due by 5:00pm local time of applicant organization on June 5, 2021. [Read more information.](#)

**NIH: Clinical Trials Development for Co-Occurring Conditions in Individuals with Down syndrome: Phased Awards for INCLUDE (R61/R33 Clinical Trial Required)  
RFA-OD-20-003**

**Application Submission Deadline: November 3, 2021**

This Funding Opportunity Announcement (FOA) encourages Exploratory/Developmental Phased Innovation (R61/R33) grant applications to support development of clinical trials to treat critical and co-occurring health conditions in individuals with Down syndrome. The proposed research aims should be milestone-driven. The total project period for an application submitted in response to this FOA may not exceed five years. This FOA provides support for up to two years (R61 phase) for preliminary/developmental/planning studies, followed by possible transition to clinical trial support (R33) of up to three years, although the total duration of the award may not exceed five years. This FOA requires measurable R61 milestones. Letters of intent are due 30 days prior to the application due date. Applications are due by 5pm local time of applicant organization on November 3, 2021. [Read more information](#).

**NIH: INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndrome (INCLUDE) Clinical Trial Readiness (R21 Clinical Trial Not Allowed)  
RFA-OD-20-004**

**Application Submission Deadline: November 3, 2021**

This Funding Opportunity Announcement (FOA) invites researchers to submit applications for support of clinical projects that address critical needs for clinical trial readiness in Down syndrome. This initiative seeks applications that are intended to facilitate Down syndrome research by enabling efficient and effective movement of candidate therapeutics or diagnostics towards clinical trials for Down syndrome and its co-occurring conditions, and to increase their likelihood of success through development and testing of biomarkers and clinical outcome assessment measures, development and testing of novel trial methods and recruitment strategies, or by defining the presentation and course of the co-occurring conditions in individuals with Down syndrome to enable the design of future clinical trials. Letters of intent are due 30 days prior to the application due date. Applications are due by 5pm local time of applicant organization on November 3, 2021. [Read more information](#).

**NIH: Transformative Research Award for the INCLUDE (Investigation of Co-occurring Conditions across the Lifespan to Understand Down syndrome) Project (R01 Clinical Trial Not Allowed)  
RFA-OD-20-005**

**Application Submission Deadline: November 3, 2021**

The NIH INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndrome (INCLUDE) Project is soliciting Transformative Research Award applications to support individual scientists or groups of scientists proposing groundbreaking, exceptionally innovative, original, and/or unconventional research with the potential to create new scientific paradigms, establish entirely new and improved clinical approaches, or develop transformative technologies. Applications from individuals with diverse backgrounds and in any topic relevant to Down syndrome-related research or co-occurring conditions are welcome. No preliminary data are required. Projects must clearly demonstrate, based on the strength of the logic, a compelling potential to produce a major impact in research related to Down syndrome. Letters of intent are due 30 days prior to the application due date. Applications are due by 5pm local time of applicant organization on November 3, 2021. [Read more information](#).

**NIH: Human-Animal Interaction (HAI) Research (R01 Clinical Trial Optional) (R03 Clinical Trial Optional) (R21 Clinical Trial Optional)  
PAR-20-031; PAR-20-032; PAR-20-033**

**Application Submission Deadline: November 30, 2021**

This Funding Opportunity Announcement (FOA) invites grant applications for research to examine 1) the impact of Human-Animal Interactions (HAI) on typical and atypical child development and health; 2) the evaluation of animal-assisted intervention for children and adults with disabilities or in need of rehabilitative services; 3) the effects of animals on public health, including cost effectiveness of involving animals in reducing and preventing disease. Applications are due by November 30, 2021. More information: [R01](#); [R03](#); [R21](#).

## **EDUCATION**

**NIJ: Research and Evaluation on School Safety, Fiscal Year 2021  
O-NIJ-2021-44008**

**Application Submission Deadline: March 22, 2021**

With this solicitation, the National Institute of Justice (NIJ) seeks proposals for rigorous research and evaluation projects to study the root causes of school violence to include the impact and effectiveness of grants made under the STOP School Violence Act. NIJ is particularly interested in examining understudied approaches to improve school safety. Of

most interest are anti-violence interventions and threat assessment. Applications proposing research involving partnerships with criminal justice or other agencies, should include a strong letter of support, signed by an appropriate decision-making authority from each proposed, partnering agency. A letter of support should include the partnering agency's acknowledgement that de-identified data derived from, provided to, or obtained through this project will be archived by the grant recipient with the National Archive of Criminal Justice Data (NACJD) at the conclusion of the award. Applicants and their potential partners are encouraged to review the NACJD's policies and protections at (NACJD). If selected for award, grantees will be expected to have a formal agreement in place with partnering agencies by January 1, 2022. That formal agreement must include a provision to meet the data archiving requirements of the award. In the case of partnerships that will involve the use of federal award funds by multiple partnering agencies to carry out the proposed project, only one entity/partnering agency may be the applicant (as is the case with any application submitted in response to this solicitation); any others must be proposed as subrecipients. Applications are due by March 22, 2021. [Read more information.](#)

**NSF: EHR Core Research (ECR): Building Capacity in STEM Education Research (ECR: BCSER)  
NSF 20-521**

**Application Submission Deadline: Fourth Friday in February, Annually**

ECR's Building Capacity for STEM Education Research (ECR: BCSER) solicitation supports projects that build individuals' capacity to carry out high quality STEM education research that will enhance the nation's STEM education enterprise and broaden the pool of researchers that can conduct fundamental research in STEM learning and learning environments, broadening participation in STEM fields, and STEM workforce development. Specifically, ECR: BCSER supports activities that enable early and mid-career researchers to acquire the requisite expertise and skills to conduct rigorous fundamental research in STEM education. ECR: BCSER seeks to fund research career development activities on topics that are relevant to qualitative and quantitative research methods and design, including the collection and analysis of new qualitative or quantitative data, secondary analyses using extant datasets, or meta-analyses. Applications are due by 5pm local time of submitter on the fourth Friday in February, annually. [Read more information.](#)

**NSF: Alliances for Graduate Education and the Professoriate  
16-552**

**Application Submission Deadline: Second Friday in December, Annually**

The Alliances for Graduate Education and the Professoriate (AGEP) program seeks to advance knowledge about models to improve pathways to the professoriate and success for historically underrepresented minority doctoral students, postdoctoral fellows and faculty, particularly African Americans, Hispanic Americans, American Indians, Alaska Natives, Native Hawaiians, and Native Pacific Islanders, in specific STEM disciplines and/or STEM education research fields. New and innovative models are encouraged, as are models that reproduce and/or replicate existing evidence-based alliances in significantly different disciplines, institutions, and participant cohorts. The AGEP program goal is to increase the number of historically underrepresented minority faculty, in specific STEM disciplines and STEM education research fields, by advancing knowledge about pathways to career success. The program objectives include: To support the development, implementation and study of innovative models of doctoral education, postdoctoral training, and faculty advancement for historically underrepresented minorities in specific STEM disciplines and/or STEM education research fields; and to advance knowledge about the underlying issues, policies and practices that have an impact on the participation, transitions and advancement of historically underrepresented minorities in the STEM academy. Applications are due by the second Friday in December, annually. [Read more information.](#)

## **HEALTH**

**AHRQ: Health Services Research Projects (R01)  
PA-18-795**

**Application Submission Deadline: June 5, 2021**

The Research Project Grant (R01) is an award made by the Agency for Healthcare Research and Quality (AHRQ) to an institution/organization to support a discrete, specified health services research project. The project will be performed by the named investigator and study team. The R01 research plan proposed by the applicant institution/organization must be related to the mission and priority research interests of AHRQ. The AHRQ mission is to produce evidence to make health care safer, higher quality, more accessible, equitable and affordable, and to work with HHS and other partners to make sure that the evidence is understood and used. Within the mission, AHRQ's specific priority areas of focus are: 1) Research to improve health care patient safety; 2) Design, implementation, dissemination and spread, and evaluation of interventions to improve patient safety; 3) Establishment of strategies to sustain patient safety improvements such as culture, incident/event reporting, measurement, monitoring, and surveillance. Applications are due by 5pm local time of the applicant organization on June 5, 2021. [Read more information.](#)

**NCI: Stimulating Innovations in Behavioral Intervention Research for Cancer Prevention and Control (R21 Clinical Trial Optional)**

**PAR-19-309**

**Application Submission Deadline: June 16, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to provide support for the development of innovative interventions that improve cancer-related health behaviors across diverse racial/ethnic populations. Specifically, this FOA is intended to stimulate research aimed at 1) testing new theories and conceptual frameworks; 2) developing and evaluating novel strategies to improve cancer-related health behaviors; 3) investigating multi-level and multi-behavioral approaches; and 4) utilizing innovative research designs, methodologies, and technologies. The cancer-related health behaviors to be targeted are diet, obesity, physical activity and sedentary behavior, smoking, sleep and circadian dysfunction, alcohol use, and/or adherence to cancer-related medical regimens. Research can involve several stages of the cancer continuum and any phase of the translational spectrum. Letters of intent are due 30 days prior to the application due date. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information.](#)

**NEW NICHD: Natural History of Disorders Screenable in the Newborn Period (R01 Clinical Trial Optional)**

**PAR-21-115**

**Application Submission Deadline: June 5, 2021**

This funding opportunity announcement (FOA) encourages applications that propose to develop studies that will lead to a broad understanding of the natural history of disorders that already do or could potentially benefit from early identification by newborn screening. A comprehensive understanding of the natural history of a disorder has been identified as a necessary element to facilitate appropriate interventions for infants identified by newborn screening. By defining the sequence and timing of the onset of symptoms and complications of a disorder, a valuable resource will be developed for the field. In addition, for some disorders, specific genotype-phenotype correlations may allow prediction of the clinical course, and for other disorders, identification of modifying genetic, epigenetic, or environmental factors will enhance an understanding of the clinical outcomes for an individual with such a condition. Comprehensive data on natural history will facilitate the field's ability to: 1) accurately diagnose the disorder; 2) understand the genetic and clinical heterogeneity and phenotypic expression of the disorder; 3) identify underlying mechanisms related to basic defects; 4) potentially prevent, manage, and treat symptoms and complications of the disorder; and 5) provide children and their families with needed support and predictive information about the disorder. [Read more information.](#)

**NIDA: Small Research Grant Program (R03 Clinical Trial Required)**

**PA-20-146**

**Application Submission Deadline: June 16, 2021**

The NIDA Small Research Grant Program supports small clinical trials that can be carried out in a short period of time with limited resources. This program supports different types of projects including pilot, feasibility, or small clinical trials with medications, behavioral interventions, immunotherapies, therapeutic devices, therapeutic digital applications, health services, prevention interventions, biomarkers, and development of research methodology. This Funding Opportunity Announcement requires that a clinical trial be proposed. The proposed project must be related to the programmatic interests of NIDA. Applications are due by June 16, 2021. [Read more information.](#)

**NIDCR: Improving Oral Health and Reducing Disparities in Adolescents (R01 Clinical Trial Not Allowed) (R21 Clinical Trial Not Allowed)**

**PAR-20-058; PAR-20-059**

**Application Submission Deadline: June 5, 2021 (R01); June 16, 2021 (R21)**

The purpose of this Funding Opportunity Announcement (FOA) is to stimulate research to improve the oral health of adolescents in the United States, and to reduce observed oral health disparities and inequities in this population. This FOA defines "adolescents" as those individuals between the ages of 10 and 19. Applications are due by 5pm local time of applicant organization on June 5, 2021 (R01) and June 16, 2021 (R21). Read more information: [R01](#), [R21](#).

**NIH: Digital Healthcare Interventions to Address the Secondary Health Effects Related to Social, Behavioral, and Economic Impact of COVID-19 (R01 - Clinical Trial Optional)**

**PAR-20-243**

**Application Submission Deadline: March 2, 2021**

This Funding Opportunity Announcement (FOA) aims to support research to strengthen the healthcare response to Coronavirus Disease 2019 (COVID-19) caused by the Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) and future public health emergencies, including pandemics. While research related to the direct clinical effects of COVID-19 are supported by other funding opportunities, the purpose of this funding opportunity is to focus on the role and impact of digital health interventions [e.g., mobile health (mhealth), telemedicine and telehealth, health information technology

(IT), and wearable devices] to address access, reach, delivery, effectiveness, scalability and sustainability of health assessments and interventions for secondary effects (e.g., behavioral health or self-management of chronic conditions) that are utilized during and following the pandemic, particularly in populations who experience health disparities and vulnerable populations. Applications are due by March 2, 2021. [Read more information.](#)

**NIH: International Research Scientist Development Award (IRSDA) (K01 Independent Clinical Trial Not Allowed; K01 Independent Clinical Trial Required)**

**PAR-21-104; PAR-21-105**

**Application Submission Deadline: March 9, 2021**

The purpose of the International Research Scientist Development Award (IRSDA) is to provide support and protected time (three to five years) to advanced postdoctoral U.S. research scientists and recently-appointed U.S. junior faculty (applicants must be at least two years beyond conferral of doctoral degree) for an intensive, mentored research career development experience in a low- or middle-income country (LMIC), as defined by the World Bank, including "low-income," "lower-middle-income," and "upper-middle-income" countries) leading to an independently-funded research career focused on global health. This Funding Opportunity Announcement (FOA) invites applications from postdoctoral research scientists and junior faculty from any health-related discipline who propose career development activities and a research project that is relevant to the health priorities of the LMIC under the mentorship of LMIC and U.S. mentors. Applications are due by 5:00 PM local time of applicant organization on March 9, 2021. Read more information: [PAR-21-104](#); [PAR-21-105](#)

**NIH: Social and Behavioral Intervention Research to Address Modifiable Risk Factors for Cancer in Rural Populations (R01 Clinical Trial Required)**

**RFA-CA-20-051**

**Application Submission Deadline: March 15, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to solicit applications to develop, adapt, and test individual-, community- or multilevel interventions to address modifiable risk factors for cancer in rural populations. Applications should focus on primary prevention and assess and address one or more of the social and behavioral risk factors that contribute to cancer disparities in rural populations: tobacco use; diet, physical activity and weight; alcohol use; UV exposure; and HPV vaccination. Applications should also assess and address myriad social determinants of health, cultural factors, and health care and technology access barriers that may contribute to rural cancer disparities. This FOA also encourages implementation science research, to incorporate efficacious cancer control interventions in a coordinated way, into broader, sustainable health programs that are designed to reach rural populations and allow local customization and adaptation. Applications are due by March 15, 2021. [Read more information.](#)

**new NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Clinical Trials Not Allowed)**

**PAR-21-145**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to model the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in health, illness, recovery, and overall wellbeing. This includes research on the consequences of perceived isolation (e.g., loneliness) and/or objective/observed isolation on behavioral and clinical outcomes in adolescence and adulthood. Both animal and human subjects research projects are welcome. Researchers proposing basic science experimental studies involving human participants should consider the companion FOA PAR-21-144 "Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)". [Read more information.](#)

**new NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Well-being, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)**

**PAR-19-384**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to explain the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in human health, illness, recovery, and overall well-being. Types of projects submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical and/or behavioral outcomes in humans to understand fundamental aspects of phenomena related to social connectedness and isolatedness. NIH considers such studies as "prospective basic science studies involving human participants" that meet the NIH definition of basic research and fall within the NIH definition of a clinical trials (see, e.g., NOT-OD-19-024) Types of studies that should submit under this FOA include studies that prospectively assign human

participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on March 17, 2021. [Read more information](#).

**NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)**

**NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Clinical Trials Not Allowed)**

**PAR-19-373**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) solicits research projects that seek to model the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in health, illness, recovery, and overall wellbeing. Both animal and human subjects research projects are welcome. Researchers proposing basic science experimental studies involving human participants should consider this FOA's companion for basic experimental studies with humans. Applications are due by 5pm local time of applicant organization on March 17, 2021. [Read more information](#).

**NIH: Maternal Nutrition and Pre-pregnancy Obesity: Effects on Mothers, Infants and Children (R01 Clinical Trial Optional)**

**PA-18-776**

**Application Submission Deadline: June 5, 2021**

This Funding Opportunity Announcement (FOA) encourages applications to improve health outcomes for women, infants and children, by stimulating interdisciplinary research focused on maternal nutrition and pre-pregnancy obesity. Maternal health significantly impacts not only the mother but also the intrauterine environment, and subsequently fetal development and the health of the newborn. Applications are due by June 5, 2021. [Read more information](#).

**NIH: Tobacco Control Policies to Promote Health Equity (R21 Clinical Trial Optional)**

**PAR-20-302; PAR-20-303**

**Application Submission Deadline: June 16, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to support observational or intervention research focused on reducing disparities in tobacco use and secondhand smoke (SHS) exposure in the U.S. Specifically, this FOA aims to stimulate scientific inquiry focused on innovative state and local level tobacco prevention and control policies. The long-term goal of this FOA is to reduce disparities in tobacco-related cancers, and in doing so, to promote health equity among all populations. Applicants submitting applications related to health economics are encouraged to consult NOT-OD-16-025 to ensure that the research projects align with NIH mission priorities in health economics research. Applications are due by June 16, 2021. Read more information: [PAR-20-303](#); [PAR-20-302](#).

**New NIH: Expert-Driven Small Projects to Strengthen Gabriella Miller Kids First Discovery (R03 Clinical Trial Not Allowed)**

**RFA-RM-21-011**

**Application Submission Deadline: June 18, 2021**

The NIH Common Fund has established the Gabriella Miller Kids First Pediatric Research Program (Kids First) with the vision of alleviating suffering from childhood cancer and structural birth defects by fostering collaborative research to

uncover the etiology of these diseases and supporting data sharing within the pediatric research community. Kids First has established and continues to develop a Data Resource including a large collection of curated genomic and phenotypic data from childhood cancer and structural birth defects cohorts and a central portal where these data and analysis tools are accessible to the research community. This FOA is intended to engage experts in a variety of activities that will enhance the utility of childhood cancer and/or structural birth defects genomic datasets generated by the Kids First program and/or associated phenotypic datasets and resources. These activities should strengthen future analyses of Kids First datasets by the broader researcher community with the ultimate goal of improving diagnostic capabilities and therapies for children and their families affected by these conditions. [Read more information.](#)

**NIH: Multi-Site Studies for System-Level Implementation of Substance Use Prevention and Treatment Services (R01 Clinical Trial Optional; R01 Clinical Trial Optional)**

**PAR-21-022; PAR-21-023**

**Application Submission Deadline: July 19, 2021**

As part of the Collaborative Research on Addiction at NIH (CRAN) initiative, the National Institute on Drug Abuse (NIDA), the National Institute on Alcohol Abuse and Alcoholism (NIAAA), and the National Cancer Institute (NCI) join to issue this FOA. The purpose of this FOA is to support the development and testing of implementation strategies to achieve system-level adoption of evidence-based interventions, guidelines, or practices to improve the delivery, quality, and sustainability of prevention or treatment services for substance use disorders. This FOA seeks research projects that will test implementation strategies intended to achieve system-wide integration of evidence-based practices (interventions, guidelines, or service delivery models) to prevent or treat substance use disorders (broadly defined to include alcohol, tobacco and other drugs, as well as prescription medications). Areas of interest also include implementation of guidelines related to the appropriate use of opioids for pain management in individuals with or at risk for opioid use disorder. All applications are due by 5:00 PM local time of applicant organization on July 19, 2021. Read more information: [PAR-21-022](#); [PAR-21-023](#)

**NIH: Research to Reduce Morbidity and Improve Care for Pediatric, and Adolescent and Young Adult (AYA) Cancer Survivors (R21 Clinical Trial Optional)**

**RFA-CA-20-028**

**Application Submission Deadline: July 30, 2021**

Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) invites applications describing research focused on improving care and health-related quality of life for childhood, and adolescent and young adult (AYA) cancer survivors. Specifically, this FOA solicits mechanistic, observational, and intervention applications that focus on six key domains: (1) disparities in survivor outcomes; (2) barriers to follow-up care (e.g. access, adherence); (3) impact of familial, socioeconomic, and other environmental factors on survivor outcomes; (4) indicators for long-term follow-up needs related to risk for late effects, recurrence, and subsequent cancers; (5) risk factors and predictors of late/long-term effects of cancer treatment; and (6) development of targeted interventions to reduce the burden of cancer for pediatric/AYA survivors. Applications are due by July 30, 2021. [Read more information.](#)

**NIH: Human-Animal Interaction (HAI) Research (R01 Clinical Trial Optional) (R03 Clinical Trial Optional) (R21 Clinical Trial Optional)**

**PAR-20-031; PAR-20-032; PAR-20-033**

**Application Submission Deadline: November 30, 2021**

This Funding Opportunity Announcement (FOA) invites grant applications for research to examine 1) the impact of Human-Animal Interactions (HAI) on typical and atypical child development and health; 2) the evaluation of animal-assisted intervention for children and adults with disabilities or in need of rehabilitative services; 3) the effects of animals on public health, including cost effectiveness of involving animals in reducing and preventing disease. Applications are due by November 30, 2021. Read more information: [R01](#); [R03](#); [R21](#).

**NIMH: Practice-Based Research for Implementing Scalable Evidence-Based Prevention Interventions in Primary Care Settings (R01 Clinical Trial Optional) (R34 Clinical Trial Required)**

**RFA-MH-20-505; RFA-MH-20-506**

**Application Submission Deadline: July 1, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to encourage practice-based research aimed at refining and pilot testing developmentally-focused, theory-based efficacious prevention interventions that may impact mental health outcomes, including suicide behaviors and serious mental illness. The research should test prevention approaches that are both scalable and sustainable for implementation in pediatric-serving primary care settings, with an emphasis on populations experiencing mental health disparities. Applications are due by 5pm local time of applicant organization on July 1, 2021. Read more information: [R01](#), [R34](#).

**NIMHD: Exploratory/Developmental Research Grant Program (R21 - Clinical Trial Optional)**

**PAR-20-150**

**Application Submission Deadline: June 16, 2021**

NIMHD invites applications to support short-term exploratory or developmental research projects that have the potential to break new ground in the fields of minority health and/or health disparities or extend previous discoveries toward new directions or applications that can directly contribute to improving minority health and/or reducing health disparities in the U.S. Applications are due by June 16, 2021. [Read more information.](#)

**HIV/AIDS**

**NIDA: AIDS-Science Track Award for Research Transition (R03 Clinical Trial Optional)**

**PA-18-916**

**Application Submission Deadline: May 7, 2021**

This funding opportunity announcement (FOA) seeks to facilitate the entry of both newly independent and early career investigators to the area of drug use and use disorder research and HIV/AIDS. This FOA, AIDS-Science Track Award for Research Transition (A-START), encourages Small Research Grant (R03) applications to support research projects on drug misuse and/or use disorder and HIV/AIDS that can be carried out in a short period of time with limited resources. This FOA welcomes applications integrating drug misuse and/or use disorder and HIV/AIDS across all areas of research supported by NIDA. Applications are due by 5pm local time of applicant organization on May 7, 2021. [Read more information.](#)

**NIDA: HIV/AIDS High Priority Drug Abuse Research (R01 Clinical Trial Optional)**

**PAS-18-915**

**Application Submission Deadline: May 7, 2021**

The goal of this Funding Opportunity Announcement (FOA) is to stimulate high priority research relevant to drug misuse and HIV/AIDS. Central to the NIH high priority areas of research are principles such as engaging people at risk into screening and preventive services as well as linking and re-linking people living with HIV (PLWH) into care with the goal of achieving durable viral suppression and addressing HIV comorbidities. Basic and clinical research that moves the field toward a cure and development of vaccines are high priority areas of research. Complete applications are due by 5pm local time of applicant organization on May 7, 2021. [Read more information.](#)

**new NIDA: Exploratory studies to investigate mechanisms of HIV infection, replication, latency, and/or pathogenesis in the context of substance use disorders (R61/R33 - Clinical Trial Not Allowed)**

**RFA-DA-22-004**

**Application Submission Deadline: July 14, 2021**

The purpose of this FOA is to support exploratory studies developing or using novel tools or technologies or testing novel hypotheses to investigate mechanistic questions in HIV infection, replication, latency, and/or pathogenesis (including neuroHIV) in the context of Substance Use Disorders (SUDs). This initiative focuses on exploration and characterization of signaling pathways that are involved in central nervous system (CNS) HIV establishment and expansion. The FOA aims to promote research to investigate the underlying molecular mechanisms by which HIV infection is initiated, established, and maintained in the CNS and to determine how addictive substances modulate HIV infection, latency and the size and persistence of CNS HIV reservoirs. [Read more information.](#)

**NIH: Mood Disorders in People Living with HIV: Mechanisms and Pathways (R01 Clinical Trial Optional)**

**RFA-MH-21-116**

**Application Submission Deadline: March 10, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to support studies to better understand the underlying mechanisms and interplay of biological, psychosocial and structural factors contributing to mood disorders in people living with HIV. Applications testing a fully conceptualized and hypothesis-based solid premise founded with adequate preliminary data are appropriate for this FOA. Exploratory and high-risk research projects should consider applying to the companion R21 announcement RFA-MH-21-117. Basic and preclinical research in domestic and international settings are of interest. Multidisciplinary research teams and collaborative alliances are encouraged but not required. Applications are due by 5:00 PM local time of applicant organization on March 10, 2021. [Read more information.](#)

**NIH: Mood Disorders in People Living with HIV: Mechanisms and Pathways (R21 Clinical Trial Optional)**

**RFA-MH-21-117**

**Application Submission Deadline: March 10, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to support studies to better understand the underlying mechanisms and interplay of biological, psychosocial and structural factors contributing to mood disorders in people living

with HIV. Exploratory and high-risk research projects are appropriate for this FOA. Applications testing a fully conceptualized and hypothesis-based solid premise founded with adequate preliminary data should consider applying to the companion R01 announcement RFA-MH-21-116. Basic and preclinical research in domestic and international settings are of interest. Multidisciplinary research teams and collaborative alliances are encouraged but not required. Applications are due by 5:00 PM local time of applicant organization on March 10, 2021. [Read more information](#).

**NIH: Accelerating the Pace of Drug Abuse Research Using Existing Data (R01 Clinical Trial Optional)**

**PAR-19-368**

**Application Submission Deadline: June 5, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to invite applications proposing innovative analysis of existing social science, behavioral, administrative, and neuroimaging data to study the etiology and epidemiology of substance using behaviors (defined as alcohol, tobacco, prescription and other substances) and related disorders, prevention of substance use and HIV, and health service utilization. This FOA encourages the analyses of public use and other extant community-based or clinical datasets to their full potential in order to increase our knowledge of etiology, trajectories of substance using behaviors and their consequences including morbidity and mortality, risk and resilience in the development of psychopathology, strategies to guide the development, testing, implementation, and delivery of high quality, effective and efficient services for the prevention and treatment of substance use disorder and HIV. Applications are due by June 5, 2021. [Read more information](#).

**NIH: Developmental AIDS Research Centers on Mental Health and HIV/AIDS (P30 Clinical Trial Optional)**

**PAR-20-307; PAR-20-308**

**Application Submission Deadline: August 25, 2021**

The National Institute of Mental Health (NIMH) Division of AIDS Research (DAR) encourages applications for Center Core grants (P30) to support Developmental HIV/AIDS Research Centers (D-ARC). The D-ARC is intended to provide infrastructure support that facilitates the development of high impact science in HIV/AIDS and mental health that is relevant to the NIMH mission. This Funding Opportunity Announcement (FOA) intends to support innovative, interdisciplinary research in several areas, including basic, NeuroHIV, behavioral and social, integrated biobehavioral, applied, clinical, translational, and implementation science. All applications are due by 5:00 PM local time of applicant organization on August 25, 2021. Read more information: [PAR-20-307](#), [PAR-20-308](#)

**NIMH: Innovations in HIV Prevention, Testing, Adherence and Retention to Optimize HIV Prevention and Care Continuum Outcomes (R01 Clinical Trial Optional) (R21 Clinical Trial Optional)**

**PA-20-144; PA-20-145**

**Application Submission Deadline: May 7, 2021**

This Funding Opportunity Announcement (FOA) seeks innovative research to optimize HIV prevention and care which is aligned with NIMH Division of AIDS Research (DAR) priorities. Applications may include formative basic behavioral and social science to better understand a step or steps in the HIV prevention or care continuum, and/or the initial development and pilot testing of innovative intervention approaches. Applicants are encouraged to read current Notices of Special Interests (NOSIs) from NIMH DAR for further information about the Division's research priorities. Applications are due by 5pm local time of applicant organization on May 7, 2021. [PA-20-144](#); [PA-20-145](#).

## **MATERNAL AND CHILD HEALTH**

**NIAAA: Prevention and Intervention Approaches for Fetal Alcohol Spectrum Disorders (R34 Clinical Trial Optional; R61/R33 Clinical Trial Optional)**

**PAR-21-097; PAR-21-098**

**Application Submission Deadline: June 17, 2021**

This Funding Opportunity Announcement (FOA) focuses on prevention and intervention strategies for fetal alcohol spectrum disorders (FASD) throughout the lifespan. The intent of this FOA is to support research that advances (1) prevention approaches to reduce prenatal alcohol exposure and the incidence of FASD and (2) interventions for FASD. Research conducted via the R34 mechanism will consist of studies that are a pre-requisite for preparing and submitting subsequent applications for larger scale FASD prevention or intervention studies. The R61 phase will support pilot studies or secondary data analysis for hypothesis development and feasibility, and research testing the hypotheses can be expanded in the R33 phase. Applications are due by 5:00 PM local time of applicant organization on June 17, 2021. Read more information: [PAR-21-097](#); [PAR-21-098](#).

**NEW NICHD: Natural History of Disorders Screenable in the Newborn Period (R01 Clinical Trial Optional)**

**PAR-21-115**

**Application Submission Deadline: June 5, 2021**

This funding opportunity announcement (FOA) encourages applications that propose to develop studies that will lead to a broad understanding of the natural history of disorders that already do or could potentially benefit from early identification by newborn screening. A comprehensive understanding of the natural history of a disorder has been identified as a necessary element to facilitate appropriate interventions for infants identified by newborn screening. By defining the sequence and timing of the onset of symptoms and complications of a disorder, a valuable resource will be developed for the field. In addition, for some disorders, specific genotype-phenotype correlations may allow prediction of the clinical course, and for other disorders, identification of modifying genetic, epigenetic, or environmental factors will enhance an understanding of the clinical outcomes for an individual with such a condition. Comprehensive data on natural history will facilitate the field's ability to: 1) accurately diagnose the disorder; 2) understand the genetic and clinical heterogeneity and phenotypic expression of the disorder; 3) identify underlying mechanisms related to basic defects; 4) potentially prevent, manage, and treat symptoms and complications of the disorder; and 5) provide children and their families with needed support and predictive information about the disorder. [Read more information.](#)

**NIH: Maternal Nutrition and Pre-pregnancy Obesity: Effects on Mothers, Infants and Children (R01 Clinical Trial Optional)  
PA-18-776**

**Application Submission Deadline: June 5, 2021**

This Funding Opportunity Announcement (FOA) encourages applications to improve health outcomes for women, infants and children, by stimulating interdisciplinary research focused on maternal nutrition and pre-pregnancy obesity. Maternal health significantly impacts not only the mother but also the intrauterine environment, and subsequently fetal development and the health of the newborn. Applications are due by 5pm local time of applicant organization on June 5, 2021. [Read more information.](#)

**NEW NIH: Expert-Driven Small Projects to Strengthen Gabriella Miller Kids First Discovery (R03 Clinical Trial Not Allowed)**

**RFA-RM-21-011**

**Application Submission Deadline: June 18, 2021**

The NIH Common Fund has established the Gabriella Miller Kids First Pediatric Research Program (Kids First) with the vision of alleviating suffering from childhood cancer and structural birth defects by fostering collaborative research to uncover the etiology of these diseases and supporting data sharing within the pediatric research community. Kids First has established and continues to develop a Data Resource including a large collection of curated genomic and phenotypic data from childhood cancer and structural birth defects cohorts and a central portal where these data and analysis tools are accessible to the research community. **NIH: Advanced Laboratories for Accelerating the Reach and Impact of Treatments for Youth and Adults with Mental Illness (ALACRITY) Research Centers (P50 Clinical Trial Optional)**

**PAR-20-293**

**Application Submission Deadline: March 17, 2021**

This Funding Opportunity Announcement (FOA) invites applications for centers to support transdisciplinary teams of clinical and mental health services researchers, behavioral scientists, social scientists, health information and communications technologists, health systems engineers, decision scientists, and mental health stakeholders (e.g., service users, family members, clinicians, payers) to engage in high-impact studies that will significantly advance clinical practice and generate knowledge that will fuel transformation of mental health care in the United States. Advanced Laboratories for Accelerating the Reach and Impact of Treatments for Youth and Adults with Mental Illness (ALACRITY) Research Centers will support the rapid development, testing, and refinement of novel and integrative approaches for (1) optimizing the effectiveness of therapeutic or preventive interventions for mental disorders within well-defined target populations; (2) organizing and delivering optimized mental health services within real world treatment settings; and (3) continuously improving the quality, impact, and durability of optimized interventions and service delivery within diverse care systems. The ALACRITY Centers program is intended to support research that maximizes synergies across various components of the mental health research ecosystem, including new discoveries in clinical research, transformative health care technologies, advances in information science, and new federal and state mechanisms for organizing mental health care. The Centers are intended for transdisciplinary projects that could not be achieved using standard research project grant mechanisms. The ALACRITY Centers program is also expected to facilitate widespread sharing of relevant data, methods, and resources that will accelerate clinical research and practice and to provide opportunities for graduate students, postdoctoral researchers, and early-career investigators to participate in transdisciplinary, T2 translational mental health research. Applications are due by March 17, 2021. [Read more information](#).

**NIH: HEAL Initiative: Optimizing Multi-Component Service Delivery Interventions for People with Opioid Use Disorder, Co-Occurring Conditions, and/or Suicide Risk (R01 Clinical Trials Optional)**

**RFA-MH-21-145**

**Application Submission Deadline: March 18, 2021**

In April 2018, the National Institutes of Health (NIH) launched the HEAL (Helping to End Addiction Long-term) Initiative, an aggressive, trans-agency effort to speed scientific solutions to stem the national opioid public health crisis. In response to this initiative, the National Institute of Mental Health (NIMH), in partnership with other NIH Institutes, Centers, and Offices, invites research that will optimize multi-component service delivery interventions for people with opioid use disorder (OUD) and co-occurring conditions, to include mental disorders and/or suicide risk. The purpose of the initiative is to support studies that will (1) test the overall effectiveness of multi-component interventions for OUD and co-occurring conditions and (2) examine the relative contribution of constituent components to overall effectiveness. This research will streamline service packages so they only include components that drive clinical improvements for complex conditions. Applications are due by 5:00 PM local time of applicant organization on March 18, 2021. [Read more information](#).

**NIH: Social Drivers of Mental Illnesses in Low- and Middle-Income Countries: Mechanisms and Pathways of Interventions for Youth (R01 Clinical Trial Optional)**

**RFA-MH-21-160**

**Application Submission Deadline: March 18, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to solicit research that will help to identify and explain the mechanisms and pathways by which interventions targeting social drivers of mental illnesses affect the mental health and functioning of children and/or adolescents (ages 5-24 years) living in World Bank designated low- and middle-income countries (LMICs) and previously designated LMICs re-categorized as high income on or after January 1, 2021. Studies should use innovative approaches to capture as much real-world complexity as possible in identifying and elucidating mechanisms and pathways that reduce risk for mental illnesses or improve mental health in children and/or adolescents. NIMH welcomes applicants from LMICs and strongly encourages applicants from the United States or upper middle income countries to partner with sites in LMICs. All applications are due by 5:00 PM local time of applicant organization on March 18, 2021. [Read more information](#).

**NIH: Integrative Neuroscience Initiative on Alcoholism (INIA) Consortia (U01 Clinical Trial Optional) (U24 Clinical Trial Optional)**

**RFA-AA-20-013; RFA-AA-20-012**

**Application Submission Deadline: May 26, 2021**

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) seeks to continue the Integrative Neuroscience Initiative on Alcoholism (INIA), a translational, multidisciplinary, collaborative research effort studying brain mechanisms of excessive alcohol drinking associated with alcohol use disorder (AUD). The research focus includes mechanisms behind changes in the brain that result from excessive alcohol use and are associated with the development of AUD, brain changes that result in excessive use that is then correlated with AUD, and also the relationship between excessive drinking, stress, and anxiety. The primary goal of INIA is to identify brain adaptations at multiple levels of analysis that result in excessive alcohol consumption. Each consortium supported under this initiative will integrate analysis at the molecular, cellular, extracellular, synaptic, physiological and behavioral level. INIA has also helped to define factors that contribute to an individual's risk for the development of AUD and has identified novel targets for therapeutic intervention including medications. The linked set of FOAs will support two consortia each comprised of an administrative core, multiple component projects (this FOA) and relevant scientific resource cores as needed. Applications are due by 5:00 PM local time of applicant organization on May 26, 2021. Read more information: [U01](#), [U24](#)

**NIH: Practice-Based Suicide Prevention Research Centers (P50 Clinical Trial Optional)  
PAR-20-286**

**Application Submission Deadline: May 26, 2021**

This Funding Opportunity Announcement (FOA) invites applications for research centers to support integrated programs of high-impact, practice-based research with near-term potential to address NIMH suicide prevention priorities and help achieve the National Action Alliance for Suicide Prevention goals of reducing the rate of suicide in the US. The Centers are intended to support transdisciplinary teams of clinical and mental health services researchers, behavioral/social scientists, health information and communications technologists, health systems engineers, decision scientists, and mental health stakeholders (e.g., service users, family members, clinicians, payers) engaged in transdisciplinary programs of research that could not be achieved using standard research project grant mechanisms. Research Centers will support the rapid development, refinement, and testing of effective and scalable approaches for intervening at key intercepts in the chain of care: for identifying high-risk individuals, for promoting continuity across key care transitions (e.g., following identification in the emergency department or discharge from inpatient care), and for intervening (including prevention strategies and treatment for acute risk). Applications are due by May 26, 2021. [Read more information.](#)

**NIH: Identification and Management of Behavioral Symptoms and Mental Health Conditions in Individuals with Intellectual Disabilities (R01 - Clinical Trial Optional)  
PAR-18-766**

**Application Submission Deadline: June 5, 2021**

This Funding Opportunity Announcement (FOA) encourages research grant applications focusing on identification and management of behavioral symptoms and mental health conditions in individuals with intellectual disabilities (ID). Specific areas of interest for this funding opportunity are (1) applications to develop and validate assessment tools that reliably identify behavioral symptoms or diagnose mental health conditions in individuals with ID, and (2) applications studying the pharmacokinetics, safety and efficacy of specific psychotropic medications for treatment of behavioral symptoms or mental health conditions in individuals with ID. Letters of intent are due 30 days prior to the application deadline. Applications are due by 5:00pm local time of applicant organization on June 5, 2021. [Read more information.](#)

**NIH: Discovery of Cell-based Chemical Probes for Novel Brain Targets (R21 Clinical Trial Not Allowed)  
PAR-21-028**

**Application Submission Deadline: June 16, 2021**

This Funding Opportunity Announcement (FOA) intends to support investigators who have interest and capability to join efforts for the discovery of cell-based chemical probes for novel brain targets. It is expected that applicants will have in hand the starting compounds (validated hits) for chemical optimization and bioassays for testing new analog compounds. Through this FOA, NIH wishes to stimulate research in: 1) discovery and development of novel, small molecules for their potential use in understanding biological processes relevant to the missions of NIMH, NIA, NICHD, and/or NIDCD; and 2) discovery and/or validation of novel, biological targets that will inform studies of brain disease mechanisms. Emphasis will be placed on projects that provide new insight into important disease-related biological targets and biological processes. The main emphasis of projects submitted under this FOA should be in the discovery of cell-based chemical probes. All applications are due by 5:00 PM local time of applicant organization on June 16, 2021. [Read more information.](#)

**NIH: Developmental AIDS Research Centers on Mental Health and HIV/AIDS (P30 Clinical Trial Optional)  
PAR-20-307; PAR-20-308**

**Application Submission Deadline: August 25, 2021**

The National Institute of Mental Health (NIMH) Division of AIDS Research (DAR) encourages applications for Center Core grants (P30) to support Developmental HIV/AIDS Research Centers (D-ARC). The D-ARC is intended to provide infrastructure support that facilitates the development of high impact science in HIV/AIDS and mental health that is relevant to the NIMH mission. This Funding Opportunity Announcement (FOA) intends to support innovative,

interdisciplinary research in several areas, including basic, NeuroHIV, behavioral and social, integrated biobehavioral, applied, clinical, translational, and implementation science. All applications are due by 5:00 PM local time of applicant organization on August 25, 2021. Read more information: [PAR-20-307](#), [PAR-20-308](#)

**NIH: Service-Ready Tools for Identification, Prevention, and Treatment of Individuals at Risk for Suicide (R34 Clinical Trial Optional)  
RFA-MH-21-111**

**Application Submission Deadline: October 15, 2021**

The National Institute of Mental Health (NIMH) seeks applications for pilot effectiveness projects to evaluate the preliminary effectiveness of service-ready tools and technologies that can be used to advance training, quality monitoring, and quality improvement efforts and ultimately improve the availability of evidence-based suicide prevention services. Specifically, this initiative encourages research on the effectiveness-implementation continuum aimed at (1) developing and testing the effectiveness of optimized, service-ready suicide prevention tools for identification, prevention, and treatment of individuals at risk for suicide; and (2) testing strategies to improve adoption, implementation fidelity, and sustained use of these tools, guided by an implementation science framework. Given the focus on practice-ready accessible resources and products that could be readily integrated into practice, NIMH encourages the use of technology and other design features that make the tools scalable and robust against implementation drift, and a deployment-focused approach that takes into account the perspectives of key stakeholders (e.g., service users, providers, administrators) and system-level factors, such as workforce capacity that influence potential integration of tools into clinical workflows. This Funding Opportunity Announcement (FOA) supports pilot effectiveness research to evaluate the feasibility, tolerability, acceptability, safety and preliminary indications of effectiveness of service-ready tools and technologies for suicide prevention and inform the design of definitive effectiveness trials. Applications are due by 5:00 PM local time of applicant organization on October 15, 2021. [Read more information.](#)

**NIH: Service-Ready Tools for Identification, Prevention, and Treatment of Individuals at Risk for Suicide (R01 Clinical Trial Optional)  
RFA-MH-21-110**

**Application Submission Deadline: October 15, 2021**

The National Institute of Mental Health (NIMH) seeks applications for research projects to evaluate the effectiveness of service-ready tools and technologies that can be used to advance training, quality monitoring, and quality improvement efforts and ultimately improve the availability of evidence-based suicide prevention services. Specifically, this initiative encourages research on the effectiveness-implementation continuum aimed at (1) developing and testing the effectiveness of optimized, service-ready suicide prevention tools for identification, prevention, and treatment of individuals at risk for suicide; and (2) testing strategies to improve adoption, implementation fidelity, and sustained use of these tools, guided by an implementation science framework. Given the focus on practice-ready accessible resources and products that could be readily integrated into practice, NIMH encourages the use of technology and other design features that make the tools scalable and robust against implementation drift, and a deployment-focused approach that takes into account the perspectives of key stakeholders (e.g., service users, providers, administrators) and system-level factors, such as workforce capacity that influence potential integration of tools into clinical workflows. This Funding Opportunity Announcement (FOA) is intended to support effectiveness research of service-ready tools and technologies for suicide prevention that are statistically powered to provide a definitive answer regarding the study tool's effectiveness. Applications are due by 5:00 PM local time of applicant organization on October 15, 2021. [Read more information.](#)

**NIMH: Mental Health Research Dissertation Grant to Enhance Workforce Diversity (R36 Independent Clinical Trial Not Allowed)  
PAR-18-894**

**Application Submission Deadline: April 6, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to enhance the diversity of the mental health research workforce by providing dissertation awards in all research areas within the strategic priorities of the NIMH to individuals from groups underrepresented in biomedical, behavioral, clinical and social sciences research. This award supports the completion of the doctoral research project. Applications are due on April 6, 2021. [Read more information.](#)

**NIMH: Neuromodulation/Neurostimulation Device Development for Mental Health Applications (R21 Clinical Trial Optional) (R01 Clinical Trial Optional)  
PAR-18-941; PAR-18-942**

**Application Submission Deadline: June 5, 2021 (R01), June 16, 2021 (R21)**

The purpose of this funding opportunity announcement (FOA) is to encourage applications seeking to develop the next generation of brain stimulation devices for treating mental health disorders. Applications are sought that will either 1) develop novel brain stimulation devices or 2) significantly enhance, by means of hardware/software improvements, the

effectiveness of brain stimulation devices that are currently U.S. Food and Drug Administration (FDA)-approved or cleared. Novel devices should move beyond existing electrical/magnetic stimulation and develop new stimulation techniques capable of increased spatiotemporal precision as well as multi-focal, closed-loop approaches. Applications seeking to develop new capabilities should focus on significant enhancement of the spatial resolution, depth of delivery, and/or precision of the device. Incremental changes to existing devices (e.g., software updates) are not within the scope of this announcement. Applications should be submitted by multi-disciplinary teams with diverse expertise including systems neuroscience, engineering, clinical, and regulatory affairs. Applications to this FOA may propose hypothesis-driven research, but should propose design-directed, developmental, or discovery-driven technology research using integrative approaches. Applications are due by 5pm local time of applicant organization on June 5, 2021 for [R01](#) and by June 16, 2021 for [R21](#).

**NIMH: Exploratory/Developmental Research Grant (R21 - Clinical Trial Not Allowed)  
PA-18-350**

**Application Submission Deadline: June 16, 2021**

The NIMH Exploratory/Developmental Grant program supports exploratory and high-risk research projects that fall within the National Institute of Mental Health (NIMH) mission by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough or to the development of novel techniques, agents, methods, measures, models, or strategies, or to the generation of pilot or feasibility data. The preliminary work from these studies could lead to a major impact on biomedical, behavioral, or clinical mental health research, or on the delivery of mental health care. Applications are due by February 16, 2021. [Read more information](#).

**NIMH: Post-Acute Interventions for the Treatment of Anorexia Nervosa (R34 Clinical Trial Required)  
RFA-MH-20-500**

**Application Submission Deadline: June 15, 2021**

NIMH seeks applications for pilot projects to evaluate the preliminary effectiveness of interventions targeting sustained and enhanced treatment response following acute treatment for anorexia nervosa (AN). An emphasis is placed on trials that go beyond seeking incremental gains in intervention effects, and instead take a theory-driven, empirical approach to developing and testing interventions that will have a significant impact on weight restoration and psychological symptoms associated with AN. Consistent with an effectiveness framework, studies should take a deployment-focused approach to intervention development and testing, acknowledging that many patients will receive post-acute treatment from community providers unaffiliated with specialty eating disorder centers. Applications are due by June 15, 2021. [Read more information](#).

**NIMH: Practice-Based Research for Implementing Scalable Evidence-Based Prevention Interventions in Primary Care Settings (R01 Clinical Trial Optional) (R34 Clinical Trial Required)**

**RFA-MH-20-505; RFA-MH-20-506**

**Application Submission Deadline: July 1, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to encourage practice-based research aimed at refining and pilot testing developmentally-focused, theory-based efficacious prevention interventions that may impact mental health outcomes, including suicide behaviors and serious mental illness. The research should test prevention approaches that are both scalable and sustainable for implementation in pediatric-serving primary care settings, with an emphasis on populations experiencing mental health disparities. Applications are due by 5pm local time of applicant organization on July 1, 2021. Read more information: [R01](#), [R34](#).

## **METHODOLOGY AND MEASUREMENT**

**NIH: BRAIN Initiative: Research Resource Grants for Technology Integration and Dissemination (U24 Clinical Trial Not Allowed)**

**RFA-NS-19-006**

**Application Submission Deadline: June 27, 2021**

This funding opportunity announcement (FOA) supports efforts to disseminate resources and to integrate them into neuroscience research practice. Projects should be highly relevant to specific goals of the BRAIN Initiative, goals that are described in the planning document "[BRAIN 2025: A Scientific Vision](#)." They should engage in one or more of the following activities: distribution of tools and reagents; user training on the usage of new technologies or techniques; providing access to existing technology platforms and specialized facilities; minor improvements to increase the scale/efficiency of resource production and delivery; minor adaptations to meet the needs of a user community. Applications strictly focused on technology or software development, rather than dissemination of an existing resource, are not responsive to this FOA. Refinements to microscopes or tools necessary to customize them to the experimental needs of the end users is allowed. Projects should address compelling needs of neuroscience researchers working toward the goals of the BRAIN 2025 report that are otherwise unavailable or impractical in their current form. Letters of

intent are due 30 days prior to the application due date. Complete applications are due by June 27, 2021. [Read more information.](#)

**NIH: Service-Ready Tools for Identification, Prevention, and Treatment of Individuals at Risk for Suicide (R01 Clinical Trial Optional)**

**RFA-MH-21-110**

**Application Submission Deadline: October 15, 2021**

The National Institute of Mental Health (NIMH) seeks applications for research projects to evaluate the effectiveness of service-ready tools and technologies that can be used to advance training, quality monitoring, and quality improvement efforts and ultimately improve the availability of evidence-based suicide prevention services. Specifically, this initiative encourages research on the effectiveness-implementation continuum aimed at (1) developing and testing the effectiveness of optimized, service-ready suicide prevention tools for identification, prevention, and treatment of individuals at risk for suicide; and (2) testing strategies to improve adoption, implementation fidelity, and sustained use of these tools, guided by an implementation science framework. Given the focus on practice-ready accessible resources and products that could be readily integrated into practice, NIMH encourages the use of technology and other design features that make the tools scalable and robust against implementation drift, and a deployment-focused approach that takes into account the perspectives of key stakeholders (e.g., service users, providers, administrators) and system-level factors, such as workforce capacity that influence potential integration of tools into clinical workflows. This Funding Opportunity Announcement (FOA) is intended to support effectiveness research of service-ready tools and technologies for suicide prevention that are statistically powered to provide a definitive answer regarding the study tool's effectiveness. Applications are due by 5:00 PM local time of applicant organization on October 15, 2021. [Read more information.](#)

**NIH: Service-Ready Tools for Identification, Prevention, and Treatment of Individuals at Risk for Suicide (R34 Clinical Trial Optional)**

**RFA-MH-21-111**

**Application Submission Deadline: October 15, 2021**

The National Institute of Mental Health (NIMH) seeks applications for pilot effectiveness projects to evaluate the preliminary effectiveness of service-ready tools and technologies that can be used to advance training, quality monitoring, and quality improvement efforts and ultimately improve the availability of evidence-based suicide prevention services. Specifically, this initiative encourages research on the effectiveness-implementation continuum aimed at (1) developing and testing the effectiveness of optimized, service-ready suicide prevention tools for identification, prevention, and treatment of individuals at risk for suicide; and (2) testing strategies to improve adoption, implementation fidelity, and sustained use of these tools, guided by an implementation science framework. Given the focus on practice-ready accessible resources and products that could be readily integrated into practice, NIMH encourages the use of technology and other design features that make the tools scalable and robust against implementation drift, and a deployment-focused approach that takes into account the perspectives of key stakeholders (e.g., service users, providers, administrators) and system-level factors, such as workforce capacity that influence potential integration of tools into clinical workflows. This Funding Opportunity Announcement (FOA) supports pilot effectiveness research to evaluate the feasibility, tolerability, acceptability, safety and preliminary indications of effectiveness of service-ready tools and technologies for suicide prevention and inform the design of definitive effectiveness trials. Applications are due by 5:00 PM local time of applicant organization on October 15, 2021. [Read more information.](#)

## **NUTRITION**

**NIH: Time-Sensitive Obesity Policy and Program Evaluation (R01)**

**PAR-18-854**

**Application Submission Deadline: March 10, 2021**

This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, or sedentary behavior) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications to this FOA must demonstrate that the evaluation of an obesity related policy and /or program offers an uncommon and scientifically compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications in response to this time-sensitive FOA are not eligible for resubmission. It is intended that eligible applications selected for funding will be awarded within 4 months of the application due date. However, administrative requirements and other unforeseen circumstances may delay issuance dates beyond that timeline. Applications are due by 5:00 PM local time of applicant organization on March 10, 2021. [Read more information.](#)

**NIH: Diet and Physical Activity Assessment Methodology (R01) (R21)****PA-18-856, PAR-18-857****Application Submission Deadline: June 5, 2021 (R01), June 16, 2021 (R21)**

This Funding Opportunity Announcement (FOA) encourages innovative research to enhance the quality of measurements of dietary intake and physical activity. Applications submitted to this FOA may include development of: novel assessment approaches; better methods to evaluate instruments; assessment tools for culturally diverse populations or various age groups, including children and older adults; improved technology or applications of existing technology; statistical methods/modeling to improve assessment and/or to correct for measurement errors or biases; methods to investigate the multidimensionality of diet and physical activity behavior through pattern analysis; or integrated measurement of diet and physical activity along with the environmental context of such behaviors. Applications are due by 5pm local time of applicant organization on [June 5, 2021 \(R01\)](#), [June 16, 2021 \(R21\)](#).

**PUBLIC HEALTH**

**NEW NIAAA: SARS-CoV-2, COVID-19 and Consequences of Alcohol Use (R01 Clinical Trial Not Allowed); (R03 Clinical Trial Not Allowed); (R21 Clinical Trial Not Allowed)**

**RFA-AA-21-002; RFA-AA-21-003; RFA-AA-21-004****Application Submission Deadline: April 14, 2021**

This Funding Opportunity Announcement (FOA) will support research grants to address urgent, time-sensitive research questions on the relationships between alcohol consumption and COVID-19 related outcomes and consequences. The principal area of focus is research that can improve public health in the near term by informing responses to the current COVID-19 pandemic, in view of 1) the impact of alcohol misuse on incidence and severity of COVID-19 disease or 2) the effect of the COVID-19 disease and pandemic-induced restrictions on alcohol use and alcohol use disorder (AUD). Time-sensitive applications for which standard NIH review and funding timelines would compromise either the ability to conduct the research or the value of the knowledge and with the potential to inform responses to the current pandemic will be considered. Applications to RFA-AA-21-002 should be accomplished within a three-year project duration. The RFA-AA-21-003 FOA uses the R03 mechanism, which is intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application. The RFA-AA-21-004 FOA uses the R21 grant mechanism, which is intended to support investigation of novel scientific ideas or new model systems, tools, or technologies that have the potential for significant impact on biomedical or biobehavioral research. Read more information: [RFA-AA-21-002](#); [RFA-AA-21-003](#); [RFA-AA-21-004](#).

**CDC: Grants to Support New Investigators in Conducting Research Related to Preventing Interpersonal Violence Impacting Children and Youth****RFA-CE-21-003****Application Submission Deadline: March 10, 2021**

The purpose of the Centers for Disease Control and Prevention National Center for Injury Prevention and Control (NCIPC) Mentored Research Scientist Development Award (K01) is to provide support for an intensive, supervised (mentored) career development experience in violence prevention research leading to research independence. NCIPC supports K01 grants to help ensure the availability of an adequate number of trained scientists to address critical public health research questions to prevent violence and injury. Applicants must propose a research project that addresses at least one of the research priorities in the interpersonal violence prevention section of the NCIPC Research Priorities (<https://www.cdc.gov/injury/researchpriorities/index.html>) as they relate to violence impacting children or youth (from birth through age 17). These research priorities include: Cross-cutting violence prevention; Child abuse and neglect; Youth violence; Intimate partner violence (teen dating violence); Sexual violence. Applications are due by 5:00 PM ET on [March 10, 2021](#). [Read more information.](#)

**CDC: Rigorous Evaluation of Policies for their Impacts on the Primary Prevention of Multiple Forms of Violence**  
**RFA-CE-21-001****Application Submission Deadline: April 5, 2021**

The Centers for Disease Control and Prevention's (CDC) National Center for Injury Prevention and Control (NCIPC) is soliciting research proposals to expand the evidence base for policy approaches for the primary prevention of multiple forms of violence experienced by children, youth, and adults. Policies that promote the social and economic well-being of populations and address community characteristics associated with violence have the potential to reduce rates of multiple forms of violence, including the four forms that are the focus of this announcement: child abuse and neglect, youth violence, intimate partner violence, and sexual violence. To advance NCIPC's commitment to increasing health equity, the intent is to support applications that investigate policies that address social and structural conditions to reduce the disproportionate burden of violence experienced by some groups and communities. Applications are due by 5:00 PM local time of applicant organization on [April 5, 2021](#). [Read more information.](#)

**CDC: The CDC National Centers of Excellence in Youth Violence Prevention (YVPCs): Rigorous Evaluation of Prevention Strategies to Prevent and Reduce Community Rates of Youth Violence**  
**RFA-CE-21-005**

**Application Submission Deadline: April 21, 2021**

The Centers for Disease Control and Prevention's (CDC) National Center for Injury Prevention and Control (NCIPC or Injury Center) is soliciting research proposals to expand the evidence base for the primary prevention of youth violence. The purpose of this announcement is to fund the National Centers of Excellence in Youth Violence Prevention (Youth Violence Prevention Centers or YVPCs) to continue to build the evidence-base for violence prevention strategies and approaches that reduce community rates of youth violence within one or more geographically defined communities with high rates of youth violence. Applications for YVPCs supported under this announcement must describe 5 core elements: (1) an administrative infrastructure to support implementation, evaluation, and dissemination activities; to foster necessary local collaborations to achieve the YVPC's goals; and to work with other funded YVPCs as part of the YVPC Network; (2) the selected community or set of communities with high rates of youth violence as the focus of all proposed YVPC activities; (3) a rigorous evaluation of at least two distinct prevention strategies related to at least two of the four research areas outlined in this NOFO that are designed to reduce community rates of youth violence in the selected community or set of communities; (4) a youth advisory council to provide input on the selection, implementation, and evaluation of youth violence prevention strategies; and (5) integrated training activities for early career and junior researchers in youth violence prevention to complement the implementation, rigorous evaluation, and scholarship activities of the YVPC. Applications are due by 5:00pm ET on April 21, 2021. [Read more information.](#)

**NIAAA Improving Health Disparities in Alcohol Health Services (R01 Clinical Trial Optional)**  
**RFA-AA-21-001**

**Application Submission Deadline: March 15, 2021**

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) intends to renew an initiative by publishing a Funding Opportunity Announcement (FOA) to solicit applications for an R01 Clinical Trial Optional mechanism focusing on health disparities and health services. Research shows that there are myriad reasons why so few individuals with AUD receive treatment, including problems with access to care, health care coverage/payment options, employment, childcare, stigma, and awareness of care options, along with the misconception that treatment does not work. Critically, health disparate and vulnerable populations face unique and intersecting barriers to treatment. Health services research has lagged in special populations, particularly racial, ethnic, and sexual/gender minority populations. This FOA will include five areas of focus: access to treatment, making treatment more appealing, costs, dissemination and implementation, and health disparities. Applications are expected to emphasize health disparities in addition to the other four areas of emphasis. Applications are due by March 15, 2021. [Read more information.](#)

**NIH: Digital Healthcare Interventions to Address the Secondary Health Effects Related to Social, Behavioral, and Economic Impact of COVID-19 (R01 - Clinical Trial Optional)**  
**PAR-20-243**

**Application Submission Deadline: March 2, 2021**

This Funding Opportunity Announcement (FOA) aims to support research to strengthen the healthcare response to Coronavirus Disease 2019 (COVID-19) caused by the Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) and future public health emergencies, including pandemics. While research related to the direct clinical effects of COVID-19 are supported by other funding opportunities, the purpose of this funding opportunity is to focus on the role and impact of digital health interventions [e.g., mobile health (mhealth), telemedicine and telehealth, health information technology (IT), and wearable devices] to address access, reach, delivery, effectiveness, scalability and sustainability of health assessments and interventions for secondary effects (e.g., behavioral health or self-management of chronic conditions) that are utilized during and following the pandemic, particularly in populations who experience health disparities and vulnerable populations. Applications are due by March 2, 2021. [Read more information.](#)

**NIH: Social and Behavioral Intervention Research to Address Modifiable Risk Factors for Cancer in Rural Populations (R01 Clinical Trial Required)**  
**RFA-CA-20-051**

**Application Submission Deadline: March 15, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to solicit applications to develop, adapt, and test individual-, community- or multilevel interventions to address modifiable risk factors for cancer in rural populations. Applications should focus on primary prevention and assess and address one or more of the social and behavioral risk factors that contribute to cancer disparities in rural populations: tobacco use; diet, physical activity and weight; alcohol use; UV exposure; and HPV vaccination. Applications should also assess and address myriad social determinants of health, cultural factors, and health care and technology access barriers that may contribute to rural cancer disparities.

This FOA also encourages implementation science research, to incorporate efficacious cancer control interventions in a coordinated way, into broader, sustainable health programs that are designed to reach rural populations and allow local customization and adaptation. Applications are due by March 15, 2021. [Read more information](#).

**NIH: Health Services Research on Minority Health and Health Disparities (R01- Clinical Trial Optional)  
PAR-20-310**

**Application Submission Deadline: March 17, 2021**

As the Nation's steward of biomedical and behavioral research, NIH has devoted considerable resources to characterize the root causes of health disparities, uncovering a complex web of interconnected and overlapping factors (i.e., biological, behavioral, environmental, and societal). As an important next step, research is needed that capitalizes upon knowledge about causal pathways to directly and demonstrably contribute to the reduction of health disparities. The purpose of this FOA is to encourage health services research that can directly contribute to the improvement of minority health and/or the reduction of health disparities, while taking into consideration the interaction between system-level healthcare, individual clinical care and social determinants of health, including the role of structural systemic factors, place and neighborhood factors. The focus of this FOA is on all services provided in the healthcare setting where individuals from health disparity populations seek care with a clinician for preventive services, chronic disease management, urgent symptomatic care, emergency care, and hospital care. Applications are due by 5:00 PM local time of the applicant organization on March 17, 2021. [Read more information](#).

**NIH: HEAL Initiative: Optimizing Multi-Component Service Delivery Interventions for People with Opioid Use Disorder, Co-Occurring Conditions, and/or Suicide Risk (R01 Clinical Trials Optional)  
RFA-MH-21-145**

**Application Submission Deadline: March 18, 2021**

In April 2018, the National Institutes of Health (NIH) launched the HEAL (Helping to End Addiction Long-term) Initiative, an aggressive, trans-agency effort to speed scientific solutions to stem the national opioid public health crisis. In response to this initiative, the National Institute of Mental Health (NIMH), in partnership with other NIH Institutes, Centers, and Offices, invites research that will optimize multi-component service delivery interventions for people with opioid use disorder (OUD) and co-occurring conditions, to include mental disorders and/or suicide risk. The purpose of the initiative is to support studies that will (1) test the overall effectiveness of multi-component interventions for OUD and co-occurring conditions and (2) examine the relative contribution of constituent components to overall effectiveness. This research will streamline service packages so they only include components that drive clinical improvements for complex conditions. Applications are due by 5:00 PM local time of applicant organization on March 18, 2021. [Read more information](#).

**NIH: Intervention Research to Improve Native American Health (R01 Clinical Trial Optional)  
PAR-20-238**

**Application Submission Deadline: May 17, 2021**

The purpose of this funding opportunity announcement (FOA) is to support research on interventions to improve health in Native American (NA) populations. This includes 1) etiologic research, where there is a significant gap in knowledge, that will directly inform intervention development or adaptations, 2) research that develops, adapts, or tests the efficacy or effectiveness of health promotion and disease prevention interventions, 3) research that tests culturally informed treatment or recovery interventions and 4) where a sufficient body of knowledge on intervention efficacy exists, research on dissemination and implementation that develops and tests strategies to overcome barriers to the adoption, integration, scale-up, and sustainability of effective interventions. Existing data suggest that significant acute and chronic disease inequities exist for NA populations. Concurrently, NA populations experience unique sociopolitical, historical, and environmental stressors and risks that may exacerbate health conditions and/or impact the effectiveness of existing solutions to address the conditions. They also possess unique strengths and resiliencies that can mitigate stressors or inform intervention strategies. Through this initiative, intervention and related research is sought to build upon community knowledge, resources, and resilience to test science-based, culturally appropriate solutions to reduce morbidity and mortality through identification and remediation of precursors to diseases and disorders and through culturally informed treatment. Interventions should be designed with a consideration for sustainability within the communities where they are tested, and have the flexibility to be readily adapted, disseminated, and scaled up to other communities where culturally appropriate. For the purposes of this FOA, Native Americans include the following populations: Alaska Natives, American Indians (whose ancestral lands fall at least partially within the U.S. mainland border), and Native Hawaiians. The term 'Native Hawaiian' means any individual any of whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii. Applications are due by May 17, 2021. [Read more information](#).

**NIH: Research to Improve Native American Health (R21 Clinical Trials Optional)  
PAR-20-214**

**Application Submission Deadline: May 17, 2021**

The purpose of this funding opportunity announcement (FOA) is to support developmental/exploratory studies in preparation for health promotion, disease prevention, treatment, or treatment services research to improve health in Native American (NA) populations. Applications may include 1) etiologic research, where there is a significant gap in knowledge, that will directly inform intervention development or adaptations, 2) research to develop and pilot test new or adapted interventions for feasibility, acceptability, and scalability, 3) research to test the short-term efficacy of interventions, 4) where a sufficient body of knowledge on intervention efficacy exists, research on strategies to overcome barriers to the adoption, integration, scale-up, and sustainability of effective interventions. Existing data suggest that significant acute and chronic disease inequities exist for NA populations. Concurrently, NA populations experience unique sociopolitical, historical, and environmental stressors and risks that may exacerbate health conditions and/or impact the effectiveness of existing solutions to address the conditions. They also possess unique strengths and resiliencies that can mitigate stressors or inform intervention strategies. Through this announcement, culturally informed exploratory/developmental research is sought that builds upon community knowledge, resources, and resilience to provide foundational knowledge for future science-based, culturally appropriate solutions to reduce morbidity and mortality through identification and remediation of precursors to diseases and disorders and through culturally informed treatment. For the purposes of this FOA, Native Americans include the following populations: Alaska Natives, American Indians (whose ancestral lands fall at least partially within the U.S. mainland border), and Native Hawaiians. The term 'Native Hawaiian' means any individual any of whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii. Applications are due by May 17, 2021. [Read more information.](#)

**NIH: Addressing the Etiology of Health Disparities and Health Advantages Among Immigrant Populations (R01 Clinical trial not allowed)**

**PAR-21-080**

**Application Submission Deadline: June 5, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to support innovative research to understand factors uniquely associated with the immigration experience that contribute to health disparities or health advantages among U.S. immigrant populations. This includes but is not limited to risk/protective factors associated with immigration processes from influences that push migration from the sending country, through the experience of immigration, to the experience of resettlement, short and long term residence in the U.S. and the process of acculturation that affect the health of U.S. immigrant populations (particularly migrant workers, recent and 1st generation immigrants). All applications are due by 5:00 PM local time of applicant organization on June 5, 2021. [Read more information.](#)

**NIH: Addressing Health Disparities among Immigrant Populations through Effective Interventions (R01 Clinical Trial Optional)**

**PAR-21-081**

**Application Submission Deadline: June 5, 2021**

The purpose of this initiative is to support research to design and implement effective interventions to enhance health advantages and reduce the health disparities among US immigrant populations. Given the scientific literature documenting health inequities among immigrant populations, this announcement calls for multidisciplinary/multilevel research focusing on the design and implementation of effective interventions that will address immigrant-specific factors to reduce health disparities, particularly among migrant workers, recent and 1st generation immigrants. The intervention research under this FOA should be aimed at improving the health outcome among immigrant groups by targeting the complex causes or consequences of health disparities. All applications are due by 5:00 PM local time of applicant organization on June 5, 2021. [Read more information.](#)

**NIH: Tobacco Control Policies to Promote Health Equity (R21 Clinical Trial Optional)**

**PAR-20-302; PAR-20-303**

**Application Submission Deadline: June 16, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to support observational or intervention research focused on reducing disparities in tobacco use and secondhand smoke (SHS) exposure in the U.S. Specifically, this FOA aims to stimulate scientific inquiry focused on innovative state and local level tobacco prevention and control policies. The long-term goal of this FOA is to reduce disparities in tobacco-related cancers, and in doing so, to promote health equity among all populations. Applicants submitting applications related to health economics are encouraged to consult NOT-OD-16-025 to ensure that the research projects align with NIH mission priorities in health economics research. Applications are due by June 16, 2021. Read more information: [PAR-20-303](#); [PAR-20-302](#).

**NIH: NLM Information Resource Grants to Reduce Health Disparities (G08 Clinical Trial Not Allowed).**

**PAR-20-283**

**Application Submission Deadline: October 22, 2021**

This Funding Opportunity Announcement (FOA) solicits resource grant applications for projects that will bring useful, usable health information to health disparity populations and their health care providers. Access to useful, usable, understandable health information is an important factor when making health decisions. Proposed projects should exploit the capabilities of computer and information technology and health sciences libraries to bring health-related information to consumers and their health care providers. Because this FOA focuses on providing health information to health disparity populations, institutions with demonstrated commitment to the needs of health disparity communities (including Tribal Colleges and Universities (TCU), Historically Black Colleges and Universities (HBCU), Hispanic-Serving Institutions (HSI) and other Minority-Serving Institutions (MSI)) are encouraged to apply. Applications are due by October 22, 2021. [Read more information.](#)

**NIH: Human-Animal Interaction (HAI) Research (R01 Clinical Trial Optional) (R03 Clinical Trial Optional) (R21 Clinical Trial Optional)**

**PAR-20-031; PAR-20-032; PAR-20-033**

**Application Submission Deadline: November 30, 2021**

This Funding Opportunity Announcement (FOA) invites grant applications for research to examine 1) the impact of Human-Animal Interactions (HAI) on typical and atypical child development and health; 2) the evaluation of animal-assisted intervention for children and adults with disabilities or in need of rehabilitative services; 3) the effects of animals on public health, including cost effectiveness of involving animals in reducing and preventing disease. Applications are due by November 20, 2021. Read more information: [R01](#); [R03](#); [R21](#).

**NIMH: Practice-Based Research for Implementing Scalable Evidence-Based Prevention Interventions in Primary Care Settings (R01 Clinical Trial Optional) (R34 Clinical Trial Required)**

**RFA-MH-20-505; RFA-MH-20-506**

**Application Submission Deadline: July 1, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to encourage practice-based research aimed at refining and pilot testing developmentally-focused, theory-based efficacious prevention interventions that may impact mental health outcomes, including suicide behaviors and serious mental illness. The research should test prevention approaches that are both scalable and sustainable for implementation in pediatric-serving primary care settings, with an emphasis on populations experiencing mental health disparities. Applications are due by 5pm local time of applicant organization on July 1, 2021. Read more information: [R01](#), [R34](#).

## ***RACIAL AND ETHNIC MINORITIES***

**NIAAA Improving Health Disparities in Alcohol Health Services (R01 Clinical Trial Optional)**

**RFA-AA-21-001**

**Application Submission Deadline: March 15, 2021**

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) intends to renew an initiative by publishing a Funding Opportunity Announcement (FOA) to solicit applications for an R01 Clinical Trial Optional mechanism focusing on health disparities and health services. Research shows that there are myriad reasons why so few individuals with AUD receive treatment, including problems with access to care, health care coverage/payment options, employment, childcare, stigma, and awareness of care options, along with the misconception that treatment does not work. Critically, health disparate and vulnerable populations face unique and intersecting barriers to treatment. Health services research has lagged in special populations, particularly racial, ethnic, and sexual/gender minority populations. This FOA will include five areas of focus: access to treatment, making treatment more appealing, costs, dissemination and implementation, and health disparities. Applications are expected to emphasize health disparities in addition to the other four areas of emphasis. Applications are due by March 15, 2021. [Read more information.](#)

**NIH: Health Services Research on Minority Health and Health Disparities (R01- Clinical Trial Optional)**

**PAR-20-310**

**Application Submission Deadline: March 17, 2021**

As the Nation's steward of biomedical and behavioral research, NIH has devoted considerable resources to characterize the root causes of health disparities, uncovering a complex web of interconnected and overlapping factors (i.e., biological, behavioral, environmental, and societal). As an important next step, research is needed that capitalizes upon knowledge about causal pathways to directly and demonstrably contribute to the reduction of health disparities. The purpose of this FOA is to encourage health services research that can directly contribute to the improvement of minority health and/or the reduction of health disparities, while taking into consideration the interaction between system-level healthcare, individual clinical care and social determinants of health, including the role of structural systemic factors, place and neighborhood factors. The focus of this FOA is on all services provided in the healthcare setting where individuals from health disparity populations seek care with a clinician for preventive services, chronic disease management, urgent symptomatic care,

emergency care, and hospital care. Applications are due by 5:00 PM local time of the applicant on March 17, 2021. [Read more information.](#)

**NIH: NIAAA Improving Health Disparities in Alcohol Health Services (R01 Clinical Trial Optional)**  
**RFA-AA-21-001**

**Application Submission Deadline: March 15, 2021**

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) intends to renew an initiative by publishing a Funding Opportunity Announcement (FOA) to solicit applications for an R01 Clinical Trial Optional mechanism focusing on health disparities and health services. Research shows that there are myriad reasons why so few individuals with AUD receive treatment, including problems with access to care, health care coverage/payment options, employment, childcare, stigma, and awareness of care options, along with the misconception that treatment does not work. Critically, health disparate and vulnerable populations face unique and intersecting barriers to treatment. Health services research has lagged in special populations, particularly racial, ethnic, and sexual/gender minority populations. This FOA will include five areas of focus: access to treatment, making treatment more appealing, costs, dissemination and implementation, and health disparities. **NIH: Intervention Research to Improve Native American Health (R01 Clinical Trial Optional)**  
**PAR-20-238**

**Application Submission Deadline: May 17, 2021**

The purpose of this funding opportunity announcement (FOA) is to support research on interventions to improve health in Native American (NA) populations. This includes 1) etiologic research, where there is a significant gap in knowledge, that will directly inform intervention development or adaptations, 2) research that develops, adapts, or tests the efficacy or effectiveness of health promotion and disease prevention interventions, 3) research that tests culturally informed treatment or recovery interventions and 4) where a sufficient body of knowledge on intervention efficacy exists, research on dissemination and implementation that develops and tests strategies to overcome barriers to the adoption, integration, scale-up, and sustainability of effective interventions. Existing data suggest that significant acute and chronic disease inequities exist for NA populations. Concurrently, NA populations experience unique sociopolitical, historical, and environmental stressors and risks that may exacerbate health conditions and/or impact the effectiveness of existing solutions to address the conditions. They also possess unique strengths and resiliencies that can mitigate stressors or inform intervention strategies. Through this initiative, intervention and related research is sought to build upon community knowledge, resources, and resilience to test science-based, culturally appropriate solutions to reduce morbidity and mortality through identification and remediation of precursors to diseases and disorders and through culturally informed treatment. Interventions should be designed with a consideration for sustainability within the communities where they are tested, and have the flexibility to be readily adapted, disseminated, and scaled up to other communities where culturally appropriate. For the purposes of this FOA, Native Americans include the following populations: Alaska Natives, American Indians (whose ancestral lands fall at least partially within the U.S. mainland border), and Native Hawaiians. The term 'Native Hawaiian' means any individual any of whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii. Applications are due by May 17, 2021. [Read more information.](#)

**NIH: Research to Improve Native American Health (R21 Clinical Trials Optional)**  
**PAR-20-214**

**Application Submission Deadline: May 17, 2021**

The purpose of this funding opportunity announcement (FOA) is to support developmental/exploratory studies in preparation for health promotion, disease prevention, treatment, or treatment services research to improve health in Native American (NA) populations. Applications may include 1) etiologic research, where there is a significant gap in knowledge, that will directly inform intervention development or adaptations, 2) research to develop and pilot test new or adapted interventions for feasibility, acceptability, and scalability, 3) research to test the short-term efficacy of interventions, 4) where a sufficient body of knowledge on intervention efficacy exists, research on strategies to overcome barriers to the adoption, integration, scale-up, and sustainability of effective interventions. Existing data suggest that significant acute and chronic disease inequities exist for NA populations. Concurrently, NA populations experience unique sociopolitical, historical, and environmental stressors and risks that may exacerbate health conditions and/or impact the effectiveness of existing solutions to address the conditions. They also possess unique strengths and resiliencies that can mitigate stressors or inform intervention strategies. Through this announcement, culturally informed exploratory/developmental research is sought that builds upon community knowledge, resources, and resilience to provide foundational knowledge for future science-based, culturally appropriate solutions to reduce morbidity and mortality through identification and remediation of precursors to diseases and disorders and through culturally informed treatment. For the purposes of this FOA, Native Americans include the following populations: Alaska Natives, American Indians (whose ancestral lands fall at least partially within the U.S. mainland border), and Native Hawaiians. The term 'Native

Hawaiian' means any individual any of whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii. Applications are due by May 17, 2021. [Read more information.](#)

**NIH: Addressing the Etiology of Health Disparities and Health Advantages Among Immigrant Populations (R01 Clinical trial not allowed)**

**PAR-21-080**

**Application Submission Deadline: June 5, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to support innovative research to understand factors uniquely associated with the immigration experience that contribute to health disparities or health advantages among U.S. immigrant populations. This includes but is not limited to risk/protective factors associated with immigration processes from influences that push migration from the sending country, through the experience of immigration, to the experience of resettlement, short and long term residence in the U.S. and the process of acculturation that affect the health of U.S. immigrant populations (particularly migrant workers, recent and 1st generation immigrants). Projects must focus on immigrants from one or more NIH-designated populations that experience health disparities in the United States, which include racial and ethnic minorities (Blacks or African Americans, Hispanics/Latinos, Asian Americans, and Pacific Islanders). For this FOA, residents of U.S. territories (Guam, Puerto Rico, American Samoa, Commonwealth of the Northern Mariana Islands, and U.S. Virgin Islands) who migrate to the U.S. mainland are also considered to be immigrants. All applications are due by 5:00 PM local time of applicant organization on June 5, 2021. [Read more information.](#)

**NIH: Addressing Health Disparities among Immigrant Populations through Effective Interventions (R01 Clinical Trial Optional)**

**PAR-21-081**

**Application Submission Deadline: June 5, 2021**

The purpose of this initiative is to support research to design and implement effective interventions to enhance health advantages and reduce the health disparities among US immigrant populations. Given the scientific literature documenting health inequities among immigrant populations, this announcement calls for multidisciplinary/multilevel research focusing on the design and implementation of effective interventions that will address immigrant-specific factors to reduce health disparities, particularly among migrant workers, recent and 1st generation immigrants. The intervention research under this FOA should be aimed at improving the health outcome among immigrant groups by targeting the complex causes or consequences of health disparities. Projects must focus on immigrants from one or more NIH-designated populations that experience health disparities in the United States, which include racial and ethnic minorities (Blacks or African Americans, Hispanics/Latinos, Asian Americans, and Pacific Islanders). For this FOA, residents of U.S. territories (Guam, Puerto Rico, American Samoa, Commonwealth of the Northern Mariana Islands, and U.S. Virgin Islands) who migrate to the U.S. mainland are also considered to be immigrants. All applications are due by 5:00 PM local time of applicant organization on February 5, 2021. [Read more information.](#)

**NIH: NLM Information Resource Grants to Reduce Health Disparities (G08 Clinical Trial Not Allowed).**

**PAR-20-283**

**Application Submission Deadline: October 22, 2021**

This Funding Opportunity Announcement (FOA) solicits resource grant applications for projects that will bring useful, usable health information to health disparity populations and their health care providers. Access to useful, usable, understandable health information is an important factor when making health decisions. Proposed projects should exploit the capabilities of computer and information technology and health sciences libraries to bring health-related information to consumers and their health care providers. Because this FOA focuses on providing health information to health disparity populations, institutions with demonstrated commitment to the needs of health disparity communities (including Tribal Colleges and Universities (TCU), Historically Black Colleges and Universities (HBCU), Hispanic-Serving Institutions (HSI) and other Minority-Serving Institutions (MSI)) are encouraged to apply. Applications are due by October 22, 2021. [Read more information.](#)

**NIH: Research Supplements to Promote Diversity in Health-Related Research (Admin Supp - Clinical Trial Not Allowed)**

**PA-18-906**

**Application Submission Deadline: NIH Institutes and Centers (ICs) dependent**

The National Institutes of Health (NIH) and the Center for Disease Control and Prevention hereby notify Program Director(s)/Principal Investigator(s) (PD(s)/PI(s)) holding specific types of research grants that funds are available for administrative supplements to improve the diversity of the research workforce by recruiting and supporting students, postdoctorates, and eligible investigators from diverse backgrounds, including those from groups that have been shown to be underrepresented in health-related research. This supplement opportunity is also available to PD(s)/PI(s) of research

grants who are or become disabled and need additional support to accommodate their disability in order to continue to work on the research project. Administrative supplements must support work within the scope of the original project. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. The application deadline varies by IC. [See specific deadlines](#) and [read more information](#).

**NIMHD: Exploratory/Developmental Research Grant Program (R21 - Clinical Trial Optional)  
PAR-20-150**

**Application Submission Deadline: June 16, 2021**

NIMHD invites applications to support short-term exploratory or developmental research projects that have the potential to break new ground in the fields of minority health and/or health disparities or extend previous discoveries toward new directions or applications that can directly contribute to improving minority health and/or reducing health disparities in the U.S. Applications are due by June 16, 2021. [Read more information](#).

**NIJ: Research and Evaluation on Violence Against Women, Fiscal Year 2021  
O-NIJ-2021-45009**

**Application Submission Deadline: March 16, 2021**

With this solicitation, the National Institute of Justice, NIJ, seeks proposals for rigorous research and evaluation projects to support the development of objective and independent knowledge and validated tools to reduce violence against women (VAW) (including violence against elderly women and American Indian and Alaska Native women and girls[1]), promote justice for victims of crime, and enhance criminal justice responses. For that reason, this solicitation seeks applications for grant funding to conduct research and evaluation projects examining a broad range of topics, including the crimes of domestic and family violence, homicide, intimate partner and dating violence, rape, sexual assault, stalking, and sex trafficking, along with the associated criminal justice system response, procedures, and policies. In Fiscal Year (FY) 2021, NIJ is interested in research responding to the following two priority areas: 1) evaluation research on VAW programs, models, practices and 2) VAW research. Applications are due by March 16, 2021. [Read more information](#).

**NSF: Alliances for Graduate Education and the Professoriate  
16-552**

**Application Submission Deadline: Second Friday in December, Annually**

The Alliances for Graduate Education and the Professoriate (AGEP) program seeks to advance knowledge about models to improve pathways to the professoriate and success for historically underrepresented minority doctoral students, postdoctoral fellows and faculty, particularly African Americans, Hispanic Americans, American Indians, Alaska Natives, Native Hawaiians, and Native Pacific Islanders, in specific STEM disciplines and/or STEM education research fields. New and innovative models are encouraged, as are models that reproduce and/or replicate existing evidence-based alliances in significantly different disciplines, institutions, and participant cohorts. The AGEP program goal is to increase the number of historically underrepresented minority faculty, in specific STEM disciplines and STEM education research fields, by advancing knowledge about pathways to career success. The program objectives include: To support the development, implementation and study of innovative models of doctoral education, postdoctoral training, and faculty advancement for historically underrepresented minorities in specific STEM disciplines and/or STEM education research fields; and to advance knowledge about the underlying issues, policies and practices that have an impact on the participation, transitions and advancement of historically underrepresented minorities in the STEM academy. Applications are due by the second Friday in December, annually. [Read more information](#).

## **SEXUAL AND GENDER MINORITIES**

**NIH: NIAAA Improving Health Disparities in Alcohol Health Services (R01 Clinical Trial Optional)  
RFA-AA-21-001**

**Application Submission Deadline: March 15, 2021**

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) intends to renew an initiative by publishing a Funding Opportunity Announcement (FOA) to solicit applications for an R01 Clinical Trial Optional mechanism focusing on health disparities and health services. Research shows that there are myriad reasons why so few individuals with AUD receive treatment, including problems with access to care, health care coverage/payment options, employment, childcare, stigma, and awareness of care options, along with the misconception that treatment does not work. Critically, health disparate and vulnerable populations face unique and intersecting barriers to treatment. Health services research has lagged in special populations, particularly racial, ethnic, and sexual/gender minority populations. This FOA will include five areas of focus: access to treatment, making treatment more appealing, costs, dissemination and implementation, and health disparities.

Applications are expected to emphasize health disparities in addition to the other four areas of emphasis. Applications are due by March 15, 2021. [Read more information.](#)

## **SOCIAL PSYCHOLOGY**

**NEW** NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Clinical Trials Not Allowed)

**PAR-21-145**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to model the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in health, illness, recovery, and overall wellbeing. This includes research on the consequences of perceived isolation (e.g., loneliness) and/or objective/observed isolation on behavioral and clinical outcomes in adolescence and adulthood. Both animal and human subjects research projects are welcome. Researchers proposing basic science experimental studies involving human participants should consider the companion FOA PAR-21-144 "Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)". [Read more information.](#)

**NEW** NIH: Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Well-being, Illness, and Recovery (R01 Basic Experimental Studies with Humans Required)

**PAR-19-384**

**Application Submission Deadline: March 17, 2021**

This funding opportunity announcement (FOA) invites research projects that seek to explain the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in human health, illness, recovery, and overall well-being. Types of projects submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical and/or behavioral outcomes in humans to understand fundamental aspects of phenomena related to social connectedness and isolatedness. NIH considers such studies as "prospective basic science studies involving human participants" that meet the NIH definition of basic research and fall within the NIH definition of a clinical trials (see, e.g., NOT-OD-19-024). Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applications are due by 5pm local time of applicant organization on March 17, 2021. [Read more information.](#)

**NSF: Social Psychology**

**NSF 98-1332**

**Application Submission Deadline: January 15 and July 15 annually**

The Social Psychology Program at NSF supports basic research on human social behavior, including cultural differences and development over the life span. Among the many research topics supported are: attitude formation and change, social cognition, personality processes, interpersonal relations and group processes, the self, emotion, social comparison and social influence, and the psychophysiological and neurophysiological bases of social behavior. The scientific merit of a proposal depends on four important factors: (1) The problems investigated must be theoretically grounded. (2) The research should be based on empirical observation or be subject to empirical validation. (3) The research design must be appropriate to the questions asked. (4) The proposed research must advance basic understanding of social behavior. Grant applications are due by January 15 and July 15 annually. [Read more information.](#)

## **SOCIOLOGY**

**NSF: National Science Foundation Sociology Program**

**PD-98-1331**

**Application Submission Deadline: January 15 and August 15 annually**

The Sociology Program supports basic research on all forms of human social organization -- societies, institutions, groups and demography -- and processes of individual and institutional change. The Program encourages theoretically focused empirical investigations aimed at improving the explanation of fundamental social processes. Included is research on organizations and organizational behavior, population dynamics, social movements, social groups, labor force participation, stratification and mobility, family, social networks, socialization, gender roles, and the sociology of science and technology. The Program supports both original data collections and secondary data analysis that use the full range of quantitative and qualitative methodological tools. Theoretically grounded projects that offer methodological innovations

and improvements for data collection and analysis are also welcomed. Applications are due on January 15 and August 15 annually. [Read more information.](#)

#### **NSF: Human Networks and Data Science (HNDS)**

**NSF 21-514**

##### **Application Submission Deadline: First Thursday in February, Annually**

The Human Networks and Data Science program (HNDS) supports research that enhances understanding of human behavior and how humans interact with and are influenced by their environments by leveraging data science and network science research across a broad range of topics. HNDS research will identify ways in which dynamic, distributed, and heterogeneous data can provide novel answers to fundamental questions about individual and group behavior. HNDS is especially interested in proposals that provide data-rich insights about human networks to support improved health, prosperity, and security. The HNDS program offers two tracks: one for infrastructure projects and one for core research activities. Infrastructure projects (HNDS-I) will develop user-friendly large-scale next-generation data resources and relevant analytic techniques to advance fundamental research in SBE areas of study. Core research projects (HNDS-R) will address theoretically motivated questions about the nature, causes, and/or consequences of human behavior (broadly defined) that occurs within the multidimensional contexts defined by the networks that determine the human experience, from the biological networks in the human body to the sociocultural, economic and geospatial networks that comprise human societies. All applications are due by 5:00 PM local time of applicant organization on the first Thursday in February, annually. [Read more information.](#)

#### ***SUBSTANCE USE AND ABUSE.***

**NEW NIAAA: SARS-CoV-2, COVID-19 and Consequences of Alcohol Use (R01 Clinical Trial Not Allowed); (R03 Clinical Trial Not Allowed); (R21 Clinical Trial Not Allowed)**

**RFA-AA-21-002; RFA-AA-21-003; RFA-AA-21-004**

##### **Application Submission Deadline: April 14, 2021**

This Funding Opportunity Announcement (FOA) will support research grants to address urgent, time-sensitive research questions on the relationships between alcohol consumption and COVID-19 related outcomes and consequences. The principal area of focus is research that can improve public health in the near term by informing responses to the current COVID-19 pandemic, in view of 1) the impact of alcohol misuse on incidence and severity of COVID-19 disease or 2) the effect of the COVID-19 disease and pandemic-induced restrictions on alcohol use and alcohol use disorder (AUD). Time-sensitive applications for which standard NIH review and funding timelines would compromise either the ability to conduct the research or the value of the knowledge and with the potential to inform responses to the current pandemic will be considered. Applications to RFA-AA-21-002 should be accomplished within a three-year project duration. The RFA-AA-21-003 FOA uses the R03 mechanism, which is intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application. The RFA-AA-21-004 FOA uses the R21 grant mechanism, which is intended to support investigation of novel scientific ideas or new model systems, tools, or technologies that have the potential for significant impact on biomedical or biobehavioral research. Read more information: [RFA-AA-21-002](#); [RFA-AA-21-003](#); [RFA-AA-21-004](#).

**NIAAA Prevention and Intervention Approaches for Fetal Alcohol Spectrum Disorders (R34 Clinical Trial Optional; R61/R33 Clinical Trial Optional)**

**PAR-21-097; PAR-21-098**

##### **Application Submission Deadline: June 17, 2021**

This Funding Opportunity Announcement (FOA) focuses on prevention and intervention strategies for fetal alcohol spectrum disorders (FASD) throughout the lifespan. The intent of this FOA is to support research that advances (1) prevention approaches to reduce prenatal alcohol exposure and the incidence of FASD and (2) interventions for FASD. Research conducted via the R34 mechanism will consist of studies that are a pre-requisite for preparing and submitting subsequent applications for larger scale FASD prevention or intervention studies. The R61 phase will support pilot studies or secondary data analysis for hypothesis development and feasibility, and research testing the hypotheses can be expanded in the R33 phase. Applications are due by 5:00 PM local time of applicant organization on June 17, 2021. Read more information: [PAR-21-097](#); [PAR-21-098](#).

**NIDA: Mentored Clinical Scientist Development Program Award in Substance Use and Substance Use Disorder Research (K12 Clinical Trial Optional)**

**PAR-20-249**

##### **Application Submission Deadline: March 1, 2021**

This funding opportunity announcement (FOA) encourages applications for institutional research career development (K12) programs that propose to support intensive supervised research and career development experiences for clinician

scientists (Scholars) leading to research independence in the area of substance use and substance use disorder research. For this FOA, clinician scientists may include (but are not limited to) physicians, clinical psychologists, epidemiologists, doctoral level social workers, pharmacists, and behavioral scientists. Scholars are expected to be supported for 3-5 years on consecutive 12-month appointments. Candidates selected for support as scholars must hold a doctorate and commit a minimum of 9 person months (equivalent to 75% of full-time professional effort) to conducting clinical research and career development activities associated with the proposed program. Applications are due by March 1, 2021. [Read more information](#).

**NIDA: Behavioral Science Track Award for Rapid Transition (B/Start)(R03 Clinical Trial Optional)  
PAR-19-310**

**Application Submission Deadline: June 16, 2021**

This Funding Opportunity from the National Institute on Drug Abuse (NIDA) will use a NIH Small Research Grant (R03) award mechanism to support studies that apply affective, cognitive and behavioral science approaches to research questions relevant to substance use disorders (SUD). With this R03 mechanism, NIDA aims to seed innovative affective, cognitive and behavioral hypotheses, models, and methods in preclinical and clinical SUD research. The B/START R03 is intended for recently-independent investigators with expertise in behavioral science as well as established investigators who are using behavioral science approaches to SUD for the first time. Studies supported by B/START are expected to produce a coherent set of preliminary findings that would inform the design of a more complete study and serve as preliminary data supporting feasibility or scientific rationale in an R01, R21 or similar application. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#).

**NIDA: Small Research Grant Program (R03 Clinical Trial Required)  
PA-20-146**

**Application Submission Deadline: June 16, 2021**

The NIDA Small Research Grant Program supports small clinical trials that can be carried out in a short period of time with limited resources. This program supports different types of projects including pilot, feasibility, or small clinical trials with medications, behavioral interventions, immunotherapies, therapeutic devices, therapeutic digital applications, health services, prevention interventions, biomarkers, and development of research methodology. This Funding Opportunity Announcement requires that a clinical trial be proposed. The proposed project must be related to the programmatic interests of NIDA. Applications are due by June 16, 2021. [Read more information](#).

**NIDA: Substance Use/Substance Use Disorder Dissertation Research Award (R36 - Clinical Trials Optional)  
PA-20-208**

**Application Submission Deadline: June 16, 2021**

The goal of this FOA is to support doctoral candidates from a variety of academic disciplines for up to two years for the completion of the doctoral dissertation research project. Research projects should align with NIDA funding priorities or within the NIDA Strategic Plan. This award will facilitate the entry of promising new investigators into the field of substance use/substance use disorder (SU/D) research, enhancing the pool of highly talented SU(D) researchers. Applications are particularly encouraged from those who can contribute to diversifying the research workforce as described in the Notice of NIH's Interest in Diversity. Applications are due by 5pm local time of applicant organization on June 16, 2021. [Read more information](#)

**new NIDA: Exploratory studies to investigate mechanisms of HIV infection, replication, latency, and/or pathogenesis in the context of substance use disorders (R61/R33 - Clinical Trial Not Allowed)  
RFA-DA-22-004**

**Application Submission Deadline: July 14, 2021**

The purpose of this FOA is to support exploratory studies developing or using novel tools or technologies or testing novel hypotheses to investigate mechanistic questions in HIV infection, replication, latency, and/or pathogenesis (including neuroHIV) in the context of Substance Use Disorders (SUDs). This initiative focuses on exploration and characterization of signaling pathways that are involved in central nervous system (CNS) HIV establishment and expansion. The FOA aims to promote research to investigate the underlying molecular mechanisms by which HIV infection is initiated, established, and maintained in the CNS and to determine how addictive substances modulate HIV infection, latency and the size and persistence of CNS HIV reservoirs. [Read more information](#).

**NIDA: Research Education Program for Clinical Researchers and Clinicians (R25 Clinical Trial Not Allowed)  
PAR-19-258**

**Application Submission Deadline: August 10, 2021**

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The over-arching goal of this NIDA R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation's biomedical, behavioral and clinical research needs. This FOA is intended to

support research education activities that enhance the knowledge of substance use (SU) and substance use disorder (SUD) research. The program is intended for those in clinically focused careers and/or those training for careers as clinicians/health service providers, clinical researchers, or optimally a combination of the two. This mechanism may not be used to support non-research-related clinical training. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on Courses for Skills Development and Research Experiences. The proposed research education programs must include both courses for skills development and research experiences with primary emphasis on research experiences. Proposed courses should be developed in conjunction with and support research experiences to enhance skills development. Letters of intent are due 30 days prior to the application due date. Applications are due by August 10, 2021. [Read more information.](#)

**[new] NIDA: High-throughput Discovery and Validation of Novel Signal Transducers or Small Molecules that Modulate Opioid or other Substance Use Disorder Relevant Pathways (R01 - Clinical Trials Not Allowed)**  
**RFA-DA-22-006**

**Application Submission Deadline: September 15, 2021**

This FOA will support high-throughput screening approaches to identify novel receptors, signal transducers, or small molecules that modulate Substance Use Disorder (SUD)-relevant signal transduction pathways (dopamine, opioid, cannabinoid, nicotinic, or other appropriately justified pathway). Applicants may also propose secondary screens and/or validation of high value identified targets. [Read more information.](#)

**NIDA: Research Center of Excellence Grant Program (P50 Clinical Trial Optional)**  
**PAR-19-259**

**Application Submission Deadline: September 25, 2021**

This Funding Opportunity Announcement (FOA) is to provide support for research Centers that (1) conduct drug abuse and addiction research in any area of NIDA's mission, (2) have outstanding innovative science, (3) are multidisciplinary, thematically integrated, synergistic, and (4) serve as national resource(s) to provide educational and outreach activities to drug abuse research communities, educational organizations, the general public, and policy makers in the NIDA research fields. It is expected that a Center will transform knowledge in the sciences it is studying. Incremental work should not be the focus of Center activities; rather, new and creative directions are required. The P50 Center of Excellence is expected to foster the career development and mentoring of new investigators who would be given meaningful roles to play in the Center projects. A goal of this program is to create NIDA Centers that are national community resources for furthering drug abuse research by sharing their findings, their data, and their resources as appropriate for researchers to use and build upon and to advance research in this field. Letters of intent are due 30 days prior to the application due date. Applications are due by September 25, 2021. [Read more information.](#)

**NIH: Providing Research Education Experiences to Enhance Diversity in the Next Generation of Substance Use and Addiction Scientists (R25 Clinical Trials Not Allowed)**  
**PAR-20-236**

**Application Submission Deadline: March 15, 2021**

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Research Experiences and Courses for Skills Development. Applications are due by 5:00 PM local time of applicant organization on March 15, 2021. [Read more information.](#)

**NIH: HEAL Initiative: Optimizing Multi-Component Service Delivery Interventions for People with Opioid Use Disorder, Co-Occurring Conditions, and/or Suicide Risk (R01 Clinical Trials Optional)**  
**RFA-MH-21-145**

**Application Submission Deadline: March 18, 2021**

In April 2018, the National Institutes of Health (NIH) launched the HEAL (Helping to End Addiction Long-term) Initiative, an aggressive, trans-agency effort to speed scientific solutions to stem the national opioid public health crisis. In response to this initiative, the National Institute of Mental Health (NIMH), in partnership with other NIH Institutes, Centers, and Offices, invites research that will optimize multi-component service delivery interventions for people with opioid use disorder (OUD) and co-occurring conditions, to include mental disorders and/or suicide risk. The purpose of the initiative is to support studies that will (1) test the overall effectiveness of multi-component interventions for OUD and co-occurring conditions and (2) examine the relative contribution of constituent components to overall effectiveness. This research will streamline service packages so they only include components that drive clinical improvements for complex conditions. Applications are due by 5:00 PM local time of applicant organization on March 18, 2021. [Read more information.](#)

**NIH: NIAAA Resource-Related Research Projects (R24 Clinical Trial Not Allowed)**

**PAR-21-072****Application Submission Deadline: May 25, 2021**

The purpose of the Resource-Related Research Projects (R24) grant provided by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) is to support investigator-initiated resources designed to provide materials and services to support and advance biomedical research on a national basis. An R24 resource grant mechanism is a non-hypothesis-driven activity to provide data, materials, tools, or services that are essential to making timely, high quality, and cost-efficient progress in a field. Hypothesis-driven research applications should not be submitted in response to this program announcement but to another mechanism that encourages this type of research. The resource should be available to any qualified investigator, and should be highly quality controlled, and not duplicate resources available commercially or through other sources. Resources should be designed to provide services to the broad alcohol research community and should not be limited by any specific regional focus. Applications are due by 5:00 PM local time of applicant organization on May 25, 2021. [Read more information.](#)

**NIH: Integrative Neuroscience Initiative on Alcoholism (INIA) Consortia (U01 Clinical Trial Optional) (U24 Clinical Trial Optional)****RFA-AA-20-013; RFA-AA-20-012****Application Submission Deadline: May 26, 2021**

The National Institute on Alcohol Abuse and Alcoholism (NIAAA) seeks to continue the Integrative Neuroscience Initiative on Alcoholism (INIA), a translational, multidisciplinary, collaborative research effort studying brain mechanisms of excessive alcohol drinking associated with alcohol use disorder (AUD). The research focus includes mechanisms behind changes in the brain that result from excessive alcohol use and are associated with the development of AUD, brain changes that result in excessive use that is then correlated with AUD, and also the relationship between excessive drinking, stress, and anxiety. The primary goal of INIA is to identify brain adaptations at multiple levels of analysis that result in excessive alcohol consumption. Each consortium supported under this initiative will integrate analysis at the molecular, cellular, extracellular, synaptic, physiological and behavioral level. INIA has also helped to define factors that contribute to an individual's risk for the development of AUD and has identified novel targets for therapeutic intervention including medications. The linked set of FOAs will support two consortia each comprised of an administrative core, multiple component projects (this FOA) and relevant scientific resource cores as needed. Applications are due by 5:00 PM local time of applicant organization on May 26, 2021. Read more information: [U01](#), [U24](#)

**NIH: Accelerating the Pace of Drug Abuse Research Using Existing Data (R01 Clinical Trial Optional)****PAR-19-368****Application Submission Deadline: June 5, 2021**

The purpose of this Funding Opportunity Announcement (FOA) is to invite applications proposing innovative analysis of existing social science, behavioral, administrative, and neuroimaging data to study the etiology and epidemiology of substance using behaviors (defined as alcohol, tobacco, prescription and other substances) and related disorders, prevention of substance use and HIV, and health service utilization. This FOA encourages the analyses of public use and other extant community-based or clinical datasets to their full potential in order to increase our knowledge of etiology, trajectories of substance using behaviors and their consequences including morbidity and mortality, risk and resilience in the development of psychopathology, strategies to guide the development, testing, implementation, and delivery of high quality, effective and efficient services for the prevention and treatment of substance use disorder and HIV. Applications are due by June 5, 2021. [Read more information.](#)

**NIH: Alcohol and Other Drug Interactions: Unintentional Injuries and Overdoses: Epidemiology and Prevention (R01 - Clinical Trial Optional), (R03 - Clinical Trial Optional), (R21 - Clinical Trial Optional)****PA-18-861, PA-18-862, PA-18-863****Application Submission Deadline: June 5, 2021 (R01), June 16, 2021 (R03, R21)**

The purpose of this funding announcement (FOA) issued by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) of the National Institutes of Health (NIH) is to encourage research grant applications that explore whether and how alcohol and other illicit drugs or illicitly used prescription drugs interact to contribute to unintentional injuries and poisonings and how to prevent and/or reduce simultaneous use of alcohol or drugs singly or in combination. Applications are due by 5pm local time of applicant organization by June 5, 2021 ([R01](#)) and June 16, 2021 ([R03](#), [R21](#)).

**NIH: Electronic Nicotine Delivery Systems (ENDS): Population, Clinical and Applied Prevention Research (R01 - Clinical Trial Optional) (R21 - Clinical Trial Optional)****PAR-18-847, PAR-18-848****Application Submission Deadline: June 15, 2021 (R01); June 25, 2021 (R21)**

The purpose of this funding opportunity announcement is to support studies on electronic nicotine delivery systems (ENDS) that examine population-based, clinical and applied prevention of disease, including etiology of use, epidemiology of use, potential risks, benefits and impacts on other tobacco use behavior among different populations. Applications are

due by 5pm local time of applicant organization by [June 15, 2021 \(R01\)](#) and [June 25, 2021 \(R21\)](#). Read more information: [R01](#), [R21](#).

**NIH: Multi-Site Studies for System-Level Implementation of Substance Use Prevention and Treatment Services (R01 Clinical Trial Optional; R01 Clinical Trial Optional)**

**PAR-21-022; PAR-21-023**

**Application Submission Deadline: July 19, 2021**

As part of the Collaborative Research on Addiction at NIH (CRAN) initiative, the National Institute on Drug Abuse (NIDA), the National Institute on Alcohol Abuse and Alcoholism (NIAAA), and the National Cancer Institute (NCI) join to issue this FOA. The purpose of this FOA is to support the development and testing of implementation strategies to achieve system-level adoption of evidence-based interventions, guidelines, or practices to improve the delivery, quality, and sustainability of prevention or treatment services for substance use disorders. This FOA seeks research projects that will test implementation strategies intended to achieve system-wide integration of evidence-based practices (interventions, guidelines, or service delivery models) to prevent or treat substance use disorders (broadly defined to include alcohol, tobacco and other drugs, as well as prescription medications). Areas of interest also include implementation of guidelines related to the appropriate use of opioids for pain management in individuals with or at risk for opioid use disorder. All applications are due by 5:00 PM local time of applicant organization on [July 19, 2021](#). Read more information: [PAR-21-022](#); [PAR-21-023](#)
